German Automatic Rifles 1941–45 Chris McNab,2013-03-20 This book explores the origins, development, combat use and lasting influence of Nazi Germany's automatic rifles, focusing on the Gew 41(W), Gew 43/Kar 43, FG 42 and MP 43/StG 44. The Blitzkrieg campaigns of 1939–40 convinced many observers that most infantry combat took place at closer ranges than the 750–1,000m. From 1941 Germany's arms designers took note and produced a new series of infantry firearms. This study not only provides a detailed technical description of each weapon, but also explores how the firearms performed on the battlefields of World War II. The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen-SS soldiers on both the Eastern and Western Fronts. Postwar service is also studied, such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War. Setting each firearm in its tactical and historical context, and employing striking photographs and full-colour artwork, firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons.

Fg42: WWII Germany's Scifi Machine Rifle and the Smg Guns Reproduction. Jeff John,2018-11-23 WWII Germany's innovative FG42 was a technological breakthrough taking the primary infantry rifle from a slow-firing pre-1900 bolt-action rifle to an ultra-fast machine rifle capable of spitting out 900 rounds per minute. Too few were made too late in the war to have much impact. The battlefield superiority the FG42 offered was lost on post-war arms designers who ignored its valuable lessons. Included is an in-depth review of the SMG Guns semi-auto replica of this remarkable rifle. FG42 is written for arms enthusiasts, reenactors and students of the Second World War. Included is a thorough study of the reproduction semi-auto version of the FG42 made by SMG Guns. The test and evaluation includes factory ammo and handloaded ammo, a complete, fully illustrated disassembly/reassembly guide, as well as more than 60 full color photos of the SMG rifle and its various reproduction and original accoutrements to make this rifle at home in a WWII collection. Also included are 5 b&w period photos of the arm in use from Germany's Bundesarchiv. This is an updated version of the previous Kindle ebook, and has more text and many more pictures.

Death from Above Thomas B. Dugelby,R. Blake Stevens,1990-01-01

The FG42 Fallschirmjärgewehr Guus de Vries,2012 This book gives a detailed description of the origin and history of the enigmatic Fallschirmjärgewehr (paratrooper's rifle), Germany's most famous, but also most mysterious small arm of World War II. Although only some thousands were produced, many postwar designs were influenced by the FG42.

The M60 Machine Gun Kevin Dockery,2012-11-20 The US M60 General Purpose Machine Gun, known as “the Pig,” was developed in the years after World War II from two revolutionary German designs. Adopted in 1957, the M60 came into its own in the jungles, hamlets, and city streets of Southeast Asia during the Vietnam War. “Humping the Pig” became common in US military squads, with at least one soldier equipped with an M60 and every squad member carrying ammunition for it. The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design. Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units, the M60 is still in common use with the US armed forces. Meanwhile, its iconic status has been assured by its frequent appearance in many popular films and television shows, from Full Metal Jacket to The A Team. Featuring specially commissioned full-color artwork, this is the full story of the M60, the innovative squad base-of-fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq.

The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1,000m for which most contemporary rifles were designed. In addition, current bolt-action rifles could not provide the rate of fire required for such engagements. From 1941 Germany's arms designers took note and produced a new series of infantry firearms that not only transformed squad firepower, but also laid the foundations for postwar assault rifle design. The Gew 43/Kar 43, fitted with a telescopic-sight rail as standard, was one of history's first semi-auto sniper rifles. The FG 42, designed specifically for airborne soldiers, had a landmark straight-in-line design and other features frequently seen in subsequent small arms, notably the US M60 machine gun. Most influential was the MP 43/StG 44, arguably the world's first true assault rifle, which delivered formidable full-auto fire from a shortened 7.92mm round. This weapon also went on to influence the design of the greatest assault rifle of all time - the AK-47. This study not only provides a detailed technical description of each weapon, but also explores how the firearms performed on the battlefields of World War II. The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen-SS soldiers on both the Eastern and Western Fronts. Small Arms Chris McNab,2015-07-15 The World's Greatest Small Arms features 52 weapons from the late 19th century to the present day. Each weapon is illustrated with a colour profile artwork and photographs, along with a description of the weapon's development and history, key features and a full specifications box.

Sniping Rifles on the Eastern Front 1939–45 Martin Pegler,2019-03-21 The Soviet Union had developed a significant sniping force by 1939, but the extraordinary skill and cunning displayed by Finnish snipers during the Winter War forced the Soviets to innovate. On the other side, German sniping suffered from a lack of standardization of weapons and a lack of marksmen deployed at the start of the Great Patriotic War (1941–45). There were few heroes in the conflict, but on both sides, the snipers were idolized – especially on the Soviet side, gaining almost mythical status. As well as traditional bolt-action weapons, both sides used several types of semi-automatic rifle, such as the SVT-38 and the Gew 41. Offering greater firepower at the expense of long-range accuracy, such weapons would be profoundly influential in the postwar world. Fully illustrated, this absorbing study investigates the development of sniping weapons and techniques on World War II's Eastern Front.

Hitler’s Armies Chris McNab,2011-10-20 The definitive work on Hitler’s war machine charting its evolution from the formidable force which won stunning victories during the Blitzkrieg in 1940, to the hard campaigns it fought in the deserts of North Africa and the frozen wastelands of the Soviet Union to the eventual retreat to the Fatherland itself.
