**Das Ezechielbuch als Trauma-Literatur** Ruth Poser, 2012-04-03 The study investigates the book of Ezekiel as literature of survival. Based upon a multi-faceted trauma hermeneutics the peculiarities as well as the inconsistencies of the book are shown to be material aspects of a fictionalised trauma process in the context of Israel's siege warfare and mass deportation experiences in the early 6th century b.c.e. Die vorliegende Studie analysiert das Ezechielbuch als fiktionale Überlebensliteratur. Über eine mehrdimensionale Trauma-Hermeneutik macht sie dessen Befremdlichkeiten und vermeindliche Inkohärenzen als wesentliche Momente der literarisch-theologischen Auseinandersetzung mit dem Gewaltpotential der Exilskatastrophe 587/86 v.u.Z. (be-)greifbar.

**Prophet und König im Nordreich Israel** Bernhard Lehnart, 2014-10-22 The present book deals with the so-called “pre-classical” prophecy in the Northern Kingdom of Israel. It becomes evident that the introduction of kingship in the early period of prophecy marks the beginning of a consideration of social situations. The prophet is placed over the king and stylized as the actual saviour figure. This development is examined along with the extensive prophetic traditions of Samuel, Elijah and Elisha. The texts are first analyzed from a diachronic standpoint to determine pre-deuteronomistic text components. These texts are then linked to their historical context and examined with respect to their medium and historicity. This book throws new light on the social and socio-structural importance of prophecy in this early period.

**Why believe in Bible Prophecy?** Larry Squyres, 2020-10-13 Have you ever

attended an end-times study or lecture and leave out having more questions than answers? Have you read parts of Daniel and Revelation and are totally clueless as to what it all means? I was once that person above. However, after attending a lecture several years ago, we were told repeatedly that we were to search deeper not only in the Bible but events in past history as well as today's events to find the truth. I'm sure we can all agree that we are living in end times, but where are we at, when did it start? are just some of the questions asked. I took each of the sections of the lecture and really started studying not only what he had talked about but looked further and deeper. What I have in this book explains the kingdoms and time lines with Old and New Testament prophecy. Both fulfilled and yet to happen. I looked back at the early church to see how they believed. The Catholic Church to see what was changed and why and at what Protestants differed in their beliefs. Did you know that the baptism of Jesus was prophesied in Daniel and it happened right on time? There are many clues as to who and what the antichrist is, and it leaves no question. Even the early Protestant ministers knew what a lot of churches today have forgotten. So, dive in and read the information that I have researched and written about to help you understand and believe. And don't just believe me, search for the truth yourself.

The Idea of Retribution in the Book of Ezekiel Ka Leung Wong, 2001-07-12 The objective of the book is to examine the idea of retribution in the Book of Ezekiel. The book seeks to show that underlying Ezekiel are three principles

of retribution: covenant, the disposal of impurity, and poetic justice. That is to say, the consequence of an act is either governed by the terms of a covenant, or seen as the disposal of impurity produced by the act, or made to look like the act by incorporating some features of the act. The present study shows that retribution can be juridical in nature as in the case of the covenant, but it can also be non-juridical as in the cases of disposal of impurity and poetic justice. This study also provides an examination of these three important ideas seldom noted in detail in current literature on Ezekiel.

**Advanced Theories of Hypoid Gears** Xudong Wang, S.K. Ghosh, 2013-10-22 In order to develop more efficient types of gears, further investigation into the theories of engagement is necessary. Up until now most of the research work on the theories of engagement has been carried out separately on different groups, and based on individual types of profiles. This book aims at developing some universal theories, which can not only be used for all types of gears, but can also be utilized in other fields such as sculptured surfaces. The book has four characteristics: the investigations are concentrated on mismatched tooth surfaces; all the problems are dealt with from a differential geometry point of view; most theories and algorithms are universal in application; and the algorithms are easy to follow and can be used in real situations. In the process of developing the algorithms, the authors have introduced some mathematical methods which are believed to be innovative with regard to the theories of engagement known so far. A theoretical treatment is presented throughout the book, supported by numerical examples and experiments. With the computer programs listed at the end of the volume, any of the proposed methods can be easily utilized in practice. The book is intended for postgraduate students, lecturers, professors, or research staff in mechanical/manufacturing engineering, mathematics and R & D departments of research institutes and universities. It

will also be useful for engineers working in the gear manufacturing sector of industry.
