The Political Mind George Lakoff,2008 A New York Times best-selling author explains how the physical nature of the brain affects people's political decisions, suggesting that changing one's mind is just as much a physical process as it is a psychological function. By the author of *Don't Think of an Elephant!* 60,000 first printing.

Spying Blind Amy B. Zegart,2009-02-17 In this pathbreaking book, Amy Zegart provides the first scholarly examination of the intelligence failures that preceded September 11. Until now, those failures have been attributed largely to individual mistakes. But Zegart shows how and why the intelligence system itself left us vulnerable. Zegart argues that after the Cold War ended, the CIA and FBI failed to adapt to the rise of terrorism. She makes the case by conducting painstaking analysis of more than three hundred intelligence reform recommendations and tracing the history of CIA and FBI counterterrorism efforts from 1991 to 2001, drawing extensively from declassified government documents and interviews with more than seventy high-ranking government officials. She finds that political leaders were well aware of the emerging terrorist danger and the urgent need for intelligence reform, but failed to achieve the changes they sought. The same forces that have stymied intelligence reform for decades are to blame: resistance inside U.S. intelligence agencies, the rational interests of politicians and career bureaucrats, and core aspects of our democracy such as the fragmented structure of the federal government. Ultimately failures of adaptation led to failures of performance. Zegart reveals how longstanding organizational weaknesses left unaddressed during the 1990s prevented the CIA and FBI from capitalizing on twenty-three opportunities to disrupt the September 11 plot. *Spying Blind* is a sobering account of why two of America's most important intelligence agencies failed to adjust to new threats after the Cold War, and why they are unlikely to adapt in the future.

The Fall of the US Empire and Then What? Johan Galtung,2009

Knowledge Goes Pop Clare Birchall,2006-09-05 A voice on late night radio tells you that a fast food restaurant injects its food with drugs that make men impotent. A colleague asks if you think the FBI was in on 9/11. An alien abductee on the Internet claims extra-terrestrials have planted a microchip in her body. Julia Roberts in *Porn Scandal* shouts the front page of a gossip mag. A spiritual healer claims he can cure chronic fatigue syndrome with the energizing power of crystals . . . What do you believe? *Knowledge Goes Pop* examines the popular knowledges that saturate our everyday

experience. We make this information and then it shapes the way we see the world. How valid is it when compared to official knowledge and why does such (mis)information cause so much institutional anxiety? This book examines the range of knowledge, from conspiracy theory to plain gossip, and its role and impact in our culture.

The Worldwide Flood Michael Jaye, 2017-06-06 Two hundred years ago, geologists determined that there was never a worldwide flood. But the early geologists' conclusion—which continues to be believed today—is indisputably erroneous, according to Michael Jaye, Ph.D. Told in easily understood language, Jaye explains how geologists got it so wrong, and more importantly, he challenges their modern-day peers to examine foundational beliefs, especially in the presence of new map data. Along the way, he identifies and rectifies geology's historic error and its consequences, answering questions such as: • Why do geologists believe that there was never a worldwide flood? How is this belief erroneous? • How did submerged structures like Monterey Canyon form? What process do geologists ascribe to their formation? • In what way are Google Earth and Google Maps similar to Galileo's telescope? With new map data revealing submerged rivers in more than two miles of water, it's clear that such a volume could only have a cosmic source. Jaye identifies the impact remnants, and he explains how its effects irreversibly changed Earth's ecosystem. Humans are among surviving species, but we find ourselves ill-adapted to the post-flood ecosystem. Discover a historical, scientific, and philosophical treatment of The Worldwide Flood—it will forever change the way you consider Earth and human history.

Zetetic Astronomy Parallax, 2011-06-27 Samuel Birley Rowbotham, under the pseudonym 'Parallax', lectured for two decades up and down Britain promoting his unique flat earth theory. This book, in which he lays out his world system, went through three editions, starting with a 16 page pamphlet published in 1849 and a second edition of 221 pages published in 1865. The third edition of 1881 (which had inflated to 430 pages) was used as the basis of this e-text. Rowbotham was an accomplished debater who reputedly steamrollered all opponents, and his followers, who included many well-educated people, were equally tenacious. One of them, John Hampden, got involved in a bet with the famous naturalist Alfred Russel Wallace about the flat earth. An experiment which Hampden proposed didn't resolve the issue, and the two ended up in court in 1876. The judge ruled against Hampton, who started a long campaign of legal harassment of Wallace. Rowbotham hints at the incident in this book. Rowbotham believed that the earth is flat. The continents float on an infinite ocean which somehow has a layer of fire underneath it. The lands we know are surrounded by an infinite wilderness of ice and snow, beyond the Antarctic ocean, bordered by an immense circular ice-cliff. What we call the North Pole is in the center of the earth. The polar projection of the flat earth creates obvious discrepancies with known geography, particularly the farther south you go. Figure 54 inadvertently illustrates this problem. The Zetetic map has a severely squashed South America and Africa, and Australia and New Zealand in the middle of the Pacific. I think that by the 19th century people would have noticed if Australia and Africa were thousands of miles further apart than expected, let alone if Africa was wider than it was long! The Zetetic Sun, moon, planets and stars are all only a few hundred miles above the surface of the earth. The sun orbits the north pole once a day at a constant altitude. The moon is both self-illuminated and semi-transparent. Eclipses can be explained by some unknown object occulting the sun or moon. Zetetic cosmology is 'faith-based', based, that is, on a literal interpretation of selected Biblical quotes. Hell is exactly as advertised, directly below us. Heaven is not a state of mind, it is a real place, somewhere above us. He uses Ussherian Biblical chronology to mock the concept that stars could be millions of light years away. He attacks the concept of a plurality of worlds because no other world than this one is mentioned in the Bible. Rowbotham never adequately explains his alternative astronomy. If the Copernican theory so adequately explains planetary motions, why discard it, and what would he use in its place? What is the sun orbiting around once a day and how does it work like a spotlight, not a 'point source'? If the moon is self-luminous, what creates its phases? If gravity appears to work here on earth, why doesn't it apply to the celestial objects just a few hundred miles up? To make his system work he had to throw out a great deal of science, including the scientific method itself, using

instead what he calls a 'Zetetic' method. As far as I can see this is simply a license to employ circular reasoning (e.g., the earth is flat, hence we can see distant lighthouses, hence the earth is flat). Zetetic Astronomy is a key work of flat-earth thought, just as Donnelly's Atlantis, the Antediluvian World is still considered required reading on the subject of Atlantis. If you ever have to debate the flat earth pro or con, this book is a complete agenda of each point that you'll have to argue.

Wedge Mark Riebling,2010-06-15 Prophetic when first published, even more relevant now, *Wedge* is the classic, definitive story of the secret war America has waged against itself. Based on scores of interviews with former spies and thousands of declassified documents, *Wedge* reveals and re-creates -- battle by battle, bungle by bungle -- the epic clash that has made America uniquely vulnerable to its enemies. For more than six decades, the opposed and overlapping missions of the FBI and CIA -- and the rival personalities of cops and spies -- have caused fistfights and turf tangles, breakdowns and cover-ups, public scandals and tragic deaths. A grand panorama of dramatic episodes, peopled by picaresque secret agents from Ian Fleming to Oliver North, *Wedge* is both a journey and a warning. From Pearl Harbor, McCarthyism, and the plots to kill Castro through the JFK assassination, Watergate, and Iran Contra down to the Aldrich Ames affair, Robert Hanssen's treachery, and the hunt for Al Qaeda -- *Wedge* shows the price America has paid for its failure to resolve the conflict between law enforcement and intelligence. Gripping and authoritative -- and updated with an important new epilogue, carrying the action through to September 11, 2001 -- *Wedge* is the only book about the schism that has informed nearly every major blunder in American espionage.

The Nurture Assumption Judith Rich Harris,1999 Harris takes on the experts and boldly questions conventional wisdom of parents' role in their children's lives, asserting that it's not the home environment that shapes children, but the environment they share with their peers.

1900; or, The last President Ingersoll Lockwood,2022-06-03 Lockwood's novel of political satire describes political tug war. It showcases the concepts of a President who won by a narrow margin. It reflects the American society which is under siege by socialists and anarchy. The common people are ignored by politicians and ripped off by Wall Street.

Global Investment Competitiveness Report 2019/2020 World Bank Group,2020-07-06 The Global Investment Competitiveness Report 2019-2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around 3 ICs - they provide guidance to governments on how to increase investments' contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor

confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.

Guns, Germs and Steel Jared Diamond, 2013-07-04 ****WINNER OF THE PULITZER PRIZE**** 'A book of big questions, and big answers' Yuval Noah Harari, bestselling author of *Sapiens* Why has human history unfolded so differently across the globe? And what can it teach us about our current crisis? Jared Diamond puts the case that geography and biogeography, not race, moulded the contrasting fates of Europeans, Asians, Native Americans, sub-Saharan Africans, and aboriginal Australians. An ambitious synthesis of history, biology, ecology and linguistics, *Guns, Germs and Steel* is a ground-breaking and humane work of popular science that can provide expert insight into our modern world. 'The most absorbing account on offer of the emergence of a world divided between have and have-nots...
