The First Men in the Moon H.G. Wells,2005-03-31 When penniless businessman Mr Bedford retreats to the Kent coast to write a play, he meets by chance the brilliant Dr Cavor, an absent-minded scientist on the brink of developing a material that blocks gravity. Cavor soon succeeds in his experiments, only to tell a stunned Bedford the invention makes possible one of the oldest dreams of humanity: a journey to the moon. With Bedford motivated by money, and Cavor by the desire for knowledge, the two embark on the expedition. But neither are prepared for what they find - a world of freezing nights, boiling days and sinister alien life, on which they may be trapped forever.

The First Men Who Went to the Moon Rhonda Gowler Greene,2019-03-15 In 1961, President John F. Kennedy issued a challenge to the nation: land astronauts on the moon by the end of the decade. The Apollo program was designed by NASA to meet that challenge, and on July 16, 1969, Apollo 11 lifted off from Kennedy Space Center carrying astronauts Neil Armstrong, Michael Collins, and Edwin Aldrin. Apollo 11's prime mission objective: Perform a manned lunar landing and return. Four days after take-off, the Lunar Module Eagle, carrying Armstrong and Aldrin, separated from the Command Module Columbia, and descended to the moon. Armstrong reported back to Houston's Command Center, The Eagle has landed. America and the world watched in wonder and awe as a new chapter in space exploration opened. Through verse and informational text, author Rhonda Gowler Greene celebrates Apollo 11's historic moon landing.

The First Men on the Moon David M. Harland,2007-10-14 This book tells the story of Apollo 11 and dispels the myth that NASA faked the moon landings. The story is brought to life by exploiting the flight plan, mission report, in-flight transcripts (including conversations among the crew in the spacecraft that were not transmitted) and post-flight debriefing. It features scans recently produced by NASA of the original Hasselblad film. The final chapters discuss what was learned of the moon rocks, and reviews the follow-on missions. The author's impressive expertise and knowledge of the Moon landings shines through and seamlessly unites the myriad details of the mission.

Apollo 11 and the First Men on the Moon Eric Keppeler,2018-07-15 When Apollo 11 launched from Cape Kennedy on July 16, 1969, 530 million viewers watched Commander Neil Armstrong and pilots Michael Collins and Edwin Buzz Aldrin leave Earth with bated breath. This book relates the significant parts of that momentous journey, including the first color TV transmission to Earth, and the 21 hours, 36 minutes that Armstrong and Aldrin spent on the moon's surface. Bourgeoning scientists will be enthralled by this captivating history of the Apollo 11 adventure, which incorporates key social studies and science concepts.

Rocket Men Craig Nelson,2009-06-25 A New York Times Bestseller Celebrates a bold era when voyaging beyond the Earth was deemed crucial to national security and pride. -The Wall Street Journal Restoring the drama, majesty, and sheer improbability of an American triumph, this is award-winning historian Craig Nelson's definitive and thrilling story of man's first trip to the moon. At 9:32 a.m. on July 16, 1969, the Apollo 11 rocket launched in the presence of more than a million spectators who had gathered to witness a truly historic event. Through interviews, 23,000 pages of NASA oral histories, and declassified CIA documents on the space race, Rocket Men presents a vivid narrative of the moon mission, taking readers on the journey to one of the last frontiers of the human imagination.

The First Men in the Moon H. G. Wells,2012-07-16 The First Men In The Moon

Maps of Utopia Simon J. James,2012-02-02 This is the first study of the literary theories of H. G. Wells, the founding father of English science fiction and once the most widely read writer in the world. It explores his entire career, during which he produced popular science, educational theory, history, politics, and prophecy, as well as realist, experimental, and science fiction.

Men on the Moon Simon J. Ortiz,1999-07 When Faustin, the old Acoma, is given his first television set, he considers it a technical wonder, a box full of mystery. What he sees on its screen that first day, however, is even more startling than the television itself: men have landed on the moon. Can this be real? For Simon Ortiz, Faustin's reaction proves that tales of ordinary occurrences can truly touch the heart. For me, he observes, there's never been a conscious moment without story. Best known for his poetry, Ortiz also has authored 26 short stories that have won the hearts of readers through the years. Men on the Moon brings these stories together—stories filled with memorable characters, written with love by a keen observer and interpreter of his people's community and culture. True to Native American tradition, these tales possess the immediacy—and intimacy—of stories conveyed orally. They are drawn from Ortiz's Acoma Pueblo experience but focus on situations common to Native people, whether living on the land or in cities, and on the issues that affect their lives. We meet Jimmo, a young boy learning that his father is being hunted for murder, and Kaiser, the draft refuser who always wears the suit he was given when he left prison. We also meet some curious Anglos: radicals supporting Indian causes, scholars studying Indian ways, and San Francisco hippies who want to become Indians too. Whether telling of migrants working potato fields in Idaho and pining for their Arizona home or of a father teaching his son to fly a kite, Ortiz takes readers to the heart of storytelling. Men on the Moon shows that stories told by a poet especially resound with beauty and depth.

First Man James R. Hansen,2012-11-27 On July 20, 1969, the world stood still to watch American astronaut Neil A. Armstrong become the first person ever to step on the surface of another heavenly body. Upon his return to Earth, Armstrong was celebrated for his monumental achievement. He was also--as NASA historian Hansen reveals in this authorized biography--misunderstood. Armstrong's accomplishments as an engineer, a test pilot, and an astronaut have long been a matter of record, but

Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects (including more than fifty hours with Armstrong himself) yield the first in-depth analysis of this elusive, reluctant hero.

Reaching for the Moon Katherine Johnson, 2020-05-05 "This rich volume is a national treasure." –Kirkus Reviews (starred review) "Captivating, informative, and inspiring...Easy to follow and hard to put down." –School Library Journal (starred review) The inspiring autobiography of NASA mathematician Katherine Johnson, who helped launch Apollo 11. As a young girl, Katherine Johnson showed an exceptional aptitude for math. In school she quickly skipped ahead several grades and was soon studying complex equations with the support of a professor who saw great promise in her. But ability and opportunity did not always go hand in hand. As an African American and a girl growing up in an era of brutal racism and sexism, Katherine faced daily challenges. Still, she lived her life with her father's words in mind: "You are no better than anyone else, and nobody else is better than you." In the early 1950s, Katherine was thrilled to join the organization that would become NASA. She worked on many of NASA's biggest projects including the Apollo 11 mission that landed the first men on the moon. Katherine Johnson's story was made famous in the bestselling book and Oscar-nominated film *Hidden Figures*. Now in *Reaching for the Moon* she tells her own story for the first time, in a lively autobiography that will inspire young readers everywhere.

The First Men in the Moon (Illustrated Edition) H. G. Wells, 2022-01-17 *The First Men in the Moon* is a scientific story by H. G. Wells, published in hardcover in 1901. The novel tells the story of two protagonists: a businessman narrator, Mr. Bedford, and an eccentric scientist, Mr. Cavor, who undertake a journey to the Moon. Upon reaching the Moon, Bedford and Cavor discover that the Moon is inhabited by a sophisticated extraterrestrial civilization of insect-like creatures they call Selenites. They get into a range of exciting adventures ending in establishing radio contact between the Earth and the Moon. This story is fascinating as it describes a spacecraft and a feeling of weightlessness long before the actual construction of the first spaceship and experiencing the absence of gravity in the open space. Also, H.G. Wells mentions the radio experiences of Nicolas Tesla and other scientists, which become personages of this story. It is a renowned classic of science fiction worth attention.

A Man on the Moon Andrew Chaikin, 2007-08-28 The authoritative masterpiece (L. A. Times) on the Apollo space program and NASA's journey to the moon This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history. The astronauts themselves have called it the definitive account of their missions. On the night of July 20, 1969, our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon. Based on in-depth interviews with twenty-three of the twenty-four moon voyagers, as well as those who struggled to get the program moving, *A Man on the Moon* conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail. *A Man on the Moon* is also the basis for the acclaimed miniseries produced by Tom Hanks, *From the Earth to the Moon*, now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11.

Neil Armstrong and Buzz Aldrin Charles River Editors, 2019-05-30 *Includes pictures *Includes a bibliography for further reading I guess we all like to be recognized not for one piece of fireworks, but for the ledger of our daily work. - Neil Armstrong Some things just can't be described. And stepping onto the moon was one of them. - Buzz Aldrin At 9:32 a.m. on July 16, 1969, time stood still throughout the world, as thousands converged on the Kennedy Space Center and millions tuned in on live television. At that instant, the first rumbles began to shake the ground, as a small spacecraft attached to the giant Saturn V rocket several hundred feet tall started lifting off. Quickly being propelled several thousand miles per hour, it takes just a few minutes to reach a speed of 15,000 miles per hour, and just a few more minutes to enter orbit at 18,000 miles per hour. Apollo 11 was on its way to a historic first landing on the Moon. Apollo 11's trip to the Moon may have started on that day in 1969, but the journey had begun over a decade earlier as part of the Space Race between the United States and the Soviet Union. While landing on the Moon was a noble goal proposed as early as 1961 by President Kennedy, NASA and the nation as a whole moved with urgency simply to best the Soviet Union, which had spent the 1950s beating America to important space-related firsts, including launching the first satellite and cosmonaut in orbit. In fact, President Eisenhower's administration began the design for the Apollo program in 1960 in hopes of getting a head start to the Moon, despite the fact the plans originated a year before the first Russian cosmonaut, Yuri Gagarin, orbited the Earth and two years before John Glenn did. Over the decade, NASA would spend tens of billions on the Apollo missions, the most expensive peacetime program in American history to that point, and even though Apollo 11 was only one of almost 20 Apollo missions, it was certainly the crown jewel. only one of nearly 20 Apollo missions conducted by NASA. And to make Apollo 11 a success, it would take nearly a decade of planning by government officials, hard work by NASA scientists, intense training by the astronauts, and several missions preceding Apollo 11. It also cost over \$20 billion, making the Apollo program the most expensive peacetime program in American history at the time. When the Apollo program reached its pinnacle, the man at the center of it was Neil Armstrong, a farm boy and pilot who rose from a hardworking rural home to become the first to set foot on the Moon and utter one of the 20th century's most famous phrases: That's one small step for man, one giant leap for mankind. Armstrong did so through education, first in high school and later at Purdue University, a lot of hard work as a pilot during and after the Korean War, and some luck, coming of age at a moment when the Space Race was in full effect. After reaching the peak of his fame and career at the young age of 40, Armstrong spent the second half of his life as he had the first, working hard and serving his country. In doing so, he serves as one of the best examples of national pride and service that America has ever known. Alongside him was Buzz Aldrin, which was somewhat fitting given his family's past. His father was a military test pilot, and Aldrin would follow a similar path on his way to becoming a member of the Gemini program and ultimately the Apollo 11 mission. Despite reaching the peak of his fame and career before the age of 40, Aldrin has continued to work in the field and has

been one of the most effective advocates of further space travel, particularly to Mars. Neil Armstrong and Buzz Aldrin: The Lives and Careers of the First Men on the Moon profiles both astronauts and the most memorable space mission in history. Along with pictures of important people, places, and events, you will learn about Neil Armstrong and Buzz Aldrin like never before.

First on the Moon Rod Pyle,2019-04-02 “Iconic images of the Space Age . . . a narrative that takes the Apollo 11 story up to the present, supplemented by moonwalker Buzz Aldrin’s foreword.” –GeekWire Acclaimed science author Rod Pyle (Missions to the Moon) returns with a beautiful and insightful book commemorating Apollo 11. First on the Moon offers an exciting behind-the-scenes look at America’s journey to the Moon—from the space race to the landing on the Sea of Tranquility to splashdown on Earth and the aftermath. Pyle spent years combing NASA archives and private collections for memorabilia from the mission, and the book includes everything from accessible explanations of the enormous challenges facing NASA to reproductions of original 1969 documents. It also features a number of specially commissioned photocompositions created from NASA Apollo images released in 2015. Many were parts of photomontages taken by the astronauts, and these compositions have now been carefully restored to their originally intended montage formats. With compelling firsthand accounts and a gripping narrative, this gorgeously designed volume fully immerses readers in the Space Age. Includes a foreword by Buzz Aldrin, and exclusive interviews with the adult children of the Apollo 11 astronauts. “Combines firsthand accounts of the mission, archival photos, reproductions of mission documents and more to tell the story of the Apollo program, the technology created to make it happen and the forces driving it . . . Experienced space writer (and Space.com contributor) Rod Pyle weaves it all together with a deft hand to tell the story of an era.” –Space.com
