US Flamethrower Tanks of World War II Steven J. Zaloga,2013-10-20 The US Army and Marine Corps experimented with a wide range of flame-thrower tanks through World War II in both the European and Pacific theaters. Although the US Army deployment of flame-thrower tanks in the ETO was problematic at best, flamethrowers were much more widely used in the Pacific theater and became ubiquitous by 1945, including an entire Army flamethrower tank battalion on Okinawa in 1945, the largest single use of flamethrower tanks in World War II. This will cover the initial attempts at the use of auxiliary flamethrowers by both the US Army and Marine Corps in 1943, the standardized adoption of the Satan flamethrower tank by the Marines in 1944, the development of main gun flamethrowers by the Marines and US Army based on the POA-CWS designs, and the myriad other types tested in combat including the powerful LVT-4 design using Navy flamethrowers at Peleliu in 1944. Due to the extensive Japanese use of fortifications in the final year of the Pacific war, Flamethrower tanks became one of the most important solutions in American tactics.

Hearts of Iron Jerry Ravino,Jack Carty,2011-02-21 HEARTS OF IRON is the epic true story of a little-known but significant part of the Korean War, told by the brave men of the Flame Platoon, First Tank Battalion, First Marine Division. This book shares the honest, personal accounts of combat, fear, death, and survival of these comrades of the Forgotten War, most of whom were not even trained to be Flame Tankers yet fought with weapons possessing some of the most lethal fire ability of any rolling armament in the war. Join Jerry Ravino and Jack Carty in their compelling narrative of their flame platoon as they courageously stood against the North Korean People's Army and the Chinese Communist Forces, etching another brilliant chapter in the Division's storied history.

Flame Dragons of the Korean War Jerry Ravino,Jack Carty,2003 This book is the result of collaboration by Jerry Ravino and Jack Carty, veterans of the Korean War with the Flame Platoon, Headquarters Company, First Tank Battalion, First Marine Division, who did not meet until almost 50 years after what went down in history as the Forgotten War. Although the two former tankers served with the Flame Platoon in different places and different times in that conflict, it is a testament to their determination to research and record a part of the war that heretofore had not been chronicled in detail. Though it has been some 50 years past the fact, this is their story -- as memory best serves them and others who helped them tell it. Learn more about the FLAME DRAGONS @ www.flamedragons.com.

Portable Flame Thrower M2-2 United States. War Department,2019-11-25 This is a well-written manual for M2 flamethrower. The M2 flamethrower was an American portable backpack flamethrower that was used in World War II, the Korean War, and the Vietnam War. It was the successor to the M1 and M1A1 flamethrowers. Its burn time was around 7 seconds, and the flames were effective around 20-40 meters. It was one of the most effective weapons in the American army. It was introduced into service in 1944 and was first used in combat in Guam. It was after that employed in all Pacific campaigns. This manual provided excellent details about the weapon. It includes information on maintaining, cleaning, and repairing the M2 flamethrower with much more crucial knowledge.

Flammpanzer German Flamethrowers 1941-45 Hilary Doyle,1995-09-11 The first attempt at mounting a flamethrower in a German tank was not the result of an engineering design process but rather occurred as a field expedient, when German troops involved in the Spanish Civil War mounted small back-pack flamethrowers on their PzKpfw Is. The German authorities took up this idea and from early 1939 began to design a flamethrowing tank based on the Panzer II. This was the first in a long line of German tanks to be equipped with flamethrowers. During World War II versions of the Panzer III, Sturmgeschütz and half-track were all given flamethrowers. This book examines their development, weapons and operational use, often using original German combat reports.

Flame Thrower Andrew Wilson,2022-11-04 'One of the most vivid battle stories of the Second World War' SIR BASIL LIDDELL HART The only memoir by a Churchill Crocodile tank commander. This Spitfire Publishers 2022 edition features a new introduction by the author. Normandy, June 1944. Tank commander Andrew Wilson, a twenty-year-old lieutenant, is in charge of a troop of three British Churchill Crocodile flame-throwing tanks. The fearsome Crocodile was one of 'Hobart's Funnies' - top secret armoured vehicles designed to punch a hole through Hitler's Atlantic Wall defences during D-Day. But there was nothing remotely humorous about the Crocodile. This terror-weapon reduced German fortifications to raging infernos of clinging liquid fire in seconds, incinerating its occupants. It was truly a horrific weapon. The flame projector, firing a crude form of napalm, was also a powerful psychological weapon, so feared by the Germans that many surrendered after the first ranging shots. Andrew Wilson, MC, vividly describes battling across 1,800 miles of enemy-held territory, the vicious street-to-street fighting, the constant risk of ambush from anti-tank panzerfausts and 88s, Tiger and Panther tanks. From Noyers Ridge and the Falaise Gap through to the final confrontation at the Rhine, here is a first-hand account of tank warfare at its deadliest. ABOUT THE AUTHOR Andrew Wilson, MC, was an English journalist and writer whose career spanned the Daily Express, the BBC World Service to his long-term home at The Observer. Born in Herne Bay, Kent he volunteered on his 18th birthday and served in the Buffs (Royal East Kent Regiment) becoming a captain commanding a troop of Churchill Crocodile flame-throwing tanks from D-Day through France, Holland and into Germany. After the war he read PPE at Oxford University and embarked on his almost 40-year journalism career. He wrote several books including his first-hand account of his experiences as a tank commander, Flame Thrower, and as co-translator of Helmut Pabst's Eastern Front memoir, The Outermost Frontier: A German Soldier in the Russian Campaign ('A masterpiece' The Observer). He was awarded a PhD in military history from the Catholic University of Leuven in 2009. He died in 2020 aged 97.

Churchill Crocodile Flamethrower David Fletcher,2012-05-20 A fire-breathing monster on the battlefield, the Churchill Crocodile was one of the most awe-inspiring weapons of World War II. Tank expert David Fletcher chronicles the development of the flamethrower tank, examining the dramatic effect of these tanks in battle from use in France to the terrifying attack on the Senio River in Italy, as well as investigating the post-war use of Crocodiles to burn down and sterilise the site of Belsen concentration camp, and their mobilisation for the Korean War. Researched using the papers of Reginald Fraser the genius behind the flamethrowers and dramatically illustrated with detailed artwork and previously unpublished photographs, this book brings to life the true terror of these tanks.

Flame On John W. Mountcastle,2016-03-01 A concise history of the development and use of incendiary weapons--flamethrowers, incendiary bombs, napalm, and more--by the American military in the twentieth century, with a focus on World War II.

Flame Thrower Andrew Wilson,1984

The Flamethrower Chris McNab,2015-08-20 The focus of this book is a weapon that has literally placed the power of fire in human hands - the man-portable flamethrower. This formidable weapon first saw battlefield

use in the hands of German troops during World War I, and went on to arm the forces of many countries in World War II and beyond. Capable of inflicting horrific injuries – or of using up the oxygen supply inside a building, causing the occupants to suffocate – it projected a stream of flammable liquid, which could be 'bounced' off the interior surfaces of tunnels, buildings and other defended structures to reach deep inside a fortification. From its combat debut to its deployment in Vietnam, Chechnya and elsewhere, the flamethrower has proven to be devastatingly effective, not least because of its huge psychological impact on enemy troops. Yet despite this, the weapon and its operators have always been vulnerable, suffering from a very particular set of limitations, all of which are explored here. Featuring expert analysis, first-hand accounts and a startling array of illustrations and photographs, this is the definitive guide to an extraordinary chapter in the history of military technology.

American Tanks & AFVs of World War II Michael Green, 2014-07-20 The entry of the US into World War II provided the Allies with the industrial might to finally take the war to German and Japanese forces across the world. Central to this was the focus of the American military industrial complex on the manufacture of tanks and armoured fighting vehicles. Between 1939 and 1945, 88,140 tanks and 18,620 other armored vehicles were built – almost twice the number that Germany and Great Britain combined were able to supply. In this lavishly illustrated volume, armour expert Michael Green examines the dizzying array of machinery fielded by the US Army, from the famed M4 Sherman, M3 Stuart and M3 Lee through to the half-tracks, armored cars, self-propelled artillery, tank destroyers, armored recovery vehicles and tracked landing vehicles that provided the armoured fist that the Allies needed to break Axis resistance in Europe and the Pacific. Publishing in paperback for the first time and packed with historical and contemporary colour photography, this encyclopedic new study details the design, development, and construction of these vehicles, their deployment in battle and the impact that they had on the outcome of the war.

Armor, 1960

United States Tanks and Tank Destroyers of the Second World War Michael Green, 2021-12-30 This comprehensive and superbly illustrated book describes in authoritative detail the characteristics and contribution to victory of these formidable American fighting vehicles. Only after the Nazis invaded Poland and France did the United States Government authorize mass production of tanks. By the end of the War American industry had built nearly 90,000 tanks, more than Germany and Great Britain combined. The first big order in May 1940 was for 365 M2A4 light tanks, the initial iteration of the Stuart series, with almost 24,000 constructed. The Stuart series was supplemented by almost 5,000 units of the M24 Chaffee light tank. There was also the failed M22 Locust light tank intended for airborne operations. The M4 series of medium tanks, best known as the Sherman, were the most numerous with some 50,000 in service with not only the American military but British and other Allied armies. It was not until later in the war that the M26 Pershing heavy tank was built. Initially the US Army doctrine saw tanks as primarily for the exploitation role. Later the concept of tank destroyers evolved to counter large scale German armored offensives. These defensive AFVs included the half-track-based 75mm Gun Motor Carriage M3 and the full-tracked M10, M18, and M36. This comprehensive and superbly illustrated book describes in authoritative detail the characteristics and contribution to victory of these formidable fighting vehicles.

Colossus Reborn David M. Glantz, 2005 Beyond the battles themselves, Glantz also presents an in-depth portrait of the Red Army as an evolving military institution. Assessing more clearly than ever before the army's size, strength, and force structure, he provides keen insights into its doctrine, strategy, tactics, weaponry, training, officer corps, and political leadership. In the process, he puts a human face on the Red Army's commanders and soldiers, including women and those who served in units - security (NKVD), engineer, railroad, auto-transport, construction, and penal forces - that have till now remained poorly understood.--BOOK JACKET.

Tanks on Iwo Jima 1945 Romain Cansière, 2024-06-20 An award-winning US Marine Corps armor historian's account of the role of US and Japanese tanks on Iwo Jima. The battle of Iwo Jima is iconic and known for its brutality: this was the only battle in which the number of US casualties outnumbered those of the Japanese. But as is often the case with the Pacific campaigns, the tank action on the island has generally been overshadowed by that of infantry. The tank, however, played an important role as a support weapon – especially on the US side – despite the rough terrain and unconventional enemy tactics. Using unpublished official records and veterans' accounts, award-winning USMC armor specialist Romain Cansière sheds new light on Japanese and USMC armored operations on the island. This book offers new information on the battle in a complete, concise, and accessible format, and its illustrations include unpublished photographs from private collections and meticulously researched new color profiles, highlighting the tanks' modifications and their diverse camouflage and markings.

Marine Corps Tank Battles in Vietnam Oscar E. Gilbert, 2013-02-26 The author of *Tanks in Hell* tracks ten years of tank warfare in Vietnam, combining firsthand accounts from veterans with analysis of tactics and strategy. In 1965 the large, loud, and highly visible tanks of 3rd Platoon, B Company, 3rd Tank Battalion landed across a beach near Da Nang, drawing unwelcome attention to America's first, almost covert, commitment of ground troops in South Vietnam. As the Marine Corps presence grew inexorably, the 1st and 3rd Tank Battalions, as well as elements of the reactivated 5th Tank Battalion, were committed to the conflict. For the United States Marine Corps, the protracted and bloody struggle was marked by controversy, but for Marine Corps tankers it was marked by bitter frustration as they saw their own high levels of command turn their backs on some of the hardest-won lessons of tank-infantry cooperation learned in the Pacific War and in Korea. Nevertheless, like good Marines, the officers and enlisted men of the tank battalions sought out the enemy in the sand dunes, jungles, mountains, paddy fields, tiny villages, and ancient cities of Vietnam. Young Marine tankers fresh out of training, and cynical veterans of the Pacific War and Korea, battled two enemies. The battle-hardened Viet Cong were masters of the art of striking hard, then slipping away to fight another day. The highly motivated troops of the North Vietnamese Army, equipped with long-range artillery and able to flee across nearby borders into sanctuaries where the Marines were forbidden to follow, engaged the Marines in brutal conventional combat. Both foes were equipped with modern anti-tank weapons, and sought out the tanks as valuable symbolic targets. It was a brutal and schizophrenic war, with no front and no rear, absolutely no respite from constant danger, against a merciless foe hidden among a helpless civilian population. Some of the duties the tankers were called upon to perform were long familiar, as they provided firepower and mobility for the suffering infantry in a never-ending succession of search and destroy operations, conducted amphibious landings, and added their heavy guns to the artillery in fire support missions. Under constant threat of ambushes and huge command-detonated mines that could obliterate both tank and crew in an instant, the tankers escorted vital supply convoys, and guarded the engineers who built and maintained the roads. In their "spare time" the tankers guarded lonely bridges and isolated outposts for weeks on end, patrolled on foot to seek out the Viet Cong, operated roadblocks and ambushes, shot up boats to interdict the enemy's supply lines, and worked in the villages and hamlets to better the lives of the brutalized civilians. To the bitter end—despite the harsh conditions of climate and terrain, confusion, endless savage and debilitating combat, and ultimate frustration as their own nation turned against the war—the Marine tankers routinely demonstrated the versatility, dedication to duty, and matchless courage that Americans have come to expect of their Marines.
