Study of a Compact Energy Absorber Muhammad Ali,2007

Design, Fabrication and Testing of a Crushable Energy Absorber for a Passive Earth Entry Vehicle National Aeronautics and Space Administration (NASA), 2018-05-29 A conceptual study was performed to investigate the impact response of a crushable energy absorber for a passive Earth entry vehicle. The spherical energyabsorbing concept consisted of a foam-filled composite cellular structure capable of omni-directional impact-load attenuation as well as penetration resistance. Five composite cellular samples of hemispherical geometry were fabricated and tested dynamically with impact speeds varying from 30 to 42 meters per second. Theoretical crush load predictions were obtained with the aid of a generalized theory which accounts for the energy dissipated during the folding deformation of the cell-walls. Excellent correlation was obtained between theoretical predictions and experimental tests on characteristic cellweb intersections. Good correlation of theory with experiment was also found to exist for the more complex spherical cellular structures. All preliminary design requirements were met by the cellular structure concept. which exhibited a near-ideal sustained crush-load and approximately 90% crush stroke. Loop Bar Energy Absorber Stuart J. Thurston,1980 Energy Absorption of a Specific Aluminum Honeycomb Edward H. Schell,1962 One configuration of an aluminum honeycomb energy absorber has been tested under conditions of varying velocity. A curve of energy per unit volume versus velocity is presented to show dynamic variance. The dynamic stress level and volume efficiency of the material are also presented. The appendices give a simple design procedure. (Author).

The Shock Absorber Handbook John C. Dixon, 2008-02-28 Every one of the many millions of cars manufactured annually worldwide uses shock absorbers, otherwise known as dampers. These form a vital part of the suspension system of any vehicle, essential for optimizing road holding, performance and safety. This, the second edition of the Shock Absorber Handbook (first edition published in 1999), remains the only English language book devoted to the subject. Comprehensive coverage of design, testing, installation and use of the damper has led to the book's acceptance as the authoritative text on the automotive applications of shock absorbers. In this second edition, the author presents a thorough revision of his book to bring it completely up to date. There are numerous detail improvements, and extensive new material has been added particularly on the many varieties of valve design in the conventional hydraulic damper, and on modern developments such as electrorheological and magnetorheological dampers. The Shock Absorber Handbook, 2nd Edition provides a thorough treatment of

the issues surrounding the design and selection of shock absorbers. It is an invaluable handbook for those working in industry, as well as a principal reference text for students of mechanical and automotive engineering.

Energy Absorber for Vehicle Occupant Safety and Survivability ,2006 A design was developed for a new type of impact energy absorber. This device would be expected to demonstrate favorable application to vehicle occupant safety in crash and secondary impact events. Simulation data involving impacts between an anthropometric dummy head and the absorber is presented to illustrate occupant protection performance under various impact loading conditions.

Proceedings of the TMS Middle East - Mediterranean Materials Congress on Energy and Infrastructure Systems (MEMA 2015) Ibrahim Karaman, Raymundo Arróyave, Eyad Masad, 2016-12-06 This is a collection of papers presented at The TMS Middle East - Mediterranean Materials Congress on Energy and Infrastructure Systems (MEMA 2015), a conference organized by The Minerals, Metals & Materials Society (TMS) and held in Doha, Qatar. The event focused on new materials research and development in applications of interest for Qatar and the entire Middle East and Mediterranean region. The papers in this collection are divided into five sections: (1) Sustainable Infrastructure Materials; (2) Computational Materials Design; (3) Materials for Energy Conversion and Storage; (4) Lightweight and High Performance Materials; and (5) Materials for Energy Extraction and Storage: Shape

Relationship Between Mechanical-property and Energy-absorption Trends for Composite Tubes Gary L. Farley,1992

Development of an Advanced Energy Absorber ,1999 The attenuation of vertical impact forces in helicopter mishaps is one of the prime factors in determining survivability. Within the cockpit, energy-absorbing crewseats have made significant improvements in helicopter crash survival. The first crashworthy crewseats used fixed-load energy absorbers (EA's) to limit the load on the occupant's spine. These EA's were not adjustable and stroked at a factory-established, constant load through their entire operating range. Energy absorbers (also known as energy attenuators or load limiters) were then developed with a provision for manually adjusting the load so that a wide range of occupants would have equal protection in a crash. An EA load is selected that is proportional to the occupant's weight so that each occupant will experience similar acceleration and use similar stroking space in a crash. This technology was applied in programs to retrofit new seats into the U.S. Navy's CH-53 Sea Stallion and SH-3 Sea King aircraft. Work is currently underway to produce the next-generation energy absorber. The improved EA must be able to perform several functions. It must exhibit a load-deflection curve that produces the most efficient operation within the limits of human tolerance and within the limited vertical space available in military helicopters. It must also provide equal protection for the entire aircrew population, from the smallest female to the largest male. The efforts to date have produced very promising results. This paper summarizes the development of the advanced energy absorber stroking profile and the seat dynamic test results.
