Fiat G.50 Alessandro Colace,

You Suck at Racing Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

Italian Aces of World War 2 Giorgio Apostolo,2012-12-20 Flying aircraft such as the Macchi 200-202, Fiat G.50 and biplane Fiat CR.42, the Italian fighter pilots were recognised by their Allied counterparts as brave opponents blessed with sound flying abilities, but employing under-gunned and underpowered equipment. Following the Italian surrender in September 1943, a number of aces continued to take the fight to the Allies as part of the Luftwaffe-run ANR, which was equipped with far more potent equipment such as the Bf 109G, Macchi 205V and Fiat G.55. Flying these types, the handful of ANR squadrons continued to oppose Allied bombing raids on northern Italy until VE-Day.

The Hamlyn Concise Guide to Axis Aircraft of World War II David Mondey,2006 Krigsfly fra Tyskland, Italien og Japan under 2. verdenskrig

Croatian Aces of World War 2 Boris Ciglic,Dragan Savic,2013-01-20 Initially flying Italian-supplied Fiat G.50s, the Croat forces suffered heavy losses during 1942 whilst flying alongside JG 52 in the southern sector of the Russian front. Despite this, a significant number of kills fell to future aces such as Cvitan Galic and Mato Dubovak during this time, and when the units re-equipped with Bf 109G-10s in 1943, battle-seasoned Croat pilots started to rack up impressive scores. This book reveals how, by 1944, Croat air groups were defending Yugoslavia from British and American air raids, and in the final months of the war a handful of surviving pilots fought on until final defeat in May 1945.

Courage Alone Chris Dunning,2009 Derided by Allied propaganda which made it out to be an air force equipped solely with elderly biplanes, ineffective in attack or always in retreat, the Regia Aeronautica was overshadowed by its more ruthless Axis partner, the Luftwaffe. Using research from a mass of original documentation, including personal accounts and combat diaries, the author takes an objective view and shows that the men who flew the Macchis, Fiats, and Savoias were no less skilled or determined than their opponents. The book discusses area commands, theaters, squadron allocations, anti-shipping operations, aircrew, and details of the top fighter aces. Comprehensive tables provide information on aircraft equipment, squadron allocation, and unit histories. With drawings from original aircraft handbooks, almost 250 photographs, more than 100 color profiles, and unit badges, *Courage Alone* provides a detailed reference source for historians, modelers, and enthusiasts alike.

Command Of The Air General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Regia Aeronautica Chris Dunning,2010 This new highly illustrated and comprehensive book covers the history of the Italian Regia Aeronautica (Italian Air Force) from 1940 to 1943—an area of aviation history of increasing interest to historians, enthusiasts, and modelers. The book covers the aircraft, camouflage, and markings of the various aviation arms of the Italian Regia Aeronautica. Its machines were invariably colorfully camouflaged for tropical and over-water use and richly emblazoned with individual, tactical, and unit markings, making for popular modeling subjects. They flew in several operational theatres between 1940 and 1943 including France, Belgium, Yugoslavia, Russia, and Greece, and produced a number of flying aces such as Teresio Martinoli, Franco Lucchini, Leonardo Ferrulli, and Franco Bordoni-Bisleri. All aircraft are covered—day fighters, bombers, dive-bombers and

ground-attack units, and maritime and transport aircraft. This is an ideal volume of reference for aviation modelers, particularly those with a specific interest in Italian aviation.

What Were They Like to Fly? Derrick Harry Clarke, 1964

Flight Plan Africa John P. Cann, 2015-05-19 Following the 1952 reorganization of the Portuguese Air Force from the army and naval air arms, Portugal now had an entity dedicated solely to aviation that would bring it into line with its new NATO commitment. As it proceeded to develop a competence in modern multiengine and jet fighter aircraft for its NATO role and train a professional corps of pilots, it was suddenly confronted in 1961 with fighting insurgencies in all three of its African possessions. This development forced it to acquire an entirely new and separate air force, the African air force, to address this emerging danger. This is the story of just how Portuguese leadership anticipated and dealt with this threat, and how it assembled an air force from scratch to meet it. The aircraft available at the time were largely castoffs from the larger, richer, and more sophisticated air forces of its NATO partners and not designed for counterinsurgency. Yet Portugal adapted them to the task and effectively crafted the appropriate strategies and tactics for their successful employment. The book explores the vicissitudes of procurement, an exercise fraught with anti-colonial political undercurrents, the imaginative modification and adaptation of the aircraft to fight in the African theaters, and the development of tactics, techniques, and procedures for their effective employment against an elusive, clever, and dangerous enemy. Advances in weaponry, such as the helicopter gun ship, were the outgrowth of combat needs. The acquired logistic competences assured that the needed fuel types and lubricants, spare parts, and qualified maintenance personnel were available in even the most remote African landing sites. The advanced flying skills, such as visual reconnaissance and air-ground coordinated fire support, were honed and perfected. All of these aspects and more are explored and hold lessons in the application of airpower in any insurgency today.

Showstopper! G. Pascal Zachary, 2014-04-01 This “inside account captures the energy—and the madness—of the software giant’s race to develop a critical new program. . . . Gripping” (Fortune Magazine). Showstopper is the dramatic, inside story of the creation of Windows NT, told by Wall Street Journal reporter G. Pascal Zachary. Driven by the legendary David Cutler, a picked band of software engineers sacrifices almost everything in their lives to build a new, stable, operating system aimed at giving Microsoft a platform for growth through the next decade of development in the computing business. Comparable in many ways to the Pulitzer Prize-winning book *The Soul of a New Machine* by Tracy Kidder, Showstopper gets deep inside the process of software development, the lives and motivations of coders and the pressure to succeed coupled with the drive for originality and perfection that can pull a diverse team together to create a program consisting of many hundreds of thousands of lines of code.

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

In the Skies of Europe Hans Werner Neulen, 2005-10-21 During the Second World War the air forces and pilots of the countries allied to Germany played a greater role than hitherto conceded by historians. In this book, Hans Werner Neulen has gathered an enormous amount of information on the

air forces of eight countries and the various foreign airmen [including Russian] who fought with the Luftwaffe. Their operations, mostly carried out in conditions of numerical inferiority, their successes and failures, as well as the motivation of the aircrew and their often tragic fate are all incorporated into this comprehensive account.

Finnish Aces of World War 2 Kari Stenman,2012-10-20 Always outnumbered by their Soviet counterparts, the small band of Finnish fighter pilots who defended their Scandinavian homeland from the 'communist hordes' in three separate wars between 1939 and 1945 amassed scores only bettered by the Luftwaffe's Jagdflieger. Initially equipped with a motley collection of biplane and monoplane fighters garnered from sources across the globe, the Finnish Air Force was thrust into combat in November 1939. Given little chance against the massive Soviet force, the Finnish fighter pilots confounded the sceptics and decimated the attacking fighter and bomber formations, prompting the Russians to call a halt in March 1940. This scenario was repeated in 1941, and by 1943 the Finns had become uneasy allies with the Germans. Complete with first-hand accounts and detailed colour illustrations, this book profiles aces like Juutilainen and Wind, who proved unbeatable in the final months of conflict.
