How McGee and Associates Prevented War in Ukraine by Russian Invasion Carl Douglass,2023-03-01 *How McGee and Associates Prevented War in Ukraine by Russian Invasion* is a “what if? What would the world be like if Ukraine and the United States stopped Russia in its tracks with courage and determination before the Great Bear decimated Ukraine? What if President Sybil Norcroft-Daniels had said “No,” and meant it? What if she got every asset of the US and 47 other nations, McGee and his partners, and the best of the best special ops and cyber warriors involved before day one? What if she determined to bring down the Russian dictator who still-in his atrophied heart—was a shrewd and soulless communist apparatchik? The author can imagine such an outcome in vivid and gripping realism.

Star Depth George Duhart,2010-02 It is the year 2041, and the Earth's nations have finally joined together to establish a new governing society named The United Earth Administration, for which is built on unified cooperation within a governmental foundation based on peace and unity for its separate constituents on independent governing bodies around the world. Within this administration stands a distinguished and highly regarded naval officer who has served within its ranks for over 35 years in the United States Navy. His name is Admiral Wayne Cooper, and he has developed a new Naval agency called The Star Depth Navy that will help establish the prospects of the ongoing space program and their exploration into new heights of not only space travel, and its unique external exploration diversity, but to expand its internal knowledge of inner-planetary research, namely Planetary Oceans. But, while the agency progresses, along with Earth's unified space program, so do adversities of an unknown nature and unknown threat. Admiral Cooper, along with his handpicked staff that he has chosen, must confront this terrifying, and incredible threat that has introduced itself as a new and promising organization that will destroy the very fabric of mankind and its right to exist.

USMC Combat Hunter Training Introduction And Fundamentals: Profiling, Tactical Tracking, Observation Theory, Tactical Fundamentals, Planning And More ,2017-12-14 COMBAT HUNTER TRAINER COURSE

Purpose: The purpose of the Combat Hunter Trainer Course is to produce a Marine capable of training a more ethically minded, tactically cunning, and situational aware Marine capable of proactively identifying threats in any environment. **Scope:** The Combat Hunter Trainer Course enhances the safety and security of Marines across the range of military operations, whether in garrison, on liberty, or on the battlefield. Marines are trained to observe and recognize human behaviors, patterns and trends that are indicative of a threat and to act on that threat quickly and decisively through an improved and matured decision-making process. The Marine receives training in planning, conducting, and evaluating training events to include classes on small unit training and unit training management. Combat Hunter training includes Introduction to Combat Hunter, Observation Devices, Criminal and Insurgent Networks, Decision Cycle, Enhanced Observation, KIM Technique, Introduction to Profiling, Heuristics, Profiling Domains, Terrorist Planning Cycle, Tactical Questioning, Analyze and Interpret Spoor, Individual Actions in a Tracking Team, Track Exploitation, Leading a Tracking Team, and Tactical Site Exploitation. **DEFINITION AND MISSION OF THE COMBAT HUNTER.** A combat hunter selects, uses, and maximizes the appropriate optics available to see objects and events, both hidden and distant. These optics range from the naked eye to advanced optical systems. A combat hunter, through attention to detail, establishes a baseline of an environment and detects the anomalies located within that environment. A combat hunter tracks humans and vehicles by reading the natural terrain. He pursues an armed enemy and gathers data that may suggest the enemy's action and intent. The combat hunter is the creation of a mindset through the integration of enhanced observation, combat profiling, and combat tracking. This mindset will enable Marines to locate, close with, and destroy an elusive enemy that hides among the population and uses asymmetric tactics to attack our forces. By utilizing enhanced observation, combat profiling, and combat tracking, a Marine is more lethal, survivable, and tactically cunning. He becomes a force multiplier to his unit's operations. **OBSERVATION.** Observation begins with the gathering and processing of information obtained through the senses. The five sensory systems are sight, hearing, smell, touch, and taste that allow information to be collected from the environment. Perception is the process that the mind uses to organize the sensory information into an understandable interpretation of the

environment. Central to all these skills is a critically-thinking Marine whose decisions can be affected by numerous factors, both external and internal. The Marine refines his decision making capabilities by understanding the decision cycle process and his awareness of the physical and biological responses he goes through when faced with a dynamic situation. Refining these skills and understanding the effects they have on his mind and body make him more capable and more lethal.

Tactical Reality Louis Awerbuck, 2018-01-03 Louis Awerbuck was one of America's premier firearms trainers and instructors. He firmly believed that training and tactics are the most crucial elements in determining how people respond in a real fight. This book brings together a decade of articles by Awerbuck in S.W.A.T. and Soldier of Fortune magazines on subjects ranging from creative target systems and firearms marksmanship under stress to defensive survival of a deadly-force encounter. But above all the book is intended to promote thought on surviving a fight in an increasingly deteriorating society. Tactical Reality is not for the person who looks for trouble where he could have avoided it. It is not for the man who shuns cover and takes an unnecessary bullet. It is not for the squeamish or anyone who isn't prepared to fight to defend himself or his family. It is for everyone interested in finding out how to take a realistic approach to training so that, if need be, he can turn the tactical odds in a gunfight in his favor. This book proves that you are what you practice.

U.S. Army Reconnaissance, Security, and Tactical Enabling Tasks Field Manual FM Department of Defense, 2016-08-06 The 2013 printing. Field Manual (FM) 3-90-2 contributes to the Army and joint community by providing guidance on the conduct of reconnaissance, security, and other tactical enabling tasks. It provides guidance in the form of combat-tested tactics and procedures for tactical enabling tasks modified to exploit emerging Army and joint offensive and defensive capabilities. FM 3-90-2 expounds on the doctrinal fundamentals established in Army Doctrine Reference Publication (ADRP) 3-90. ADRP 3-90 and FM 3-90-1 must be read before reading FM 3-90-2, since that is where the doctrine and tactics for the conduct of offensive and defensive tasks and the art and science of tactics is found. FM 3-90-2 addresses the basic tactics associated with the conduct of tactical enabling tasks. The principal audience for FM 3-90-2 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as a joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will also use this publication.

A Guide to the Development of Special Weapons and Tactics Teams John A. Kolman, 1982 This text discusses the organization, manning, and training of a highly disciplined Special Weapons and Tactics (SWAT) team, outlines necessary equipment and weapons, and illustrates tactical procedures for hostage-taking and barricaded suspect incidents. A SWAT team should be organized only if the need and resources exist. Smaller departments can organize as-needed teams while larger departments may prefer full-time teams. Team members should include a commander, team leader, scout, backup, marksman, spotter, gasman, and paramedics. Because team members must be mentally stable, able to work well in teams, and in good physical shape, the guide advises screening applicants on the basis of years of duty, personality test scores, physical condition, and past performance. Background investigations should be conducted for applicants who pass these tests. Equipment needs, for individual members and the team as a whole, include rifles and sidearms, gas masks, grenades, knives, radios, lights, battering rams, and public address systems, as well as special uniforms and headgear. The team's logistical superiority depends on regular testing of equipment and training in its use. Training exercises should cover team movement, firearms and use of chemical agents, freeway and street procedures, rappelling (rope climbing/descending), team driving, and hostage-incident and barricade simulations. A suggested 1-week training program is presented.
