Douglas F3D Skyknight José Fernandez, Przemysław Skulski, 2014

The F3D was designed as a carrier-based all-weather fighter aircraft. It saw service with the United States Navy and United States Marine Corps. While it never achieved the fame of the F-86 Sabre or other contemporary aircraft, it downed several MiG-15s as a night fighter over Korea with only one air-to-air loss. It also served as an electronic warfare platform in the Vietnam War. The design, development and operations of these aircraft are described in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated with full color profiles. Scale plans in 1/72nd and 1/48th.

F3D/EF-10 Skyknight Units of the Korean and Vietnam Wars Joe

Copalman, 2022-01-20 The Douglas F3D Skyknight was an early but effective attempt at combining new technologies together in a lethal package capable of shipboard operation. Whereas most fighters relied on speed and maneuverability, the portly, straight-winged F3D relied on three radars, four 20mm cannon, and – most importantly – darkness. Having first flown in March 1948, the Skyknight's first taste of war came in September 1952, when Marine Night Fighter Squadron 513 [VMF(N)-513] deployed to Korea. The most important job assigned to VMF(N)-513 was the escorting of USAF B-29 bombers over northern Korea. Whereas Chinese and North Korean MiG-15s relied on ground-controlled intercept radar for steering guidance into firing positions, the F3D, with its own onboard radars, was autonomously lethal – it could detect, track and target MiGs all on its own. Skyknight crews ended the Korean War with six nocturnal kills in exchange for one combat loss. After the war, 35 Skyknights were converted into electronic warfare (EW) aircraft. As US air

operations over North Vietnam intensified in early 1965, the need for a tactical EW jet to provide electronic countermeasures (ECM) protection to accompany strike packages north became apparent. For all of its early effectiveness over North Vietnam, the proliferation of radar-guided guns and missiles began to erode the advantage created by EF-10 escort support, which flew its last combat mission in October 1969. This highly illustrated volume explores the F3D Skyknights and their deployment during the Korean and Vietnam wars, using first-hand accounts from aircrew, original photographs and 30 profile artworks to explore their key roles as an escort aircraft and electronic warfare aircraft.

Douglas F3D/F-10 Skyknight Steve Ginter, 1982 The first prototype was trucked from El Segundo to Murdoc Dry Lake (Edwards AFB). Its design had been refined into a bulbous shape which gave rise to the nickname Willy the Whale. While the Air Force held discussions on the A-3's and its possible use, the Naval Air Test Center, Paxtent River, MD and MCAS El Toro were conducting simulated night interceptions in which the XF3D-1 repeatedly intercepted and

destroyed single-seat jet fighters above 40,000 ft.

Employment Regulation in the Workplace Robert K

Robinson, GERALYN McClure Franklin, 2015-01-28 This textbook acquaints readers with the major federal statutes and regulations that control management and employment practices in the American workplace. The material is presented from the perspective that the human resource professional is the employer's representative and is, therefore, responsible for protecting the employer's interests and reducing the employer's exposure to litigation through monitoring activities and viable employee policies. The book is designed as a tool for today's business and management professionals, and unlike some other texts in the field, maintains a pro-business or pro-management approach. The authors have skilfully crafted *Employment Regulation in the Workplace* to be an effective learning tool. Each chapter opens with learning objectives and an example scenario, and each chapter contains plenty of illustrative figures, boxes, and diagrams. Chapters conclude with a listing of key terms, questions for discussion, and two case exercises. The book also includes a comprehensive bibliography.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other

members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
