Drug Metabolism Handbook Ala F. Nassar,2009-01-28 A valuable reference tool for professionals involved in the industry, Drug Metabolism in Pharmaceuticals covers new tools such as LC-MS and LC-MS-NMR along with experimental aspects of drug metabolism. This work fills a gap in the literature by covering the concepts and applications of pharmaceutical research, development, and assessment from the point of view of drug metabolism. By providing both a solid conceptual understanding of the drug metabolism system, and a well illustrated, detailed demonstration and explanation of cutting edge tools and techniques, this book serves as a valuable reference tool for bench scientists, medical students, and students of general health sciences.

Barebacking Jack Drescher,Perry Halkitis,Leo Wilton,2006-04-11 Go beyond the statistics to discover why many gay and bisexual men take the health risk—and what can be done about it The rate of new HIV diagnoses and other sexually transmitted infections among men having sex with men has increased sharply, especially in men of color. Barebacking: Psychosocial and Public Health Approaches examines in depth the reasons why so many gay and bisexual men indulge in “barebacking,” or intentional unprotected sex. Respected experts reveal the latest studies that explore every facet of this alarming trend that apparently began as a phenomenon confined to those who had already been infected. The mounting likelihood of a renewed epidemic is a troubling public health issue that reaches beyond gays and bisexuals into the heterosexual community. The aim of Barebacking: Psychosocial and Public Health Approaches is to provide clinicians with some insights to foster strategies for addressing these unsafe sexual behaviors. This book presents the studies of researchers working in the field as well as those who can provide both research and clinical perspectives. Thoroughly researched and richly referenced, this book is an essential resource for health and mental health professionals. In Barebacking: Psychosocial and Public Health Approaches, you’ll find discussion and research on: the public health perspective of the emergence of barebacking among gay and bisexual men how the term “barebacking” differs between various gay and bisexual men how club drug use has posed a public health threat HIV transmission risks among men who meet through the Internet barebacking among Internet-based male sex workers assessing HIV-negative gay or bisexual men a treatment model for barebackers psychotherapy considerations for individual gay men and male couples having unsafe sex Barebacking: Psychosocial and Public Health Approaches is an insightful and comprehensive research source, essential for psychologists, researchers, public health officials, counselors, psychotherapists, and anyone concerned with the HIV epidemic in the United States.

Jacques Derrida (Routledge Revivals) William Schultz,Lewis L.B. Fried,2016-06-17 First published in 1992, this book represents the first major attempt to compile a bibliography of Derrida’s work and scholarship about his work. It attempts to be comprehensive rather than selective, listing primary and secondary works from the year of Derrida’s Master’s thesis in 1954 up until 1991, and is extensively annotated. It arranges under article type a huge number of works from scholars across numerous fields — reflecting the interdisciplinary and controversial nature of Deconstruction. The substantial introduction and annotations also make this bibliography, in part, a critical guide and as such will make a highly useful reference tool for

those studying his philosophy.

Ion Channels and Transporters of Epithelia in Health and Disease Kirk L. Hamilton, Daniel C Devor, 2015-12-14 This book sheds new light on the physiology, molecular biology and pathophysiology of epithelial ion channels and transporters. It combines the basic cellular models and functions by means of a compelling clinical perspective, addressing aspects from the laboratory bench to the bedside. The individual chapters, written by leading scientists and clinicians, explore specific ion channels and transporters located in the epithelial tissues of the kidney, intestine, pancreas and respiratory tract, all of which play a crucial part in maintaining homeostasis. Further topics include the fundamentals of epithelial transport; mathematical modeling of ion transport; cell volume regulation; membrane protein folding and trafficking; transepithelial transport functions; and lastly, a discussion of transport proteins as potential pharmacological targets with a focus on the pharmacology of potassium channels.

Toxicology of the Kidney Jerry B. Hook, Robin S. Goldstein, 1993-06-30 This second edition provides a synthesis of recent research on the mechanisms of chemically-induced kidney injury. The text includes a review of current concepts of clinical nephrotoxicity and renal failure, and mechanisms of specific classes of nephrotoxic drugs and environmental chemicals.

Nebelsick, 2005-12-08 Since 1972, scientists from all over the world working on fundamental questions of echinoderm biology and palaeontology have conferred every three years to exchange current views and results. The 11th International Echinoderm Conference held at the University of Munich, Germany, from 6-10 October 2003, continued this tradition. This volume comprises 95 submitted papers and 96 abstracts covering a wide spectrum from innovative student contributions to the lessons learnt from experienced specialists. Protein Deimination in Human Health and Disease Anthony P. Nicholas, Sanjoy K. Bhattacharya, Paul R. Thompson, 2017-09-20 Published in 2014, Protein Deimination in Human Health and Disease was the first book on this novel post-translational modification, in which selected positively-

charged arginine amino acids are converted to neutral citrulline amino acids by the peptidyl-arginine deiminase (PAD) family of enzymes. This area of research continues to expand rapidly, necessitating the need for this second edition. Chronicling the latest inflammatory, epigenetic, neurodegenerative, and carcinogenic processes, *Protein Deimination in Human Health and Disease, Second Edition*, updates the latest advances in deimination research, including new information on PAD enzyme structure and activity, and how PAD knock-out animals are being used to study known and newly-discovered links to various human diseases. The first edition outlined what was known about citrullinated proteins in normal tissues such as skin and hair, as well as in maladies such as rheumatoid arthritis (RA), multiple sclerosis (MS), Alzheimer's disease (AD), glaucoma, peripheral nerve injury, neonatal hypoxic brain damage, and breast cancer. This second edition addresses numerous additional disorders such as diabetes, asthma, traumatic brain injury, inflammatory bowel disease, lupus, bone disease, heart failure, fronto-temporal dementia, and prostate and colon cancer. It also provides updates on the deimination research covering the three seminal diseases first linked to this process (RA, MS and AD), and details how auto-antibodies against citrullinated proteins contribute to disease. In addition, new hypotheses on the possible pathologic mechanisms of citrullinated myelin basic protein and glial fibrillary acidic protein are also proposed. This second edition also outlines the latest developments in therapeutic strategies, including the use of new PAD antagonists and innovative techniques such as micro-vesicles and stem cells as possible mechanisms to treat these conditions.
