The Key to Technical Translation Michael Hann, 1992-01-01

This handbook for German/English/German technical translators at all levels from student to professional covers the root terminologies of the spectrum of scientific and engineering fields. The work is designed to give technical translators direct insight into the main error sources occurring in their profession, especially those resulting from a poor understanding of the subject matter and the usage of particular terms to designate different concepts in different branches of technology. The style is easy to read and suitable for nonnative English speakers and translators with no engineering experience. Volume 1 presents a comprehensive systematic description of the basic concepts underlying all branches of technology: Electrical, Mechanical and Chemical Engineering, Materials, Science, Electronics, Nucleonics, Aeronautics, Computers, Automobiles, Plastics and other important fields. Volume 2 expands this terminology with the aid of a Technical Thesaurus and a set of structured bilingual dictionaries which draw attention to specific English/German errors, usage of technical vocabulary and to collocations of general vocabulary in engineering contexts. The two volumes combine 3 major areas: 1. Technical Translation, 2. General Linguistics and 3. Computational Lexicography, possibly indirectly marking the birth of a new discipline [Technical Linguistics]. The book is designed for practical as well as academic use, for translator trainers, practicing translators, applied linguists, and professional engineers and scientists working with English/German documentation. [There is so much material there that the books will not only be wanted by English/German/English translators, but the English basis on its own will be attractive to other language orientations involving English] Juan C. Sager (UMIST, Manchester)

Narrative, Imagination and Concepts of Fiction in Late

Antique Hagiography, 2023-11-13 This volume explores concepts of fiction in late antique hagiographical narrative in different cultural and literary traditions. It includes Greek, Latin, Syriac, Armenian, Persian and Arabic material. Whereas scholarship in these texts has traditionally focussed on historical questions, this book approaches imaginative narrative as an inherent element of the genre of hagiography that deserves to be studied in its own right. The chapters explore narrative complexities related to fiction, such as invention, authentication, intertextuality, imagination and fictionality. Together, they represent an innovative exploration of how these concepts relate to hagiographical discourses of truth and the religious notion of belief, while paying due attention to the various factors and contexts that impact readers' responses.

Legendary Patterns in Late Antique Biography: The Parallel Lives of Ardashir I and Constantine the Great Matthew O'Farrell, 2022-10-31 In an examination of the legendary biographies of Constantine I and Ardashir I A Memorial in the World argues that the two share a literary heritage and that both were created to serve a similar purpose.

Greek Texts and Armenian Traditions Francesca Gazzano, Lara Pagani, Giusto Traina, 2016-08-22 An interdisciplinary approach, crucial as it is in most fields of research, proves itself to be unescapable in the study of interactions between the ancient Armenian and Greek worlds and literatures. The volume arises from such an awareness and collects papers presented in a conference which has been organized in 2013 at the University of Genova, thanks to a cooperation with the Université Paris-Sorbonne, following in the footsteps of a tradition inaugurated by Giancarlo Bolognesi in the years '80 and '90. The subject is explored from many points of view: the topic of Armenian translations of Greek texts - with considerations of a methodological nature and the discussion of case-studies -, aspects which pertain to the historical context and

the historiographical sources, the wide theme of the Armenian reception of Biblical, Christian and Byzantine literature, and finally philological, linguistic and lexical problems. The aim of this kind of research is to exploit the cooperation among classical philologists, linguists and Armenologists, in order to face the challenge of investigating a subject which requires many different competences.

Vegetable Matrix as a Source of Nutritional and Microbial Value for Healthy Food Cinzia Caggia, Cinzia Lucia Randazzo, Esra Capanoglu, 2020-01-20 The rising demands in maintaining human wellness through diet have greatly promoted the interest in plant-based or vegetarian diets all over the world. Several government agencies, health/nutrition organizations, and health professionals are emphasizing that regular consumption of fruits and vegetables may provide health benefits and weight management. Fruits and vegetables are recognized as rich in nutritional components, such as fiber, protein, healthy fat, and micronutrients including vitamins, minerals, and phytochemicals. A growing body of scientific evidence supports that phytonutrients may play positive roles in preventing certain diseases, mainly aging-associated diseases. Furthermore, several benefits are associated with the consumption of vegetable-based fermented foods such as cereals, fruits and starchy root crops. It is noteworthy that microbial activity increases organic acids, decreases some toxic and anti-nutritional factors, and reduces amounts of sugars, resulting in a lower glycemic index. Microbial fermentation plays also a crucial role in safety traits of foods and beverages enhancing their sensory properties and extending their

shelf life. Vegetable waste, which contains proteins, fats, natural colorants, enzymes, antimicrobials and antioxidants, represents a relevant source of natural food additives or supplements with high nutritional value. Furthermore, complex value-added chemicals such as phytochemicals, prebiotics, polysaccharides and polypeptides can be obtained via microbial, in an eco-friendly way. This Research Topic aims to present high-qualified scientific achievements on the impact of fruit, vegetable and/or novel plant based matrices on human health, sharing both successes and failures of original research and meta-analyses studies.

Quseir Al-Qadim 1978 Donald S. Whitcomb,Janet H.

Johnson,1979 The results of the first season of archaeological excavations at the small port site of Quseir al-Qadim on the Red Sea are presented in this volume. Archaeological evidence testifies to the importance of this port, then called Leukos Limen, for the Roman trade in the Indian Ocean in the first and second centuries a.d. After a millennium of abandonment, this trade was revived under the Mamluks (thirteenth-fourteenth centuries), when the trade reached East Africa, India, and China. This report presents copious illustrations of the artifacts of daily life in these two periods. A chapter by Martha Prickett presents the detailed results of a regional survey around Quseir and along the route leading to Luxor and the Nile valley.

The Sheikh's House at Quseir al-Qadim Katherine Strange

Burke,2021-04-30 This study of a thirteenth-century dwelling on Egypt's Red Sea Coast draws on multiple lines of evidence--including texts excavated at the site--to reconstruct a history of the structure and the people who dwelt within. The inhabitants participated in Nile Valley-Red Sea-Indian Ocean trade, transported Ḥāġġ pilgrims, sent grain to Mecca and Medina, and wrote sermons and amulets for the local faithful. These activities

are detailed in the documents and fleshed out in the botanical, faunal, artifact, and stratigraphic evidence from the University of Chicago's excavations (1978-82). This compound eventually consisted of two houses and a row of storerooms and became the center of mercantile activity at Quseir al-Qadim. Over time, as the number of named individuals who received shipping notes addressed to the warehouse of Abū Mufarij increased, living rooms and storerooms were added to accommodate this expansion of commerce. While most merchants were dealing in textiles, dates, and grains, additional commodities traded included perfumes, gemstone-decorated textiles, resist-dyed textiles, and porcelains. Specialist studies by Steven Goodman on the avian faunal remains and Wilma Wetterstrom on the macrobotanical finds reveal that the compound's occupants enjoyed a diet of chicken and Nile Valley produce such as grapes and watermelon, and they were supplemented by high-priced imports: nuts and fruits from around the Mediterranean, along with medicinal plants from as far away as India, indicate the wealth and status of this family of merchants. The evidence from this small portion of Quseir al-Qadim yields a rich local story that is a microcosm of Nile Valley-Red Sea-Indian Ocean trade under the last Ayyubid sultans of Egypt.

Ctesias' Persica in Its Near Eastern Context Matt Waters, 2017-01-24 The Persica is an extensive history of Assyria and Persia from around 400 BCE. It was written by the Greek historian Ctesias, who served as a doctor to the Persian king Artaxerxes II. In this volume, Matt Waters offers a fresh interdisciplinary analysis of the text. He shows in detail how Ctesias' history, though written in a Greek literary style, was infused with two millennia of Mesopotamian and Persian motifs, legends, and traditions. Waters' revealing study contributes significantly to knowledge of ancient historiography, Persian

dynastic traditions and culture, and the influence of Near Eastern texts and oral tradition on Greek literature.

Textbook of Mechanical Vibrations Mahesh Chandra Luintel, 2023-10-17 This textbook covers the fundamentals and applications of mechanical vibrations and is useful for both undergraduate and postgraduate courses. It provides a concise and clear presentation of dynamics and vibrations including many examples to provide instant illustration and applications of the mathematical relations obtained. It contains self-explanatory sketches, graphs, and figures to curtail long text. Numerous illustrated examples, exercises, and problems at the end of each chapter serve as good sources to grasp the basic principles presented in the text. Review questions and sufficient problems have also been included at the end of each chapter with answer keys for self evaluation. This textbook can also be used as a reference book by researchers and professionals interested in vibrations.
