**Fatima's Baby** Nicolai Andreyevich, 2016-05-20 In the year 2022, 60-year-old Fatima is a barren, aging Muslima. Her cruel husband, Azzam is senior imam at the East London Mosque, the largest in England. Fatima carries the disfiguring scars from his abuse. Despite having four wives, Azzam is still desperate for a male heir. One wife has been stoned for her sins; the others are to him, but cattle. Fatima is worthless and expendable in his eyes, so she is chosen to go to the Celebration in Jerusalem. If she dies, there is no loss. There, he tells her, she will conceive a son by receiving The Gift, promised by the mysterious and powerful creature known as The One. Fatima is shocked when she finds herself young and, yes, pregnant. With this realization comes a new kind of horror. She knows that the punishment for adultery is stoning, and Azzam always says that there must be punishment. No longer fearing for her own well-being, Fatima now fears for the fate of her child. She has Azzam to contend with, but also his brother, Hassana man who used to rape her cruelly until Azzam punished her with scalding water. Although, blessed by the One, Fatima feels helpless to protect her baby. After all, she is just a woman.

*The Autobiography of an African Princess* F. Massaquoi, 2013-11-18 This critical edition of Princess Fatima Massaquoi's memoirs begins with her birth in southern Sierra Leone, continues through her childhood in Liberia, moves on to Hamburg, Germany, where she lived and experienced the rise of the Nazi movement, and ends with her life in the United States.

My Early Life Fatima Barry, 2021-06-28 This is a story of a unique African girl born in a small western nation and into a tribal culture, one with meager assets and opportunities. She is to face enumerable disadvantages, including: early, unwanted invitations to marry; early losses of her basic family unit; being raised as a working girl away from her village and lacking any support or help to be

schooled. What she does have is a marked intelligence; faith that she will succeed; the temperament of being kind to all she meets: and the ultimate knowing, with a little patience and occasional discussions with God; achievement is not only possible: but is to be her way through to a satisfactory life. One can hardly read this autobiography without feeling the elan that surely she will succeed as she take us on the pathway of this journey. It is a consuming adventure to accompany this Fatima Barry and note how she does it. . . . Dr. Mike O'Brien, Austin, Tx

**Tears of Fatima** Victor O. Ogundare, 2015-02-12 This is a mystery story book which exposed the sufferings of young girls under customary precepts linked to religion belief. Tears of Fatima emanated from Rub' al Khali desert of Saudi Arabia; where the Bedouin tribe has mastered the strategy of survival. Rub' al Khali deserts is one of the most inhabitable deserts in the world because of its scant rainfall and extremely hot weather condition. Fatima was a young Bedouin girl who at the age of 9 learned the art of shepherd. She fought against the prejudice of traditional beliefs and religion restrictions to find a purpose for her life. Despite the constraints of her religion and the perilous consequences she faced, Fatima endured hardship and risked her life to save a dying teenager in the unforgiving desert of Saudi Arabia while looking after the goats and sheep of her parents at the age of 13 years. The teenager she saved from death later became a center piece in her life as she matured into adulthood. Fatima survived various challenges including kidnapping by desert raiders and unwanted marital affairs. She suffered various nightmares and mild psychiatric disorder due to the overwhelming effect of her life challenges. Her tenacity finally gave way to her reunification with Moussa after her unwanted marriage to Abdul-Kareem. Narrowly, Fatima escaped death sentence carried out under the Sharia Law through the intervention of Moussa whom she once saved from death. Eventually Fatima Married the man she loved at a more matured age. She later acquired

education which has been her childhood dreams. Moussa and Fatima later migrated from the dry desert of Rub' al Khali to the oasis desert of Yemen after their wedding; where they settled with Al-Hassan. The encounter of two European missionaries – Andrew and Nelson transformed the lives of Fatima and Moussa considerably as it engages in a comparative religions analysis. That encounter later converted their faith and unexpectedly assisted their journey to Scotland.

Fatima's Destiny Barry Erickson, 2018-11-27 When Pope John Paul II is shot by an Islamic assassin in St. Peter's Square, reporter Maria Santos is so close she's spattered with the Pope's blood and rescued by the same man who disarmed the shooter. Even before she can say thank you, he's gone. Two decades later destiny brings them together again. The life-changing moment in Rome, that launched Maria's career led her rescuer, Matthew Storer down a different path. Although she's free, he has commitments and their dicey attempt at a platonic relationship shatters when Maria disappears reporting in Iraq and Matthew abandons everything to go to her. While initial reports list her as a hostage, the CIA says something strange has happened. Rumors are flying around the Arab world about a beautiful, dark haired woman, with a fair complexion and a mesmerizing command of the Koran, preaching peace in flawless, regal Arabic. The U.S. military says Maria Santos is dead. Muslims are saying, Fatima, the Prophet Mohammed's most cherished daughter is alive! Matthew, just wants the love of his life back, but is the woman he lost, the woman he'll find? And what does Fatima mean?

The Return Fatima Dike,2009

**The Star of Bethlehem** Aaron Adair,Bob Berman,2013-09-09 The Star of Bethlehem: A Skeptical View is an analysis of the astronomical portent found in the Gospel of Matthew which supposedly led the Magi from the East to the birthplace of Jesus. Throughout history, people have tried to connect the Star to real, naturalistic phenomena, as well as to explain it in other ways. Adair takes a thorough look at all of these explanatory attempts, using the tools of science and astronomy, and finds them fundamentally wanting. Take a trip through the heavens above with Adair as he critically explores many centuries of flawed hypotheses, looking to answer the question Did the Star of Bethlehem really exist? This book is at the conjunction of science and religion. Well researched, scientifically reasoned,

elegantly concise, this book will long be required reading on the 'Star of Bethlehem'. Full of fascinating historical facts, and better informed and more careful than any other book on the subject, this should be on the shelf of everyone interested in that legendary celestial event. Richard Carrier, Ph.D., author of *Proving History: Bayes's Theorem and the Quest for the Historical Jesus*. A fascinating and readable feat of hardcore historical legwork and keen scientific analysis. David Fitzgerald, author of *The Complete Heretic's Guide to Western Religion: The Mormons*. ...tightly-argued, well-reasoned.... Adair masterfully demonstrates why every effort to rationalize the Star thus far has failed.... A concise and rigorous must-read for anyone interested in religion, history, and modern efforts to understand the past. Jason Colavito, author of *The Cult of Alien Gods*.

*The Gaia Hypothesis* Michael Ruse, 2013-09-25 "The book is full of empathetic, insightful, and often very funny portraits of Margulis, Lovelock, and a community of other figures associated with Gaia." —Carla Nappi, *New Books in Science, Technology, and Society* In 1965 English scientist James Lovelock had a flash of insight: the Earth is not just teeming with life; the Earth, in some sense, is life. He mulled this revolutionary idea over for several years, first with his close friend the novelist William Golding, and then in an extensive collaboration with the American scientist Lynn Margulis. In the early 1970s, he finally went public with the Gaia hypothesis, the idea that everything happens for an end: the good of planet Earth. Lovelock and Margulis were scorned by professional scientists, but the general public enthusiastically embraced Lovelock and his hypothesis. In *The Gaia Hypothesis*, philosopher Michael Ruse, with his characteristic clarity and wit, uses Gaia and its history, its supporters and detractors, to illuminate the nature of science itself. Gaia emerged in the 1960s, a decade when authority was questioned and status and dignity stood for nothing, but its story is much older. Ruse traces Gaia's connection to Plato and a long history of goal-directed and holistic—or

organicist—thinking and explains why Lovelock and Margulis’s peers rejected it as pseudoscience. But Ruse also shows why the project was a success. He argues that Lovelock and Margulis should be commended for giving philosophy firm scientific basis and for provoking important scientific discussion about the world as a whole, its homeostasis or—in this age of global environmental uncertainty—its lack thereof. “[Ruse’s] treatment is thought-provoking and original, as you would expect from this perceptive, irrepressible philosopher of biology.” —New Scientist

Systematic Atheology John R. Shook, 2017-12-01 Atheology is the intellectual effort to understand atheism, defend the reasonableness of unbelief, and support nonbelievers in their encounters with religion. This book presents a historical overview of the development of atheology from ancient thought to the present day. It offers in-depth examinations of four distinctive schools of atheological thought: rationalist atheology, scientific atheology, moral atheology, and civic atheology. John R. Shook shows how a familiarity with atheology’s complex histories, forms, and strategies illuminates the contentious features of today’s atheist and secularist movements, which are just as capable of contesting each other as opposing religion. The result is a book that provides a disciplined and philosophically rigorous examination of atheism’s intellectual strategies for reasoning with theology. Systematic Atheology is an important contribution to the philosophy of religion, religious studies, secular studies, and the sociology and psychology of nonreligion.

Essential Readings in Evolutionary Biology Francisco J. Ayala, John C. Avise, 2014-03-15 Traces scholarly thought from the nineteenth-century birth of evolutionary biology to the mapping of the human genome through forty-eight essays, arranged in chronological order, each preceded by a one-page essay that explains the significance of the chosen work.

**Beyond an Absence of Faith** Jonathan M. S. Pearce, Tristan Vick, 2014-05-01 This anthology of

16 stories, written by former believers who have left their religions, is intended to shed light on what happens to a person, psychologically, emotionally, and even physically, who leaves his or her church. The stories explore the loss of family and friends, the difficulties in adjusting to new paradigms and the fear and relief in discovering one's responsibility for oneself.

**Free Will Skepticism in Law and Society** Elizabeth Shaw, Derk Pereboom, Gregg D. Caruso, 2019-08-29 'Free will skepticism' refers to a family of views that all take seriously the possibility that human beings lack the control in action - i.e. the free will - required for an agent to be truly deserving of blame and praise, punishment and reward. Critics fear that adopting this view would have harmful consequences for our interpersonal relationships, society, morality, meaning, and laws. Optimistic free will skeptics, on the other hand, respond by arguing that life without free will and so-called basic desert moral responsibility would not be harmful in these ways, and might even be beneficial. This collection addresses the practical implications of free will skepticism for law and society. It contains eleven original essays that provide alternatives to retributive punishment, explore what (if any) changes are needed for the criminal justice system, and ask whether we should be optimistic or pessimistic about the real-world implications of free will skepticism.

Why Beliefs Matter E. Brian Davies, 2010-07-09 In the follow-up to his acclaimed *Science in the Looking Glass*, Brian Davies discusses deep problems about our place in the world, using a minimum of technical jargon. The book argues that 'absolutist' ideas of the objectivity of science, dating back to Plato, continue to mislead generations of both theoretical physicists and theologians. It explains that the multi-layered nature of our present descriptions of the world is unavoidable, not because of anything about the world, but because of our own human natures. It tries to rescue mathematics from the singular and exceptional status that it has been assigned, as much by those who understand it as

by those who do not. Working throughout from direct quotations from many of the important contributors to its subject, it concludes with a penetrating criticism of many of the recent contributions to the often acrimonious debates about science and religions.

**A Chosen Calling** Noah J. Efron, 2014-06 Rejecting the idea that Jews have done well in science because of uniquely Jewish traits, Jewish brains, and Jewish habits of mind, this book approaches the Jewish affinity for science through the geographic and cultural circumstances of Jews who were compelled to settle in new worlds in the early twentieth century.

*Science and Religion* Gregg D. Caruso, 2014-04 Are science and religion compatible when it comes to understanding cosmology (the origin of the universe), biology (the origin of life and of the human species), ethics, and the human mind (minds, brains, souls, and free will)? Do science and religion occupy non-overlapping magisteria? Is Intelligent Design a scientific theory? How do the various faith traditions view the relationship between science and religion? What, if any, are the limits of scientific explanation? What are the most important open questions, problems, or challenges confronting the relationship between science and religion, and what are the prospects for progress? These and other questions are explored in *Science and Religion: 5 Questions*-a collection of thirty-three interviews based on 5 questions presented to some of the world's most influential and prominent philosophers, scientists, theologians, apologists, and atheists. Contributions by Simon Blackburn, Susan Blackmore, Sean Carroll, William Lane Craig, William Dembski, Daniel C. Dennett, George F.R. Ellis, Owen Flanagan, Owen Gingerich, Rebecca Newberger Goldstein, John F. Haught, Muzaffar Iqbal, Lawrence Krauss, Colin McGinn, Alister McGrath, Mary Midgley, Seyyed Hossein Nasr, Timothy O'Connor, Massimo Pigliucci, John Polkinghorne, James Randi, Alex Rosenberg, Michael Ruse, Robert John Russell 25. **Living the Secular Life** Phil Zuckerman, 2015-10-27 A sociology professor examines the demographic shift that has led more Americans than ever before to embrace a nonreligious life and highlights the inspirational stories and beliefs that empower modern-day secular culture.
