Propaganda Postcards of the Luftwaffe James Wilson, 2007-03-30 *Propaganda Postcards of the Luftwaffe* focuses on the efforts of the powerful Nazi propaganda machine to promote the technical achievements and might of the then newly created German airforce. The Luftwaffe had been announced to the world in March 1935, despite the restrictions contained in the Versailles Treaty signed after the First World War denying Germany the right to develop military aircraft. All major aircraft types used by the Luftwaffe together with many lesser known, obscure and secondary types are represented in this book. There is a section covering the main figures of the Luftwaffe and the leading aces who flew the aircraft. The German Air and Propaganda ministries worked together and, using professional photographers produced quality images, which were then made available to the general public in an attempt to inspire the nation and create strong moral.

German and Italian Aircraft Carriers of World War II Ryan K. Noppen, Douglas C. Dildy, 2022-05-26 This fully illustrated study details Germany and Italy's failed development of World War II aircraft carriers, and the naval aviation ships that the two Axis powers sent into action in their place. The quest for a modern aircraft carrier was the ultimate symbol of the Axis powers' challenge to Allied naval might, but fully-fledged carriers proved either too difficult, expensive or politically unpopular for either to make operational. After the Anglo-German Naval Agreement of 1935, Hitler publicly stated his intention to build an aircraft carrier, the *Graf Zeppelin*, which was launched in 1938. A year later, the ambitious fleet-expansion Z-Plan, was unveiled with two additional aircraft carriers earmarked for production. However, by the beginning of World War II, *Graf Zeppelin* was not yet completed and work was halted. Further aircraft carrier designs and conversion projects such as the ocean liner *Europa* and heavy cruiser *Seydlitz* were considered but, in January 1943, all construction work on surface vessels ceased and naval resources were diverted to the U-boat Campaign. This book explains not only the history of Germany's famous *Graf Zeppelin* fleet carrier and German carrier conversion projects but also Italy's belated attempt to convert two of her ocean liners into carriers. It considers the role of naval aviation in the two countries' rearmament programmes and describes how ultimately it was only Italian seaplane carriers and German ocean-going, catapult-equipped flying boat carriers that both Axis powers did eventually send into combat.

Torpedo Bombers, 1900-1950 Jean-Denis Lepage, 2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the *Bismarck* and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the *Swordfish*, *Beaufighter* and *Avenger*. Over 300 aircraft are beautifully illustrated.

An Illustrated Dictionary of the Third Reich Jean-Denis G.G. Lepage, 2013-12-24 This dictionary gives an enormous amount of basic information on the Third Reich era by listing, and often depicting, German terms connected to Nazism and the Germany of World War II. It includes ranks, badges, insignia, regalia, medals, flags and banners, weapons, uniforms, equipment, vehicles, fortifications, airplanes, battleships, main Nazi concepts and organizations, slogans, sayings, code names, nicknames, slang words, places of importance, events and battles, treaties and alliances, industry and economics, justice, art, religion, education, political parties, newspapers, laws, institutions, and short biographies of Nazi leaders. To make the rise of Nazism comprehensible, aspects of the Weimar Republic have also been considered. In all there are 1,650 entries and 234

illustrations.

The Axis Air Forces Frank Joseph, 2011-11-29 This comprehensive volume tells the rarely recounted stories of the numerous foreign air forces that supported the German Luftwaffe as part of the Axis' quest to dominate the European and Pacific theaters—a highly compelling and often overlooked chapter of World War II history. The Axis Air Forces: Flying in Support of the German Luftwaffe presents an untold history of that global conflict's little-known combatants, who nonetheless contributed significantly to the war's outcome. While most other books only attempt to address this subject in passing, author Frank Joseph provides not only an extremely comprehensive account of the unsung heroes of the Axis fliers, but also describes the efforts of Axis air forces such as those of the Iraqi, Manchurian, Thai or Chinese—specific groups of wartime aviators that have never been discussed before at length. This book examines the distinct but allied Axis air forces of Western Europe, Eastern Europe, the Middle East, and Asia. An extensive introduction provides coverage of Luftwaffe volunteers from Greece, Lithuania, Holland, Denmark, Norway and even the United States. Detailed descriptions of the personnel themselves and the aircraft they operated are portrayed against the broader scope of combat missions, field operations, and military campaigns, supplying invaluable historical perspective on the importance of their sorties.

Secret Projects of the Kriegsmarine Alessio Sgarlato, Nico Sgarlato, 2022-05-30 The Secret Projects of the German Kriegsmarine in World War II gives a comprehensive overview of advanced German naval building, and excitingly includes previously unseen, secret projects. This book is relatively short, yet densely packed with historical naval insight. It will thus appeal to the busy reader interested in boat modeling, or indeed anyone who is fascinated with naval warfare. The designs covered by the title are wide-ranging, from U-boats and hydrofoils, to submarines, explosive motorboats and even aircraft carriers. Not simply presenting information on functioning prototypes, this book highlights a number of theoretical projects for hydrofoils, landing craft and heavy surface units, among many others. Also included are technical examinations of the 'Z-Plan' Kriegsmarine build up and the ill-fated Graf Zeppelin, which was abandoned halfway through the war, amid wrangling between the Kriegsmarine and Luftwaffe. Secret Projects of the German Kriegsmarine in World War II features little-studied designs, like tracked amphibious vehicles equipped with breathing gear, as well as the Luftwaffe-designed Siebel ferries that saw considerable service on the Eastern front. All the information is extremely well-illustrated, being accompanied by detailed drawings, action-packed photographs and artist's impressions of the different crafts. The historical snapshots, combined with modern, labeled drawings, help to put the past in perspective and bring to life the naval building projects.

The Luftwaffe and the War at Sea David C. Isby, 2017-11-30 The Luftwaffe and the War at Sea is a collection of fascinating accounts written by German military officers - both Kriegsmarine and Luftwaffe - about the naval war in the air in the North Atlantic and around Great Britain. Most of the documents were written immediately post-war as part of the Allied debriefing programme. However, some are wartime German originals produced for internal use by military staff, but all have the value of immediacy; they were written when memories were fresh and, in many cases, by those who were directly caught up in the action. These men were personally involved in all aspects of the German attempts to control the seas through maritime power, from the use of Ju 87 Stuka dive-bombers during the invasion of Norway to the missions of FW 200 Condors in cooperation with the U-boat

campaign against Britain's Atlantic lifelines. The writers include such well-known names as Grossadmiral Karl Doenitz, Kontreadmiral Gerhard Wagner, General der Flieger, Ulrich O. E. Kessler and Vizeadmiral Eberhard Weichold. The history recounted in these reports is unique and first-hand, allowing the reader a fresh perspective on those famous campaigns. Furthermore, much of that wartime experience was harnessed during the formation of the Bundersmarine's Marineflieger in the 1950s that then served throughout the Cold War. Today it still participates in the global war on terror with its Atlantic marine patrols.

Military Intelligence United States. War Department, 1942

Luftwaffe Over America Manfred Griehl, 2016-03-30 The plans that Nazi Germany had to raid - and bomb - New York and the eastern seaboard are revealed in this book. They were based on the use of transoceanic aircraft planes, such as the six-engined Ju 390, Me 264 or Ta 400, but the Third Reich was unable to produce such machines in sufficient numbers. If the Soviet Union had been conquered, however, these plans would have become a reality. With the seizure of vital resources from the Soviet Union the Wehrmacht would have had enough fuel and material to mass-produce giant bomber aircraft: it was a near run thing. The collapse of the Wehrmacht infrastructure and the end of the Thousand-Year Reich ensured that plans for long-range remote-controlled missiles never got off the drawing board and were never manufactured. Manfred Griehl makes it clear that until the collapse, numerous secret research laboratories seemed to have worked in parallel seeking nuclear power and explosives. Only classified material held within British, French and American archives can prove whether these groups were close to perfecting small atomic explosives. But, without a shadow of doubt, Germany was far more technologically advanced by the end of 1944 than has been previously suspected.

The Warplanes of the Third Reich William Green, 1970

Croatian Aces of World War 2 Boris Ciglic, Dragan Savic, 2013-01-20 Initially flying Italian-supplied Fiat G.50s, the Croat forces suffered heavy losses during 1942 whilst flying alongside JG 52 in the southern sector of the Russian front. Despite this, a significant number of kills fell to future aces such as Cvitan Galic and Mato Dubovak during this time, and when the units re-equipped with Bf 109G-10s in 1943, battle-seasoned Croat pilots started to rack up impressive scores. This book reveals how, by 1944, Croat air groups were defending Yugoslavia from British and American air raids, and in the final months of the war a handful of surviving pilots fought on until final defeat in May 1945.

Axis Warships Roy M. Stanley, 2011-10-05 For his latest book Colonel Roy Stanley presents aerial photographs of the German and Italian fleets that were selected as important six decades ago and have long lain dormant, unindexed and unexplained. Extensive use of aerial and other Intelligence imagery from long retired files would be enough to make this book a must for those intrigued by World War II intelligence and naval history. But it is the author's commentary that makes this work truly unique, thanks to his aerial photo interpretation experience, ability to provide Intelligence analysis, and academic background. Meticulously researched for ship identification, the eye of an experienced PI sees things others might miss, and the author tells us what he sees. Some of these photos may have appeared in contemporary documents but never with the insight presented in this book. We see warships under attack, at sea and in harbor as captured by photo reconnaissance. Analysis of selective enlargements adds to the understanding. Even the most devout follower of warships will learn something.

Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other

rarities.

Royal Air Force Flying Review ,1958

Hitler's Navy Gordon Williamson,2022-02-03 A complete illustrated study of the German Kriegsmarine throughout World War II. Hamstrung at first by the terms of the Treaty of Versailles, during the 1930s, the German Navy underwent a programme of rearmament in defiance of the restrictions, building modern warships under limitations which forced technological innovation. Submarines were strictly prohibited by the treaty, and yet, following years of covert development, they became one of the Kriegsmarine's most deadly weapons. Blooded in the Spanish Civil War, the surface ships of the Kriegsmarine went on to play a crucial role in the opening salvos of World War II during the invasions of Poland and Norway, although serious losses here set back plans for the invasion of Britain, and by the end of the war, only a handful of surface vessels remained to be divided up among the Allies. From the beginning of the war, but especially after the fall of France, the dreaded and extraordinarily successful U-boats stalked the Atlantic, threatening vital British shipping convoys and choking off the lifeline of munitions and supply from the US. Once Italy and Japan entered the war, German naval operations expanded to the Mediterranean and the Indian Ocean. This highly illustrated volume is a comprehensive study of the German Navy throughout the war, from pocket battleships to torpedo boats.

Tehran Children: A Holocaust Refugee Odyssey Mikhal Dekel,2019-10-01 Fleeing East from Nazi terror, over a million Polish Jews traversed the Soviet Union, many finding refuge in Muslim lands. Their story—the extraordinary saga of two-thirds of Polish Jewish survivors—has never been fully told. Author Mikhal Dekel's father, Hannan Teitel, and her aunt Regina were two of these refugees. After they fled the town in eastern Poland where their family had been successful brewers for centuries, they endured extreme suffering in the Soviet forced labor camps known as "special settlements." Then came a journey during which tens of thousands died of starvation and disease en route to the Soviet Central Asian Republics of Uzbekistan and Kazakhstan. While American organizations negotiated to deliver aid to the hundreds of thousands of Polish Jews who remained there, Dekel's father and aunt were two of nearly one thousand refugee children who were evacuated to Iran, where they were embraced by an ancient Persian-Jewish community. Months later, their Zionist caregivers escorted them via India to Mandatory Palestine, where, at the endpoint of their thirteen-thousand-mile journey, they joined hundreds of thousands of refugees (including over one hundred thousand Polish Catholics). The arrival of the "Tehran Children" was far from straightforward, as religious and secular parties vied over their futures in what would soon be Israel. Beginning with the death of the inscrutable Tehran Child who was her father, Dekel fuses memoir with extensive archival research to recover this astonishing story, with the help of travel companions and interlocutors including an Iranian colleague, a Polish PiS politician, a Russian oligarch, and an Uzbek descendent of Korean deportees. The history she uncovers is one of the worst and the best of humanity. The experiences her father and aunt endured, along with so many others, ultimately reshaped and redefined their lives and identities and those of other refugees and rescuers, profoundly and permanently, during and after the war. With literary grace, *Tehran Children* presents a unique narrative of the Holocaust, whose focus is not the concentration camp, but the refugee, and whose center is not Europe, but Central Asia and the Middle East.
