Eucalyptus Abbot Kinney,1895

Eucalyptus John J.W. Coppen,2002-04-25 Eucalyptus, a genus of over 800 species, is a multiproduct crop par excellence. Not only is it grown for timber, pulp and fuelwood, but, as the Aborigines discovered thousands of years ago, it has numerous medicinal and aromatic properties. Since the first commercial distillation of eucalyptus oil 150 years ago, a vast array of eucalyptus-based pro

Eucalyptus Murray Bail,2007-08-21 Winner of the Commonwealth Writers' Prize for Best Book A New York Times Book Review Notable Book of the Year On a property in New South Wales, a widower named Holland lives with his daughter, Ellen. Over the years as she grows into a beautiful woman, Holland plants hundreds of different eucalyptus trees on his land, filling the landscape, making a virtual outdoor museum of trees. When Ellen is nineteen, Holland announces that she may only marry the man who can correctly name the species of each and every gum tree on his property. A strange contest begins, and Ellen is left unmoved by her suitors until she chances on a strange young man resting under the Coolibah tree whose stories will amaze and dazzle her. A modern fairy tale, and an unforgettable love story, that bristles with spiky truths and unexpected wisdom about art, feminine beauty, landscape, and language. Eucalyptus affirms the seductive power of storytelling itself.

Eucalyptus Shahid A. Abbasi,N. Ramesh,S. Vinithan,2004 Eucalyptus is one such genera of trees. But at present it is hardly regarded as a gift of God by majority of environmentalists. To them, eucalyptus is a curse, a scourge, a harbinger of despair and destruction! Eucalyptus Abbot Kinney, 2015-06-26 Excerpt from *Eucalyptus* The planting of trees of various species of *Eucalyptus* in California has been carried on since January, 1856, when Mr. C. L. Reimer successfully introduced 14 species. During all this time neither nurserymen nor the general public have had any work on this genus by which they could identify the various species. Everything depended on the seedsmen primarily and in a secondary way on the accuracy of the records of planters. From mistake in both these respects the greatest confusion and uncertainty has arisen. Of the large number of useful species introduced into California but three or four are certainly and general! known today. The botanical works covering this genus are inaccessible to the public on account of their great cost. There are only three copies of the *Eucalyptographia* and two of Bentham's books in this State, as far as I know. The importance of this genus as producers of kino, oils, timber and fuel, for ornament and the reclamation of waste places and for the probable sanitary effects of several of the species together with the rapidity of growth of nearly all and the remarkable adaptability to the major portion of California makes a means of identification a want that should be supplied. Baron Ferdinand Von Mueller has, in the broad spirit of a true scientific man, given me the use of his great work on this genus, even to copying the plates.
