 [China’s Emergence as a Defense Technological Power](#) Tai Ming Cheung,2013-10-31 China is flexing its growing military and strategic clout in the pursuit of broadening national security interests. At the same time, the country’s economic and technology policies have also become more nationalistic, state-centered, and ambitious. China’s defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities, although this is presently in the form of incremental and sustaining types of activities. More high-end, disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China’s reach in the near-to medium term. This volume provides a wide-ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance. This collection of articles has three main goals: (1) to locate China’s defense innovation dynamics within broader historical, technological and methodological frameworks of analysis; (2) to assess the performance of the Chinese defense economy’s six principal subsectors; and (3) to compare China’s approach to defense industrialization with major counterparts in the Asia-Pacific region. This book was originally published as a special issue of the Journal of Strategic Studies.

 [Defenders of Japan](#) Garren Mulloy,2021-12-01 Japan’s post-war armed forces are a paradox, both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self-Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War, and their possible reconfiguration for Japan’s security needs ahead, Garren Mulloy offers insight into the forces’ past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the core of Japanese security, new partnerships and international overtures will also shape the forces’ place in Prime Minister Abe’s new vision of ‘proactive contributions to peace’. Defenders of Japan deconstructs how the JSDF have adapted and will continue to adapt within domestic norms, caught between unresolved legacies of Japan’s imperial past and a dynamically shifting balance of future global power.
