The Dynamics of Fashion Elaine Stone,2004 This text provides the foundation for a wide range of careers in the fashion business. The Restoration of Celia Fairchild Marie Bostwick,2021-03-02 “The Restoration of Celia Fairchild is wise, witty, and utterly compelling.” —Jane Green, New York Times bestselling author of *The Friends We Keep* Evvie Drake Starts Over meets The Friday Night Knitting Club in this wise and witty novel about a fired advice columnist who discovers lost and found family members in Charleston, by the New York Times bestselling author of *The Second Sister*. Celia Fairchild, known as advice columnist ‘Dear Calpurnia’, has insight into everybody’s problems – except her own. Still bruised by the end of a marriage she thought was her last chance to create a family, Celia receives an unexpected answer to a “Dear Birthmother” letter. Celia throws herself into proving she’s a perfect adoptive mother material – with a stable home and income – only to lose her job. Her one option: sell the Charleston house left to her by her recently departed, estranged Aunt Calpurnia. Arriving in Charleston, Celia learns that Calpurnia had become a hoarder, the house is a wreck, and selling it will require a drastic, rapid makeover. The task of renovation seems overwhelming and risky. But with the help of new neighbors, old friends, and an unlikely sisterhood of strong, creative women who need her as much as she needs them, Celia knits together the truth about her estranged family — and about herself. The Restoration of Celia Fairchild is an unforgettable novel of secrets revealed, laughter released, creativity rediscovered, and waves of wisdom by a writer Robyn Carr calls my go-to author for feel-good novels.”

The Fairchild Encyclopedia of Menswear Mary Lisa Gavenas,2008 Suit sales are on the rise. Men's makeovers are a staple of reality television, and male celebrities retain stables of stylists. Magazine publishers are busily launching male style spin-offs, while business and news titles are just as busy beefing up their coverage of men's fashion and grooming. As we enter the 21st century, there is more interest over menswear than there's been in decades, yet there has been no comprehensive resource or reference until now. Witty and exhaustively researched, *The Fairchild Encyclopedia of Menswear* remedies that need for students, retailers, costumers, journalists, would-be dandies, and anyone else who is interested in what men wear and why they wear it. --Book Jacket.

Fruits of Eden Amanda Harris, 2015-04-28 At the turn of the nineteenth century—when most food in America was bland and brown and few people appreciated the economic potential of then-exotic foods—David Fairchild convinced the U.S. Department of Agriculture to finance overseas explorations to find and bring back foreign cultivars. Fairchild traveled to remote corners of the globe, searching for fruits, vegetables, and grains that could find a new home in American fields and in the American diet. In *Fruits of Eden*, Amanda Harris vividly recounts the exploits of Fairchild and his small band of adventurers and botanists as they traversed distant lands—Algeria, Baghdad, Cape Town, Hong Kong, Java, and Zanzibar—to return with new and exciting flavors. Their expeditions led to a renaissance not only at the dinner table but also in horticulture, providing diversity of crops for farmers across the country. Not everyone was supportive, however. The scientific community was concerned with invasive species, and World War I fanned the flames of xenophobia in Washington. Adversaries who believed Fairchild's discoveries would contaminate the purity of native crops eventually shut down his program, but his legacy lives on in today's modern kitchen, where navel oranges, Meyer lemons, honeydew melons, soybeans, and durum wheat are now standard.

Makers of the Microchip Christophe Lecuyer, David C. Brock, 2010-09-03 The first years of the company that developed the microchip and created the model for a successful Silicon Valley start-up. In the first three and a half years of its existence, Fairchild Semiconductor developed, produced, and marketed the device that would become the fundamental building block of the digital world: the microchip. Founded in 1957 by eight former employees of the Shockley Semiconductor Laboratory, Fairchild created the model for a successful Silicon Valley start-up: intense activity with a common goal, close collaboration, and a quick path to the market (Fairchild's first device hit the market just ten months after the company's founding). Fairchild Semiconductor was one of the first companies financed by venture capital, and its success inspired the establishment of venture capital firms in the San Francisco Bay area. These firms would finance the explosive growth of Silicon Valley over the next several decades. This history of the early years of Fairchild Semiconductor examines the technological, business, and social dynamics behind its innovative products. The centerpiece of the book is a collection of documents, reproduced in facsimile, including the company's first prospectus; ideas, sketches, and plans for the company's products; and a notebook kept by cofounder Jay Last that records problems, schedules, and tasks discussed at weekly meetings. A historical overview, interpretive essays, and an introduction to semiconductor technology in the period accompany these primary documents.

Fairchild Aircraft Frank Woodring,Susanne Woodring,2007-07-18 When Orville Wright made the first successful flight of an airplane at Kitty Hawk, North Carolina, on December 17, 1903, no one could have envisioned the impact that the historic occasion would have on Hagerstown, Maryland, and the tri-state area of Maryland, Pennsylvania, and West Virginia. When Sherman M. Fairchild bought controlling interest in Hagerstown's Kreider-Reisner Aircraft in 1929, the stage was set for the newly formed Fairchild Aircraft to become a major contributor to the country's World War II efforts. In 1939, the company was awarded a contract to build 270 PT-19 trainers for the U.S. Army Air Corps. By the spring of 1944, Fairchild had manufactured more than 5,000 of the primary trainers, which became synonymous with the city of Hagerstown. When asked by the military to "put wings on a railroad boxcar," Fairchild responded with various cargo aircraft including the C-82, the C-119, and the C-123. Fairchild's contribution to the world of aviation unofficially ended in March 1984 with the delivery of the last of the A-10s contracted by the U.S. Air Force. Over the course of its history in Hagerstown, Fairchild employed more than 50,000 men and women in the manufacture of military and civilian aircraft.
