North American F-86 Sabre Duncan Curtis,2000 This remarkable jet aircraft was the most widely produced postwar American fighter, and it served with distinction as both a fighter and attack aircraft in Korea and a number of other skirmishes around the globe. Illustrated with more than 200 photos, this history fully charts the design, development, and service histories of all Sabre variants.

F-86 Sabre Aces of the 51st Fighter Wing Warren Thompson,2012-11-20 The 51st Fighter Wing initially flew the F-80C in the Korean War, but in 1951, the 51st brought in high-scoring World War 2 ace Colonel Francis Gabreski to assume command when it converted from the F-80 over to the newly arrived F-86E. His recruits included his elite 4th Wing pilots, and by the end of the war, the 51st had two pilots who achieved the status of “Double Ace” as well as the highest scoring ace of the war, Joe McConnell. This book describes the 51st Wing's tenure with the Sabre that led to their high scoring sprees of 1953.

F-86 Sabre vs MiG-15 Douglas C. Dildy,Warren Thompson,2013-05-20 As the routed North Korean People's Army (NKPA) withdrew into the mountainous reaches of their country and the People's Republic of China (PRC) funneled in its massive infantry formations in preparation for a momentous counter-offensive, both lacked adequate air power to challenge US and UN. Reluctantly, Josef Stalin agreed to provide the requisite air cover, introducing the superior swept-wing MiG-15 to counter the American's straight-wing F-80 jets. This in turn prompted the USAF to deploy its very best – the F-86A Sabre – to counter this threat. Thus began a two-and-a-half-year struggle in the skies known as “MiG Alley.” In this period, the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat. This meticulously researched study not only provides technical descriptions of the two types and their improved variants, complete with a “fighter pilot's assessment” of these aircraft, but also chronicles the entire scope of their aerial duel in “MiG Alley” by employing the recollections of the surviving combatants – including Russian, Chinese, and North Korean pilots – who participated.

F-86 Sabre Aces of the 4th Fighter Wing Warren Thompson,2013-02-20 The entry of the United State's premier jet interceptor into the Korean War was triggered by the ever-increasing presence of the Soviet-built MiG-15 south of the Yalu River. The possibility of the USAF losing air supremacy over the Korean Peninsula was unacceptable. The 4th Fighter Wing got the call for combat in Korea. They were made up of a combination of new pilots right out of jet training and the older combat veterans of World War II vintage. This combination of pilot types wrote and re-wrote the text books on jet warfare. Of the 40 jet aces that the war produced, the 4th Wing boasted 24 of them. This book details these incredible pilots and the planes they flew.

The Aircraft-Spotter's Film and Television Companion Simon D. Beck,2016-06-06 Ever wondered how many aircraft were converted into Japanese Zeroes and torpedo bombers for Tora! Tora! Tora! or how French Gazelle helicopters were modified for the title role in Blue Thunder? This first of its kind reference book lists aircraft featured in 350 films and television shows, providing brief individual histories, film locations, serial numbers and registrations. Aircraft are also cross-referenced by manufacturer. Appendices provide brief bios on pilots and technicians, information on aircraft collections owned by Tallmantz Aviation and Blue Max Aviation and film credits for U.S. aircraft carriers.

F-86 Sabre Pilot's Flight Operating Manual United States Air Force,2007-08-01 Built as both a fighter-interceptor and fighter-bomber, the F-86 Sabre (sometimes called the Sabrejet) was one of the most widely-produced fighters of the Cold War. In December of 1950, three squadrons of Sabres were rushed into combat in Korea, where they duelled North Korean, Chinese and Russian pilots flying the MiG-15. By the time the war was over, F-86 pilots achieved a stunning victory ratio - destroying nearly 800 enemy aircraft with a loss of only 76 Sabres. The nimble jet also saw combat in the Taiwan Strait Crisis and the Indo-Pakistan Wars of 1965 and 1971. Originally printed by North American and the U.S. Air Force, this F-86 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified Restricted, the manual was recently declassified and is here reprinted in book form. This facsimile has been reformatted and color images appear in black and white. Care has been taken to preserve the integrity of the text.

Sabres Over MiG Alley Kenneth P Werrell,2013-06-11 This is the story of the first jet versus jet war, the largest in number of victories and losses, and one of the few military bright spots in the Korean War. It tells how an outnumbered force of F-86 Sabres limited by range and restricted by the rules of engagement, decisively defeated its foe. Based on the latest scholarship, author Kenneth Werrell uses previously untapped sources and interviews with sixty former F-86 pilots to explore new aspects of the subject and shed light on controversies previously neglected. For example, he found much greater violation of the Yalu River than thus far has appeared in the published materials. The F-86 became a legend in The Forgotten War because of its performance and beauty, but most of all, because of its record in combat.

F-86 Sabre Martin Bowman,2005-04-09 With its distinctive wail the F-86 is remembered from the 1950s for its air superiority in the Korean War where it tangled with Russia's MiG-15 in the first jet versus jet combats. It

was the first experience of high-speed jet flight for the NATO air forces and it closed the gap with the previously superior Soviet jet fighters. The design borrowed heavily from WWII German high speed flight research but was truly a pilot's airplane.

American Attack Aircraft Since 1926 E.R. Johnson,2012-05-14 This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps, Army Air Forces, and Air Force, and the Navy and Marine Corps to accomplish air attack missions since 1926. The text covers four types of fixed-wing aircraft: designated attack aircraft; light, medium, and tactical bombers; fighter-bombers; and adapted attack aircraft. Reports on individual aircraft types include the aircraft's original military requirements, production history, and operational record, usually accompanied by photographs, illustrations, and technical specifications. Four appendices detail aircraft designations and nomenclature used throughout the military, the organizational structure of various military air units, aircraft designs that never made it into official service, and the evolution of attack aircraft weapons and tactics.

U.S. Marines in the Korean War Charles Richard Smith,2007 Contains the anthology of publications formerly compiled by the History and Museums Division during the 50th anniversary commemoration of the Korean Conflict, 1950-1953. Focus of the articles is to remember those Marines who fought and died in the forgotten war.

MiG Alley - Sabres Vs. Migs Over Korea Warren E. Thompson,David R. McLaren,2011-08-15 The dogfights between World War II prop fighters such as the P-51 Mustang, P-47 Thunderbolt, Me 109 and Japanese Zero have been well documented over the years. However, very little has been written about the dogfights between the state-of-the-art swept wing jets that fought high above northwest Korea in an arena known as 'MiG Alley'. These pitted the North American F-86 Sabre versus the MiG-15 and they were flown by some of the best fighter pilots in history. The speeds at which these two fought initiated many new tactics for aerial combat. Toward the end of the Korean War, it was determined that the F-86 pilots had been flying against some of the most experienced Russian and Warsaw Pact pilots from the very beginning. Many of the Sabre pilots that had numerous kills against the MiGs were young Lieutenants with no World War II experience. Official USAF records state that 78 Sabres were lost in air-to-air action and 792 MiG-15's were shot down in aerial duels. This established a 10:1 ratio in favor of the F-86, although that figure has remained a controversial subject for over 50 years. With the dangerous air-to-ground missions flown by the aging F-80's and F-84's, the success of the F-86 carried over into the fighter bomber role. In January 1953, the F-51 Mustang Wing and the F-80 Wing converted over to the new bomb-carrying F-86F. This added a new dimension in that the new Sabre could work the close air support and interdiction mission and still defend itself against the MiG-15 threat without escorts. By the end of the war, there were four wings, based in South Korea, equipped with the F-86. This book is filled with personal recollections from the pilots that flew the F-86 - many are so vivid that you feel you are in the cockpit with them. It also contains some of the finest quality color images ever published on the Sabre in combat; most were taken by the pilots and crew chiefs. In addition, there is an aircraft-by-aircraft record of every F-86 that flew during the war. This includes squadron assignment, Sabre losses, and final disposition. Also featured is a complete listing of confirmed kills by Sabres and a roster of Korean War aces. Apart from the eyewitness accounts, detailed Sabre information and superb photographs, 'MiG Alley' also features newly commissioned color artwork and color profiles. If you had to describe this book in only one word... it would be ACTION!
