Eureka William Diehl, 2002-02-19 *Eureka*. It's what you say when you strike gold. It's also a town in California where the truth might be buried forever. In New York Times bestselling author William Diehl's thrilling, accomplished new novel, the seamy past of America's most glamorous state lies in this deceptively peaceful area, one hundred miles north of Los Angeles. It was the lawless place from which young, rugged Thomas Culhane escaped to fight World War I. Now it's a place where, two decades later, police detective Zeke Bannon investigates a death that seems a sad accident. Until you look a bit closer. The year is 1941. Verna Wilensky has been electrocuted in her bathtub, leaving a lower-middle-class life, no survivors, and a bank account packed with almost a hundred thousand dollars. Mysterious checks have consistently come to her for more than twenty years, most drawn from a bank in San Pietro, a town once known as Eureka. Eureka was a town that used to be a bootlegger's paradise and a gangster's dream. Now it is the rebuilt metropolis where Sheriff Thomas Culhane is launching a bid to be the golden state's next governor. But something just might threaten his ambitions. As Bannon digs deeper into Wilensky's demise, he unearths a decades-old secret that starts in a shootout, builds to a bloodbath, and could end up within the upper echelons of California's elite, forever changing the destiny of a state. Rich in historical detail, complex in its connection between past and present, and filled with the nonstop action that are the hallmarks of this modern master, *Eureka* is an epic achievement of storytelling and suspense—William Diehl's most extraordinary novel yet.

Eureka Jim Lehrer, 2009-03-24 Ever reliable and responsible, Otis Halstead is a father, a husband (one half of a "well-dressed couple of substance"), and the CEO of Kansas Central Fire and Casualty. He has never done anything out of the ordinary. Until now. The change in Otis starts with the acquisition of an antique toy fire truck, the exact model he had pined for at age ten but never received. Next comes a Daisy Red Ryder BB gun. But Otis's real coup is the purchase of his one true childhood passion: a red 1952 Cushman Pacemaker motor scooter. For his baffled wife, Sally, this is the final straw. She insists that he see a shrink. But when tragedy strikes uncomfortably close to home, Otis decides he wants out of his sensible, safe life in Eureka, Kansas. And so, a few weeks before his sixtieth birthday, Otis leaves town, heading west on old U.S. 56, a corporate CEO riding a forty-year-old motor scooter with a BB gun strapped to the side. One might say he was in for an adventure. Otis would say he was finally about to experience life.

Eureka: Road Less Traveled Cris Ramsay, 2011-03-29 A Global Dynamics researcher has a

breakthrough on her project visualizing another dimension. And since GD's experiments have a bad tendency to affect the entire town, Sheriff Jack Carter heads over to check it out. What he sees blows him away. The project has revealed a parallel universe, complete with another Eureka-one in which Carter doesn't exist! But as the two worlds begin to bleed into each other and residents confront their alternate selves, Carter may be the one man who can keep both Eurekas from being destroyed.

Daughters of a Dead Empire Carolyn Tara O'Neil,2022-02-22 This fresh, thrilling take on Anastasia establishes that O'Neil is a debut author to watch. —Buzzfeed From debut author Carolyn Tara O'Neil comes a thrilling alternate history set during the Russian Revolution. Russia, 1918: With the execution of Tsar Nicholas, the empire crumbles and Russia is on the edge of civil war—the poor are devouring the rich. Anna, a bourgeois girl, narrowly escaped the massacre of her entire family in Yekaterinburg. Desperate to get away from the Bolsheviks, she offers a peasant girl a diamond to take her as far south as possible—not realizing that the girl is a communist herself. With her brother in desperate need of a doctor, Evgenia accepts Anna's offer and suddenly finds herself on the wrong side of the war. Anna is being hunted by the Bolsheviks, and now—regardless of her loyalties—Evgenia is too. *Daughters of a Dead Empire* is a harrowing historical thriller about dangerous ideals, inequality, and the price we pay for change. An imaginative retelling of the Anastasia story. A Junior Library Guild Selection

Eureka Gavin Weightman,2015-01-01 While the discoveries of scientists have provided vital knowledge which has made innovation possible, it is more often than not the amateur who enjoys the eureka moment when an invention works for the first time. Weightman tells fascinating stories of struggle, rivalry, and the ingenuity of both famous inventors and hundreds of forgotten people, and offers a fresh take on the making of our modern world.

Eureka: Substitution Method Cris Ramsay,2010-08-31 View our feature on Chris Ramsay's *Eureka: Substitution Method* Welcome to Eureka. Population: BRILLIANT It's a town of geniuses—and now it's the smartest series going. Founded by Albert Einstein and Harry Truman after WWII, Eureka is home to the greatest minds in science and technology. But the creations of these eccentric geniuses threaten to destroy the world as often as they save it. Jack Carter is the everyman sheriff who must use his common sense and unique street smarts to keep a lid on this Pandora's Box of a town. Especially now, when Eureka's people, cars, and buildings are being swapped with people, cars and buildings from other places. View the SyFy TV trailer

Eureka Jim Lehrer,2009-03-24 BONUS: This edition contains an excerpt from Jim Lehrer's

Tension City. Ever reliable and responsible, Otis Halstead is a father, a husband (one half of a “well-dressed couple of substance”), and the CEO of Kansas Central Fire and Casualty. He has never done anything out of the ordinary. Until now. The change in Otis starts with an antique toy fire truck, the exact model he had pined for at age ten but never received. Though it is now a collectible costing \$12,350, he will buy it—because he can. Next comes a Daisy Red Ryder BB gun, ordered from the Nostalgia Today catalog. A Kansas City Chiefs regulation NFL helmet follows. But Otis’s real coup is the purchase of his one true childhood passion: a red 1952 Cushman Pacemaker motor scooter. For his baffled wife, Sally, this is the final straw. She insists that he see a shrink— a sloppy man with flowing hair who uses terms like “mature men in crisis” and “second childhood syndrome.” Otis is unimpressed—and extremely insulted—by the doctor’s insinuation that his baldness is to blame for his sudden interest in toys. But it’s not until tragedy strikes uncomfortably close to home that Otis decides he wants out of his sensible, safe life in Eureka, Kansas. And so, a few weeks before his sixtieth birthday, Otis leaves town, heading west on old U.S. 56, a corporate CEO wearing a football helmet, riding a forty-year-old motor scooter, and with a BB gun strapped to the side. One might say he was in for an adventure. Otis would say he was finally about to experience life. Jim Lehrer has created an acute, laugh-out-loud, and endearing portrait of American middle age. With abundant wit and a sharp sense of the lives most of us lead, Eureka takes us on a journey through the unfulfilled dreams of childhood. In Otis Halstead, Lehrer has created his most brilliant and winning character to date.

Driving Eureka! Doug Hall, 2018-11-13 Transform the art of innovation into a reliable system! System Driven Innovation enables you and everyone on your team to use innovation to work smarter, faster, and more creatively. It transforms innovation from a random act to a reliable science. This new mindset ignites confidence in the future. It enables the creation of bigger and bolder ideas—and turns them into reality faster, smarter, and more successfully. With this new mindset, innovation by everyone, everywhere, every day becomes the norm. The rapidly changing world becomes a tremendous opportunity to achieve greatness. Innovation Engineering defines innovation in two words: Meaningfully Unique. When a product, service, or job candidate is Meaningfully Unique customers are willing to pay more money for it. This links to the two simple truths in today’s marketplace: If you’re Meaningfully Unique life is great! If you’re NOT Meaningfully Unique you’d better be cheap. Innovation Engineering is a new field of academic study and leadership science. It teaches how to apply the science of system thinking to strategy, innovation, and cooperation. Research finds that it helps to increase innovation speed (up to 6x) and decrease risk (by 30 to 80%). Innovation Engineering

accelerates the creation and development of more profitable products and services. However, the bigger benefit may well lie in its ability to transform organizational cultures by enabling everyone to work smarter every day. What makes Innovation Engineering unique is that it's grounded in data, backed by academic theory, and validated in real-world practice. Collectively, it's the number one documented innovation system on earth. Over 35,000 people have been educated in Innovation Engineering classes, and more than \$15 billion in innovations are in active development. In his book *Driving Eureka!*, best-selling business author Doug Hall presents the System Driven Innovation scientific method for enabling innovation by everyone, everywhere, every day. It's the essential resource you need to enable yourself—and your team—to innovate, succeed, and do amazing things that matter, on a daily basis.

Eureka: Brain Box Blues Cris Ramsay, 2010-11-30 Even the brightest of Eureka's residents can't read someone else's mind. Then Global Dynamics develops the Brain Box: a device capable of capturing and storing human thoughts. When the Box starts messing with people's minds, Sheriff Jack Carter will have to keep his thoughts to himself if he's going to save the town from going out of their heads.

Eureka Chad Orzel, 2014-12-09 When it comes to science, too often people say I just don't have the brains for it -- and leave it at that. Why is science so intimidating, and why do people let themselves feel this way? What makes one person a scientist and another disinclined even to learn how to read graphs? The idea that scientists are people who wear lab coats and are somehow smarter than the rest of us is a common, yet dangerous, misconception that puts science on an intimidating pedestal. How did science become so divorced from everyday experience? In *Eureka*, science popularizer Chad Orzel argues that even the people who are most forthright about hating science are doing science, often without even knowing it. Orzel shows that science is central to the human experience: every human can think like a scientist, and regularly does so in the course of everyday activities. The common misconception is that science is a body of (boring, abstract, often mathematical) facts. In truth, science is a process: Looking at the world, Thinking about what makes it work, Testing your mental model by comparing it to reality, and Telling others about your results -- all things that people do daily. By revealing the connection between the everyday activities that people do -- solving crossword puzzles, playing sports, or even watching mystery shows on television -- and the processes used to make great scientific discoveries, *Eureka* shows that this process is one everybody

uses regularly, and something that anyone can do.

The Lost Girls: A Vampire Revenge Story Sonia Hartl, 2021-09-14 Getting over Your Vampire Ex is as Easy as Killing Him and Stealing His Girlfriend Holly Liddell has been stuck with crimped hair since 1987 when she agreed to let her boyfriend, Elton, turn her into a vampire. But when he ditches her at a gas station a few decades into their eternity together, she realizes that being young forever actually means working graveyard shifts at Taco Bell, sleeping in seedy motels, and being supernaturally compelled to follow your ex from town to town—at least until Holly meets Elton's other exes. It seems that Holly isn't the only girl Elton seduced into this wretched existence. He turned Ida in 1921, then Rose in 1954, and he abandoned them both before Holly was even born. Now Rose and Ida want to kill him before he can trick another girl into eternal adolescence, and they'll need Holly's help to do it. And once Holly starts falling for Elton's vulnerable new conquest, Parker, she'll do anything to save her. To kill Elton for good, Holly and her friends will have to dig up their pasts, rob a bank, and reconcile with the people they've hurt in their search for eternal love. And to win the girl, Holly will have to convince Parker that she's more than just Elton's crazy ex—even though she is trying to kill him.

The Eureka Factor John Kounios, Mark Beeman, 2015-04-14 In a book perfect for readers of Charles Duhigg's *The Power of Habit*, David Eagleman's *Incognito*, and Leonard Mlodinow's *Subliminal*, the cognitive neuroscientists who discovered how the brain has aha moments—sudden creative insights—explain how they happen, when we need them, and how we can have more of them to enrich our lives and empower personal and professional success. Eureka or aha moments are sudden realizations that expand our understanding of the world and ourselves, conferring both personal growth and practical advantage. Such creative insights, as psychological scientists call them, were what conveyed an important discovery in the science of genetics to Nobel laureate Barbara McClintock, the melody of a Beatles ballad to Paul McCartney, and an understanding of the cause of human suffering to the Buddha. But these moments of clarity are not given only to the famous. Anyone can have them. In *The Eureka Factor*, John Kounios and Mark Beeman explain how insights arise and what the scientific research says about stimulating more of them. They discuss how various conditions affect the likelihood of your having an insight, when insight is helpful and when deliberate methodical thought is better suited to a task, what the relationship is between insight and intuition, and how the brain's right hemisphere contributes to creative thought. Written in a lively, engaging style, this book goes beyond scientific principles to offer productive techniques for realizing your creative potential—at

home and at work. The authors provide compelling anecdotes to illustrate how eureka experiences can be a key factor in your life. Attend a dinner party with Christopher Columbus to learn why we need insights. Go to a baseball game with the director of a classic Disney Pixar movie to learn about one important type of aha moment. Observe the behind-the-scenes arrangements for an Elvis Presley concert to learn why the timing of insights is crucial. Accessible and compelling, *The Eureka Factor* is a fascinating look at the human brain and its seemingly infinite capacity to surprise us. Praise for *The Eureka Factor* “Delicious . . . In *The Eureka Factor*, neuroscientists John Kounios and Mark Beeman give many other examples of [a] kind of lightning bolt of insight, but back this up with the latest brain-imaging research.”—*Newsweek* “An incredible accomplishment . . . [*The Eureka Factor*] is not just a chronicle of the journey that numerous scientists (including the authors) have taken to examine insight but is also a fascinating guide to how advances in science are made in general. Messrs. Kounios and Beeman examine how a parade of clever experiments can be designed to answer specific questions and rule out alternative possibilities. . . . Wonderful ideas appear as if out of nowhere—and we are delighted.”—*The Wall Street Journal* “An excellent title for those interested in neuroscience or creativity . . . The writing is engaging and readable, mixing stories of famous perceptions with explanations of how such revelations happen.”—*Library Journal* (starred review) “A lively and accessible ‘brain’ book with wide appeal.”—*Booklist* “[An] ingenious, thoughtful update on how the mind works.”—*Kirkus Reviews* “*The Eureka Factor* presents a fascinating and illuminating account of the creative process and how to foster it.”—James J. Heckman, Nobel laureate in economics

Eureka, 1887–1937 Eureka, S.D. Golden jubilee organization, 1937

Eureka Scott H. Brown, 2013 Tucked away behind the redwood curtain on the northwestern coast of California lies the historic city of Eureka. The location of the city directly alongside Humboldt Bay combined with the abundance of redwood attracted miners, loggers, and fishermen, and the city grew and prospered quickly. Using a comparison of historic images gathered from several historical archives matched with current photographs taken by the author, this book shows Eureka's transformation from a wild logging and fishing town into the modern city it has become today.

Eureka! Mike Goldsmith, 2016-06-07 “Amazing, revolutionary, death-defying, and even disgusting are just some of the ways to describe the 19 scientific discoveries presented here.” —Booklist “Kids are introduced to the glorious history of scientific discovery. Well-written and inspiring.” —Smart Books for Smart Kids *Eureka!* tells the stories of the most revolutionary scientific discoveries throughout history. Through a fusion of history and popular science, readers are introduced to the contributions made by scientists such as Galileo, Louis Pasteur, and Marie Curie, and the passion and inspiration that fueled their discoveries. The book is divided into key subject areas, including medicine, the human body, atoms and molecules, planet Earth, and the universe. Read the gripping real-life experiences of scientists who often risked injury and sometimes even their lives to change the way we think. Each thrilling “Eureka!” moment is brought vividly to life with fascinating details of experiments and equipment and stories of the scientists’ terrible blunders and lucky mistakes. This book brings the excitement of scientific exploration vividly to life for young readers who are increasingly encouraged to pursue professions in the sciences.

Eureka Street Robert McLiam Wilson, 1997 Romantic Ireland is definitely dead and gone. With the exhilarating *Eureka Street*, Robert McLiam Wilson cheerfully and obscenely sends it to its grave. Jake Jackson, his thoughtful anti-hero, finds Belfast's tragedies are built on comedy: Catholics and

Protestants so intent on declaring their differences resembled no one now as much as they resembled each other.... That was what I liked about Belfast hatred. It was a lumbering hatred that could survive completely on the memories of things that never existed in the first place. He spends a certain amount of time worrying about seeming too Catholic and an equal amount worrying about not seeming sufficiently Catholic. Sometimes, after several drinks, Jake forgets that he's not a Protestant. Each position is as dangerous, and absurd, as the other. His best friend is less torn up. Chuckie Lurgan is a chubby Methodist whose only accomplishments so far have been shaking Reagan's hand, appearing in the same photo as the Pope, and having an intense and troubling relationship with mail-order catalogues. But Chuckie suddenly surprises Jake with his first entrepreneurial scheme. Though he's placed an ad for an enormous sex toy in Northern Ireland's only mucky paper, he hasn't any intention of ever fulfilling an order. Instead, he follows legal protocol and sends each disappointed customer a refund check, in the proper amount, stamped GIANT DILDO REFUND. The gamble is that most people will be too embarrassed to cash them. Chuckie smiled the smile of the just-published poet. And soon he has more than 40,000 pounds in the bank and a lust for big money. He also has a rich, new girlfriend: He hoped his dreams wouldn't suffer from all this reality. Jake is more preoccupied with the day-to-day. His construction site job gives him ample opportunity to consider his romantic failures and the ever-present symbols of war. There's also a new graffito that has sprouted among the various deadly acronyms. IRA, UVF, and UDA make no more sense than OTG, but at least everyone knows what they stand for. OTG becomes a puzzle to all of Belfast--is it, the authorities wonder, a new terrorist group? (Jake also notes several other phrases, FTP, FTQ, and FTNP--the T stands for the and P and Q for Pope and Queen. The N is for Next.) Despite his love for Belfast, Jake loses heart with its zealots and fanatics and, halfway through, Eureka Street threatens to slide into windy bathos. It's only a momentary lapse amid energetic, colloquial poetry and comic realism.
