Ancient South Arabia through History George Hatke, Ronald Ruzicka, 2019-04-25 South Arabia, an area encompassing all of today's Yemen and neighboring regions in Saudi Arabia and Oman, is one of the least-known parts of the Near East. However, it is primarily due to its remoteness, coupled with the difficulty of access, that South Arabia remains under-researched, for this region was, in fact, very important during pre-Islamic times. By virtue of its location at the crossroads of caravan and maritime routes, pre-Islamic South Arabia linked the Near East with Africa and the Mediterranean with India. The region is also unique in that it has a written history extending as far back as the early first millennium BCE—a far longer history, indeed, than any other part of the Arabian Peninsula. The papers collected in this volume make a number of important contributions to the study of the history and languages of ancient South Arabia, as well as the history of the modern study of South Arabia's past, which will be of interest to scholars and laypeople alike.

Electrochemistry of Immobilized Particles and Droplets Fritz Scholz, Uwe Schröder, Rubin Gulaboski, 2005-01-17 Immobilizing particles or droplets on electrodes is a novel and most powerful technique for studying the electrochemical reactions of three-phase systems. It gives access to a wealth of information, ranging from quantitative and phase analysis to thermodynamic and kinetic data of electrode processes. Three-phase electrodes with immobilized droplets provide information on the electrochemistry of redox liquids and of compounds dissolved in inert organic liquids. Such measurements allow the determination of the Gibbs energies of the transfer of cations and anions between immiscible solvents, and thus make it possible to assess the hydrophobicity of ions – a property that is of great importance for pharmaceutical applications, biological studies,

and for many fields of chemistry. The monograph gives, for the first time, a comprehensive overview of the results published in more than 300 papers over the last 15 years. The experiments are explained in detail, applications from many different fields are presented, and the theoretical basis of the systems is outlined.

Making Public Services Management Critical

Graeme Currie, Jackie Ford, Nancy Harding, Mark Learmonth, 2010-02-02 This book brings together public services policy and public services management in a novel way that is likely to resonate with academics, policy makers and practitioners engaged in the organization of public services delivery as it is from a perspective that challenges many received ideas in this field. Starting from the perspective of critical management studies, the contributors to this volume embed a critical perspective on policy orthodoxy around critical public services policy and management studies (CPPMS). In so doing the authors bring together previous disparate fields of public services policy and public services management, but more importantly, debate and

present what 'critical' constitutes when applied to public services policy and management. This edited collection presents chapters from a broad range of public services domains including health, education, prisons, local and central government and deals with a range of contemporary issues facing public services managers are examined, including regulation of professions, risk management, user involvement, marketing and leadership.

Proceedings of I4SDG Workshop 2023 Victor Petuya, Giuseppe Quaglia, Tigran Parikyan, Giuseppe Carbone, 2023-05-18 This volume contains the proceedings of the 2nd IFToMM Workshop for Sustainable Development Goals - I4SDG 2023 held in Bilbao, Spain, on 22-23 June 2023. The workshop papers are focused on those aspects of the theory, design and applications of Mechanism and Machine Science that are fundamental for moving towards sustainable development. The main topics of the workshop are: sustainable energy systems, robotics and mechatronics, biomechanical and medical systems, education, linkages, gears, transmissions and actuators, engines and powertrains, tribology, transportation machinery, service systems for sustainability, humanitarian engineering and socio-technical systems for sustainable and inclusive development. The contributions, selected through a rigorous international peer-review process, highlight many exciting ideas that will drive new research directions and foster multidisciplinary collaboration between researchers from different backgrounds.

The nine lives of the stability pact Daniel Gros, 2004 This special report by the CEPS Macroeconomic Policy Group (MPG) is concerned with the implementation of the prohibition of excessive deficits contained in the Treaty of Maastricht via the Stability and Growth Pact. Specifically, it deals with the controversy that was provoked by

the failure of the ECOFIN Council of 25 November 2003, to endorse recommendations of the European Commission to put France and Germany on notice that they had violated the Treaty's prohibition of excessive deficits--CEPS website.

Shape Memory Alloy Engineering Antonio Concilio, Vincenza Antonucci, Ferdinando Auricchio, Leonardo Lecce, Elio Sacco, 2021-01-13
Shape Memory Alloy Engineering: For Aerospace, Structural and Biomedical Applications, Second Edition embraces new advancements in materials, systems and applications introduced since the first edition. Readers will gain an understanding of the intrinsic properties of SMAs and their characteristic state diagrams. Sections address modeling and design process aspects, explore recent applications, and discuss research activities aimed at making new devices for innovative implementations. The book discusses both the potential of these fascinating materials, their limitations in everyday life, and tactics on how to overcome some limitations in order to achieve proper design of useful SMA mechanisms. Provides a greatly expanded scope, looking at new applications of SMA devices and current research activities. Covers all aspects of SMA technology - from a global state-of-the-art survey, to the classification of existing materials, basic material design, material manufacture, and from device engineering design to implementation within actual systems. Presents the material within a
