Flight ,1928

Blue Skies, Orange Wings Noppen,2015-04-07 Through a wealth of photographs and color illustrations and an informed narrative, *Blue Skies, Orange Wings* documents the surprisingly strong role of Dutch aircraft, airmen, designers, and airlines in world aviation in the first half of the twentieth century. In this beautiful book Ryan Noppen offers the most thorough study of the early years of Dutch commercial and military aviation published in the English language. He examines the famed Fokker airliners, the development of Dutch national airline KLM, and their impact on the world in the pioneering days of flight, including a number of notable individuals -- Charles Lindbergh, Henry Ford, Amelia Earhart, and more.

AIRCRAFT SPANISH CIVIL WAR Gerald Howson,1990-11-17 Since most of the 3,500 aircraft used in the Spanish Civil War were smuggled into the country, only recently have archives opened, lost records surfaced, and people found it safe to tell their stories. Over 280 types of aircraft used by the opposing forces are described, and their part in the war detailed. Most are illustrated with photographs. Aircraft built in most of the industrial countries took part, many of them prototypes, one-of-a-kind, and racing and record-setting planes. No bibliography. is the second of a comprehensive three-volume reference work on the iconic Focke Wulf FW 190—arguably the finest piston-engined fighter aircraft of World War 2. The books are the product of years of study by two of the leading researchers. Each volume contains more than four hundred photographs including those showing factory and construction, close-ups of weapons and equipment, operational units, and numerous facsimiles of Focke-Wulf handbook drawings. Color artwork is also included, plus an extensive selection of original manufacturer's technical drawings. This volume looks at the Focke-Wulf Fw 190 A6-A10 and D series and the FW 190 F and G fighter bomber development, covering the first operations by the Schlachtgeschwader until spring 1943; the FW 190 A-6 and A-7 and operations until the end of 1943; the FW 190 A-8 to A-10 and operations in the west until June 1944; the FW 190 A operations in the east until June 1944; and ground-attack operations until June 1944. An appendix details Werknummer batches and manufacturers.

Airliner Models Anthony J Lawler,2019-10-08 For most of the past century, beautiful models of airliners have been made to promote their airlines' services in travel agents and their own shops. The models also illustrate the evolution of airliner design over these decades: the wood and fabric biplanes of the 1920s, the broad adoption of all-metal airliners in the 1930s, the first jet airliners of the 1950s, the first wide-body airliners of the 1970s and the pioneering small steps in supersonic air travel are all covered. The increasingly colourful exterior schemes adopted by the airlines, to ensure recognition by aspiring passengers, provide an interesting subtext. For model collectors, the airliner type, makers name, scale, approximate age and the materials used are detailed for each model illustrated. A short history of significant model-making companies is covered. With the onset of online bookings and the closure of airline offices and travel agents, the use of models is fast vanishing forever. The focus of this book is to preserve this fascinating era when models were a significant marketing tool, and to ensure that these models, at least in photographic form, survive as a record for future generations.
