Sukhoi Su-35s Flanker E Robert Pied,Nicolas Deboeck,2021-08-31 The first close-up look at the newest version of the Flanker, recently taken into service by the Russian Air Force. Including spectacular, never before seen details such as cockpit, thrust-vectoring engine exhausts and more.

**Sukhoi Su-27 Flanker** E. Gordon,Yefim Gordon,1999 The Su-27 entered service with the Russian Air Force in the mid-1980s. This comprehensive history is based on documents supplied from Sukhoi, interviews with design and engineering employees of the company, and all available information that has been published on this deadly aircraft. Contains development history, operational service history, technical details, and explanations of each model in the range. Technical drawings, photos, and text combine to make this the ultimate Sukhoi Su-27 reference.

**Air Power in the Indian Ocean and the Western Pacific** Howard M. Hensel,2020-06-04 This book examines the security dynamics of the Indian Ocean and the Western Pacific, concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions. The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific, as well as to illuminate the policies of the various powers involved in the affairs of these regions, and the military capabilities that are available in support of those policies. The 16 individual chapters examine both the traditional and the non-traditional threats that confront the various Indian Ocean and Western Pacific powers, and assess the roles played by land-based and naval, fixed-wing and rotary-wing, manned and unmanned aircraft, as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges. In doing so, the various chapters analyze and evaluate the air power doctrine, capabilities, deployment patterns, and missions of the respective states. In addition, they assess the future issues, challenges, and responses involving air power as it, acting in concert with other military instruments, seeks to contribute to securing and promoting the interests of the state. This book will be of much interest to students of air power, strategic studies, Asian and Middle Eastern politics, and International Relations.

**Sukhoi Su-27 Flanker** E. Gordon,Yefim Gordon,Peter Davison,2006 Recognized as one of the best fighters of the 1990s, the Su-27 Flanker is a single-seat supersonic interceptor that is often declared the finest and most successful fighter of the Cold War era. Designed by Sukhoi OKB, the imposing fighter quickly gained popularity and respect from countries all across the globe. Intended to be a direct competitor to the new generation of American fighters such as the F-15, the Su-27 was designed with outstanding range, heavy armament, and high agility. Excellent performance, handling, and serviceability have made the aircraft popular with its pilots and ground personnel alike. Equipped with an analog fly-by-wire control system, a full avionics suite, and up to 10 air-to-air missiles, the Flanker also features a rearward-facing radar between the engines, allowing it to fire at targets behind the aircraft. Outfitted with two Lyul'ka AL-31F turbofans, each 12,500 kgp (27,557 lb st) with afterburning, the Su-27's high thrust-to-weight ratio and refined aerodynamics allow superb flight characteristics at high angles of attack. Yefim Gordon and Peter Davison are the authors of several books on Soviet aircraft including the Specialty Press titles Mikoyan Gurevich MiG-29 Fulcrum and Mikoyan Gurevich MiG-15 Fagot. Over 300 photos illustrate the story of the Su-27. Topics covered include design, development, structural detail, international production, trials, upgrades and generations, comparisons, overseas sales, and much more. This book is a must have for all warbird enthusiasts!

*The Future of NATO Airpower* Justin Bronk,2020-05-31 Airpower remains the cornerstone of NATO's military advantage, so maintaining the ability to win air superiority over peer opponents in a conflict is key to long-term deterrence stability in both Europe and the Pacific. This Whitehall Paper examines the various modernisation and future capability development efforts being undertaken within NATO, and analyses the major threat systems and overall modernisation trends of the West's main peer-competitors - Russia and China. US airpower capability development efforts are increasingly focused on countering the growing challenge from the Chinese military in the Pacific. To meet this challenge, the Pentagon is planning to transform the way it operates across all domains over the next 15 years. New platforms, weapons systems and increasing automation of command and control threaten to leave NATO allies behind. Current acquisition and modernisation plans of European air forces may eventually close the capability gap with current US theatre entry standard capabilities, but by then the US will have leapt ahead once more. Furthermore, many of the airpower capabilities which the US is pursuing for the Pacific theatre are significantly less relevant for the demands of deterrence against Russia in Europe. Given continuing dependence on US enablers on the part of other NATO members, a significant divergence in capability plans threatens to undermine crucial Alliance interoperability if not recognised and managed early.

*Small Molecule — Protein Interactions* Herbert Waldmann,Marcus Koppitz,2003-03-07 Based on the international workshop on 'Small Molecule - Protein Interactions' held in Berlin, April 24-26, 2002, researchers from industry and academic laboratories describe novel and efficient ways selecting promising new drug targets and developing small molecule inhibitors against them. The structure of the book corresponds to the different aspects of the drug discovery process. All chapters are written by leading experts in the field, who present and discuss the most recent state-of-the-art tools and techniques for the development of novel drugs. The value of the book lies in surveying and summarizing the approaches taken by different companies and institutions giving the reader a balanced view on the use of the latest techniques on the one hand and experience-based assistance in selecting appropriate tools for their own work on the other hand.

Moscow's War in Syria Seth G. Jones,2020-08-05 This report examines Russia's military and diplomatic campaign in Syria, the largest and most significant Russian out-of-area operation since the end of the Cold War. Russia's experience in Syria will shape its military thinking, influence promotion and personnel decisions, impact research and development for its arms industry, and expand its influence in the Middle East and beyond for the foreseeable future. Yet despite the importance of Russia's involvement in Syria—especially as the United States competes with countries such as Russia and China—there has been little systematic analysis of Russia's campaign in Syria. This research aims to help fill the gap and provides some new analysis and data. It conducts a broad assessment of the Russian campaign—including political objectives, diplomatic initiatives, and civilian targeting—which places the military campaign in a wider context. In addition, it compiles a data set of Russia's civilian targeting and analyzes satellite imagery of Russian activity. Overall, this report concludes that Russia was relatively successful in achieving its main near-term political and military objectives in Syria, including preventing the collapse of the Assad regime (an important regional partner) and thwarting a possible U.S. attempt to overthrow Assad. Still, Russia used a systematic punishment campaign that involved attacks against civilian and humanitarian infrastructure in an attempt to deny resources—including food, fuel, and medical aid—to the opposition while simultaneously eroding the will of civilians to support opposition groups.

Re-emergence Of China, The: The New Global Era Michael Lloyd,Bob Savic,2021-10-06 In eleven chapters this book addresses the issue of the re-emergence of China and a new global order on the world stage, with implications for the existing US hegemonic liberal international order. The Re-Emergence of China reviews the history of China's astounding economic growth and geopolitical development over the past 30 years. It explores the economic, technological, and global development of China during this period; explores the political philosophy and praxis from imperial neo-Confucian times to the present socialist regime; the cultural and social development of China and the role of the Chinese diaspora; and examines the

prospects for a new international order with a major role for China.This book will fit comfortably into the required reading schedule for graduate class modules in Chinese and East Asian studies, political theory, economic development, and contemporary political history. Of particular interest will be the exploration of the role of the Chinese diaspora in modern China's development. The authors' focus on the contemporary conflict between the US and China will also be of wider interest to political commentators as well as academic researchers in Chinese studies.The Re-Emergence of China can provide a guiding narrative for academics, researchers, policymakers, industry leaders and many other relevant professionals on how global society can be reshaped in the wake of China's re-emergence in the new global era. By focusing on China's integration with the economic and political world order, in terms of both its advances and setbacks, in addition to the historical contexts, readers can navigate the book's succinct coverage and conclusions on the development of a China polity which has become increasingly connected to the world in some ways, yet more disconnected in others.Related Link(s)

*The Prince of Blades* F. W. Irvin,2017-05-16 A man mysteriously wakes in an alley with no memory of who he is or how he came to be there. Two intelligence leaders meet in secret, regarding a strange substance of unknown composition and origin. Meanwhile, a shadowy group convenes to discuss a sinister, clandestine plan. Slowly, the world is plunged into disarray as power outages and riots sweep through specific cities around the globe. A secret militia forms in the midst of the turmoil, enacting its own martial law under unknown intentions. At the heart of the conflict, the three most powerful nations engage in an inevitable game of chess with the world as its playing field. It is up to a technological genius, a doctor in the works, an FBI special agent, an NYPD homicide detective, and a man about which little is known. Such a man holds the key to averting disaster. Together, this unlikely team will struggle to answer significant questions, such as who was behind the attack on the United Nations conference, who is in the background pulling strings, and what is Sample 2348C? Join them on a journey filled with twists and turns that will leave you asking, What the (bloody) hell is going on? Will they unravel the malevolent plot and thwart utter catastrophe, or will the world change forever?

**A Home on the Rolling Main** Tony Ditcham,2013-06-17 From first joining the Royal Navy in 1940 until the end of the campaign against Japan, Tony Ditcham was in the front line of the naval war. After brief service in the battlecruiser Renown off Norway and against the Italians, he went into destroyers and saw action in most European theatres \_ against S-boats and aircraft in 'bomb alley' off Britain's East Coast, on Arctic convoys to Russia, and eventually in a flotilla screening the Home Fleet. During the dramatic Battle of the North Cape in December 1943 he was probably the first man to actually see the Scharnhorst and from his position in the gun director of HMS Scorpion enjoyed a grandstand view of the sinking of the great German battleship (his account was so vivid that it formed the basis of the description in the official history). Later his ship operated off the American beaches during D-Day, where two of her sister ships were sunk with heavy loss of life, and he ended the war en route for the British Pacific Fleet and the invasion of Japan.??This incident-packed career is recounted with restraint, plenty of humour and colourful descriptive power \_ his account of broaching and almost capsizing in an Arctic winter storm is as good as anything in the literature of the sea. The result makes enthralling reading, and as the surviving veterans rapidly decline in numbers, this may turn out to be one of the last great eyewitness narratives of the naval war.

Proceedings of the European Cognitive Science Conference 2007 Stella Vosniadou,Daniel Kayser,Athanassios Protopapas,2017-09-29 This volume contains the invited lectures, invited symposia, symposia, papers and posters presented at the 2nd European Cognitive Science Conference held in Greece in May 2007. The papers presented in this volume range from empirical psychological studies and computational models to philosophical arguments, meta-analyses and even to neuroscientific experimentation. The quality of the work shows that the Cognitive Science Society in Europe is an exciting and vibrant one. There are 210 contributions by cognitive scientists from 27 different countries, including USA, France, UK, Germany, Greece, Italy, Belgium, Japan, Spain, the Netherlands, and Australia. This book will be of interest to anyone concerned with current research in Cognitive Science.
