The Eye: A Very Short Introduction Michael F.

Land, 2014-05-29 The eye is one of the most remarkable achievements of evolution, and has evolved up to 40 times in different parts of the animal kingdom. In humans, vision is the most important sense, and much of the brain is given over to the processing of visual information. In this Very Short Introduction, Michael Land describes the evolution of vision and the variety of eyes found in both humans and animals. He explores the evolution of colour vision in primates and the workings of the human eye, to consider how that contributes to our visual ability. He explains how we see in three dimensions and the basic principles of visual perception, including our impressive capacity for pattern recognition and the ability of vision to guide action. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Advances in Vision Research, Volume II Gyan

Prakash, Takeshi Iwata, 2018-11-03 This second volume continues with a focus on the state of the art in genetic eye research in Asia and the Pacific. Though there has been an explosion of information on genetic eye research in western countries, more than sixty percent of the human genes involved in eye diseases in the Asian and Pacific population remain unknown. However, new efforts and a new awareness have sparked important discussions on the subject, and new plans are being implemented to discover the genes responsible for many eye diseases in the population.

The book reviews the latest findings; its content ranges from genetic aspects of human migration to DNA sequence analysis, genome-wide association analysis, and disease phenotypes. The efforts of the Asian Eye Genetic Consortium (AEGC) are also discussed. The book's editors have been instrumental in developing strategies for discovering the new Asian genes involved in many eye diseases. All chapters were written by leading researchers working on Asian eye genetics from the fields of Human Genetics, Ophthalmology, Molecular Biology, Biochemistry, Sensory Sciences, and Clinical Research. *Advances in Vision Research, Volume II* will prove to be a major resource for all researchers, clinicians, clinical researchers, and allied eye health professionals with an interest in eye diseases among the Asian population.

Vision Research - a National Plan: 1978-1982 National Advisory Eye Council (U.S.), 1978

An Eye for an Eye Annotated Anthony Trollope, 2020-12-05 *An Eye for an Eye* is a novel by Anthony Trollope written between 13 September and 10 October 1870, but held back from publication until August 1878 when serialization began in the *Whitehall Review*. Publication in the form of a two volume novel was timed to coincide with the issue of the final serialized episodes in January 1879.

Cornea and External Eye Disease Thomas Reinhard, Frank Larkin, D. F. P. Larkin, 2006 *Essentials in Ophthalmology* is a new review series covering all of ophthalmology categorized in eight subspecialties. It will be published quarterly, thus each subspecialty will be reviewed biannually. Given the multiplicity of medical publications already available, why is a new series needed? Consider that the half-life of medical knowledge is estimated to be around 5 years. Moreover, it can be as long as 8 years between the first description of a medical innovation in a peer-reviewed scientific journal and publication in a medical textbook. A series that narrows this time span between journal

and textbook would provide a more rapid and efficient transfer of medical knowledge into clinical practice, and enhance care of our patients.

Eye Guidance in Natural Scenes Benjamin W.

Tatler, 2018-04-30 Successfully completing many forms of behaviour requires that humans look in the right place at the right time: This has generated a large volume of research aimed at understanding how the eyes are guided. This special issue demonstrates that the decision about where to look involves a large number of factors from low- to high-level constraints. New models of eye guidance are presented, and these offer converging approaches to understanding how we inspect complex scenes. Importantly, this special issue brings together evidence from a

range of settings - from static scene viewing to real world environments - in order to fully assess our current understanding of eye guidance in natural scenes.

Blue Eyes, Brown Eyes Stephen G. Bloom, 2021-10-05 The never-before-told true story of Jane Elliott and the “Blue-Eyes, Brown-Eyes Experiment” she made world-famous, using eye color to simulate racism. The day after Martin Luther King, Jr.’s assassination in 1968, Jane Elliott, a schoolteacher in rural Iowa, introduced to her all-white third-grade class a shocking experiment to demonstrate the scorching impact of racism. Elliott separated students into two groups. She instructed the brown-eyed children to heckle and berate the blue-eyed students, even to start fights with them. Without telling the children the experiment’s purpose, Elliott demonstrated how easy it was to create abhorrent racist behavior based on students’ eye color, not skin color. As a result, Elliott would go on to appear on Johnny Carson’s Tonight Show, followed by a stormy White House conference, The Oprah Winfrey Show, and thousands of media events and diversity-training sessions worldwide, during which she employed the provocative experiment to induce racism. Was the experiment benign? Or was it a cruel, self-serving exercise in sadism? Did it work? *Blue Eyes, Brown Eyes* is a meticulously researched book that details for the first time Jane Elliott’s jagged rise to stardom. It is an unflinching assessment of the incendiary experiment forever associated with Elliott, even though she was not the first to try it out. *Blue Eyes, Brown Eyes* offers an intimate portrait of the insular community where Elliott grew up and conducted the experiment on the town’s children for more than a decade. The searing story is a cautionary tale that examines power and privilege in and out of the classroom. It also documents small-town White America’s reflex reaction to the Civil Rights Movement of the 1970s and 1980s, as well as the subsequent meteoric rise of diversity training that flourishes today. All the while, *Blue Eyes, Brown Eyes* reveals the struggles that tormented a determined and righteous woman, today referred to as the “Mother of Diversity Training,” who was driven against all odds to succeed.

Waking Up Blind: Lawsuits Over Eye Surgery MD Mba

Harbin, 2017-08 Imagine trusting a doctor - with the best reputation for treating eye disease in the state - to do surgery on your eyes. Now imagine the worst outcomes. Blindness in an eye that you learn, in fact, never needed surgery. And the medical center where you were treated is ignoring the problem. This is the story of how an eye surgeon - respected, admired, and lauded with the highest praise - became the cause of an array of medical problems for his patients. It is also the story of how one of the nation's premier medical centers tried to conceal the growing scandal. The faculty who exposed the problems were punished. Official committees and the university leaders minimized the misconduct. Slowly, lawsuits and publicity brought some to light in bits and pieces. Now the whole story is being told. With the use of court documents, transcripts of tape-recorded conversations, interviews, and personal observation, Dr. Tom Harbin presents this case from the very beginning, uncovering all levels of wrongdoing and secrecy. *Walking Up Blind* will shock the reader with its candid exploration of the dark side of medicine

More Than Meets the Eye Georgina Kleege, 2018 In *More Than Meets the Eye*, Georgina Kleege explores the ways that ideas about visual art and blindness are linked in many facets of the culture. While it may seem paradoxical to link blindness to visual art, western theories about art have always been haunted by the specter of blindness. The ideal art viewer is typically represented as possessing perfect vision, an encyclopedic knowledge of art, and a photographic memory of images, all which allow for an unmediated wordless communion with the work of art. This ideal viewer is defined in polar opposition to a blind person, presumed to be oblivious to the power of art, and without the cognitive capacity to draw on analogous experience. Kleege begins her study with four chapters about traditional representations of blindness, arguing that traditional theories of blindness fail to take into account the presence of other senses,

or the ability of blind people to draw analogies from non-visual experience to develop concepts about visual phenomena. She then shifts focus from the tactile to the verbal, beginning with Denis Diderot's remarkable range of techniques to describe art works for readers who were not present to view them for themselves, and how his criticism offers a powerful warrant for bringing the specter of blindness out of the shadows and into the foreground of visual experience. Through both personal experience and scholarly treatment, Kleege dismantles the traditional denigration of blindness, contesting the notion that viewing art involves sight alone and challenging traditional understandings of blindness through close reading of scientific case studies and literary depictions. *More Than Meets the Eye* introduces blind and visually impaired artists whose work has shattered stereotypes and opened up new aesthetic possibilities for everyone.

An Eye for an Eye Anthony Trollope, 2020-02-06 Some years ago, it matters not how many, the old Earl of Scroope lived at Scroope Manor in Dorsetshire. The house was an Elizabethan structure of some pretensions, but of no fame. It was not known to sight-seers, as are so many of the residences of our nobility and country gentlemen. No days in the week were appointed for visiting its glories, nor was the housekeeper supposed to have a good thing in perquisites from showing it. It was a large brick building facing on to the village street, -facing the village, if the hall-door of a house be the main characteristic of its face; but with a front on to its own grounds from which opened the windows of the chief apartments. The village of Scroope consisted of a straggling street a mile in length, with the church and parsonage at one end, and the Manor-house almost at the other. But the church stood within the park; and on that side of the street, for more than half its length, the high, gloomy wall of the Earl's domain stretched along in face of the publicans, bakers, grocers, two butchers, and retired private residents whose almost contiguous houses made Scroope itself seem to be more than a

village to strangers. Close to the Manor and again near to the church, some favoured few had been allowed to build houses and to cultivate small gardens taken, as it were, in notches out of the Manor grounds; but these tenements must have been built at a time in which landowners were very much less jealous than they are now of such encroachments from their humbler neighbours
