Tinderbox: The Untold Story of the Up Stairs Lounge Fire and the Rise of Gay Liberation Robert W. Fieseler, 2018-06-05 Winner • Edgar Award (Best Fact Crime) Winner • Lambda Literary's Judith A. Markowitz Award for Emerging LGBTQ Writers Finalist • Housatonic Book Award (Nonfiction) Finalist • Randy Shilts Award for Gay Nonfiction A Stonewall Honor Book in Nonfiction (American Library Association) Best Book of the Year: Kirkus Reviews, Library Journal and Shelf Awareness An essential work of American civil rights history, *Tinderbox* mesmerizingly reconstructs the 1973 fire that devastated New Orleans' subterranean gay community. Buried for decades, the Up Stairs Lounge tragedy has only recently emerged as a catalyzing event of the gay liberation movement. In revelatory detail, Robert W. Fieseler chronicles the tragic event that claimed the lives of thirty-one men and one woman on June 24, 1973, at a New Orleans bar, the largest mass murder of gays until 2016. Relying on unprecedented access to survivors and archives, Fieseler creates an indelible portrait of a closeted, blue-collar gay world that flourished before an arsonist ignited an inferno that destroyed an entire community. The aftermath was no less traumatic—families ashamed to claim loved ones, the Catholic Church refusing proper burial rights, the city impervious to the survivors' needs—revealing a world of toxic prejudice that thrived well past Stonewall. Yet the impassioned activism that followed proved essential to the emergence of a fledgling gay movement. *Tinderbox* restores honor to a forgotten generation of civil-rights martyrs.

The Fieseler Fi 156 Storch Jan Forsgren,2021-02-19 The innovative Fi 156 was the progenitor of today's STOL aircraft. Operated in large by the German Luftwaffe, it also saw service with more than 20 other air arms. Post-war, the Fi 156 continued in production in Czechoslovakia and France. Many were used in French Indochina. Today, the Fi 156 is a highly valued vintage aircraft.

Unwavering Margo Fieseler,2018-09-07 Consider it pure joy! Though hundreds of women gather weekly to hear Margo Fieseler

teach them how to love and live God's Word, the details of her life before Christ are largely unknown. Most people see the compelling Christian teacher running a non-profit that opens the door for people to know Jesus personally, passionately, powerfully, and pre-eminently. But, there was life before Jesus. In this life-story devotional learn how salvation radically changed one woman's life, healed a marriage and family, and restored a soul as only God can do. In addition to an authentic and vulnerable narrative, you'll be able to study the Bible's application in your own life through devotions and journaling. Discover the key to walking victoriously, rather than in woundedness. God isn't done with Margo and He's not done with you. Nourish an unwavering faith as you learn to "do the next right thing" in your walk with God.

Fieseler 156 Storch 1938-1945 Dariusz Karnas, 2012-04-19 The Fieseler Fi 156 Storch (stork) was a German liaison aircraft built before and during World War II, and even post war in France. It remains famous to this day for its excellent STOL performance and remarkable wartime exploits. This book describes in detail the technical aspects of the aircraft, its design and development. All wartime versions are described in detail. It contains: scale plans in 1/72nd, 1/48th and 1/35th scales; photos and drawings from Technical Manuals; superb color illustrations of camouflage and markings; rare b+w archive photographs; color photos of preserved aircraft. Dariusz Karnas is a skilled modeler and amateur aviation historian. He lives in Sandomierz, Poland.

Concentration Compactness Kyril Tintarev, Karl-Heinz

Fieseler, 2007-01-10 Concentration compactness is an important method in mathematical analysis which has been widely used in mathematical research for two decades. This unique volume fulfills the need for a source book that usefully combines a concise formulation of the method, a range of important applications to variational problems, and background material concerning manifolds, non-compact transformation groups and functional spaces. Highlighting the role in functional analysis of invariance and, in particular, of non-compact transformation groups, the book uses the same building blocks, such as partitions of domain and partitions of range, relative to transformation groups, in the proofs of energy inequalities and in the weak convergence lemmas. Contents: Functional Spaces and Convergence Sobolev Spaces Weak Convergence Decomposition Concentration Compactness with Euclidean Shifts Concentration Compactness with Dilations Minimax Problems Differentiable Manifolds Riemannian Manifolds and Lie Groups Sobolev Spaces on Manifolds and Subelliptic Problems Further Applications Readership: Researchers and graduate students in analysis and functional analysis. Keywords: Concentration Compactness; Weak Convergence; Critical Point Theory; Sobolev Inequalities; Subelliptic Operators; Hilbert Spaces; Partial Differential Equations; Unbounded Domains; Critical Nonlinearities Key Features: The first book to formalize concentration compactness as a theorem in functional analysis A self-contained compendium for frequently used portions of functional analysis, group theory and differential geometry Covers novel results as well as theorems (with simplified proofs) that are improvements on statements in the literature Includes a chapter on subelliptic Sobolev inequalities —

probably the first presentation of the topic in a textbook format Usable both as a graduate textbook and as a reference for researchers Accessible to readers of different mathematical profiles Reviews: "The book is very well written, the arguments are complete and many illustrative examples are given. It can be helpful to all: beginners as well as advanced researchers who want to deepen their knowledge and develop correct intuition about the topic discussed." Mathematical Reviews

Fieseler Fi 103R David Myhra, 2001 The Fi 103 V-1 was the world's first practical cruise missile. The manned V-1s, the Fi 103R - known as the Reichenburg - were developed as a measure to continue the use of the V-1s after the Allies destroyed the missile's launch sites. Only about 175 manned V-1s were constructed, converted from existing new V-1s yet not a single machine was ever flown against an Allied target because the program was canceled in October 1944. Here is the complete story. AUTHOR:

warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Entwickelt und gebaut wurde es in den Gerhard-Fieseler-Werken in Kassel aufgrund einer Ausschreibung für ein Kurzstart- und -landeflugzeug mit Langsamflugeigenschaften. Der Storch, wie er wegen seines hochbeinigen Fahrgestells genannt wurde, war das Standard-Kurier- und Verbindungsflugzeug der deutschen Luftwaffe im Zweiten Weltkrieg. Er wurde zudem als Beobachtungs- und Sanitätsflugzeug eingesetzt. Er wurde auch an die Luftwaffen Finnlands, Italiens, Bulgariens, Kroatiens, Ungarns, Rumäniens, der Slowakei und der Schweiz geliefert. Dieses Buch schildert die Entwicklung und Einsätze dieses ungewöhnlichen Flugzeugs. Umfangreiches Bildmaterial und technische Beschreibungen

Imago Dei Nick Fieseler, 2012-10-01 Throughout the course of human history, tension has existed between science and faith. The result of this has often been the separation of humanity's understanding of the natural world and their belief in God. But this need not be the case. In *Imago Dei*, the apparent contradiction existing between man's evolutionary origins and his faith in God is eliminated in favor of answering the more important and fundamental question: What does it mean for mankind to be made in the image of God? Next, the evolutionary development of the human species is united to the basic human belief in the existence of God to develop a philosophical union between science and faith. Only by recognizing the reality of their evolutionary beginning and embracing their spiritual union with God is it possible for humanity to achieve a genuine human status as the sole creatures bearing the image of God. Through this new understanding of the uniqueness of the human species in relation to the rest of the animal kingdom, it becomes possible to assign ethical value and meaning to *Homo sapiens'* actions as the creatures who bears the image of the Creator. This is evident in the topics explored in *Imago Dei*: NN Humans have an introspective self-consciousness that is not found in any other species. NN Mankind can recognize an existence beyond the present. NN Humanity can come to the conclusion that there is a Being greater than themselves in which their own being is grounded. NN Theologically, *Homo sapiens* assume the top branch on the tree of evolutionary development. NN Human beings can exercise self-control and are not solely focused on survival. This philosophical work provides refreshing insight about the apparent tension between science and faith, as well as what it means to be created in the image of God, the

Imago Dei.
