Oak Flat Lauren Redniss, 2021-11-09 NATIONAL BESTSELLER • A powerful work of visual nonfiction about three generations of an Apache family struggling to protect sacred land from a multinational mining corporation, by MacArthur “Genius” and National Book Award finalist Lauren Redniss, the acclaimed author of *Thunder & Lightning* “Brilliant . . . virtuosic . . . a master storyteller of a new order.”—Eliza Griswold, *The New York Times Book Review* (Editors’ Choice) NAMED ONE OF THE BEST BOOKS OF THE YEAR BY KIRKUS REVIEWS *Oak Flat* is a serene high-elevation mesa that sits above the southeastern Arizona desert, fifteen miles to the west of the San Carlos Apache Indian Reservation. For the San Carlos tribe, Oak Flat is a holy place, an ancient burial ground and religious site where Apache girls celebrate the coming-of-age ritual known as the Sunrise Ceremony. In 1995, a massive untapped copper reserve was discovered nearby. A decade later, a law was passed transferring the area to a private company, whose planned copper mine will wipe Oak Flat off the map—sending its natural springs, petroglyph-covered rocks, and old-growth trees tumbling into a void. Redniss’s deep reporting and haunting artwork anchor this mesmerizing human narrative. *Oak Flat* tells the story of a race-against-time struggle for a swath of American land, which pits one of the poorest communities in the United States against the federal government and two of the world’s largest mining conglomerates. The book follows the fortunes of two families with profound connections to the contested site: the Nosies, an Apache family whose teenage daughter is an activist and leader in the Oak Flat fight, and the Gorhams, a mining family whose patriarch was a sheriff in the lawless early days of Arizona statehood. The still-unresolved Oak Flat

conflict is ripped from today's headlines, but its story resonates with foundational American themes: the saga of westward expansion, the resistance and resilience of Native peoples, and the efforts of profiteers to control the land and unearth treasure beneath it while the lives of individuals hang in the balance.

Tortilla Flat John Steinbeck, 1997-06-01 Steinbeck is an artists; and he tells the stories of these lovable thieves and adulterers with a gentle and poetic purity of heart and of prose. —New York Herald Tribune A Penguin Classic Adopting the structure and themes of the Arthurian legend, John Steinbeck created a “Camelot” on a shabby hillside above the town of Monterey, California, and peopled it with a colorful band of knights. At the center of the tale is Danny, whose house, like Arthur’s castle, becomes a gathering place for men looking for adventure, camaraderie, and a sense of belonging—men who fiercely resist the corrupting tide of honest toil and civil rectitude. As Nobel Prize winner Steinbeck chronicles their deeds—their multiple lovers, their wonderful brawls, their Rabelaisian wine-drinking—he spins a tale as compelling and ultimately as touched by sorrow as the famous legends of the Round Table, which inspired him. This edition features an introduction by Thomas Fensch. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

How to Live in a Flat William Heath Robinson, 2014-11-14 'How to Live in a Flat', if posed as a question, is worth asking today with so many articles on tiny flats with hugely inflated price tags in the newspapers. Flat-dwellers were faced with very similar problems in 1936. During 1932 and 1933 Heath Robinson had drawn a series of cartoons for 'The Sketch' entitled 'Flat Life', which depicted various gadgets designed to make the most of the limited space available in the contemporary flat. It was this series of drawings that provided K. R. G. Browne and W. Heath Robinson with the inspiration for their first full-length book together. It was called 'How to Live in a Flat' and, as well as greatly extending the original ideas showing many ingenious ways of overcoming the problems caused by lack of space in flats and bungalows, the book also provided much fun at the expense of the more extreme designs in thirties furniture and architecture. The book was published for Christmas 1936 and was well received. 'How to Live in a Flat' is surprisingly relevant to life in Britain in 2014. In fact, several of Heath Robinson's space-economising solutions have been used in practice to maximise the use of space in small flats. We have beds that fold down from wardrobes fully-made and ready to sleep in, communal rubbish shoots, central heating and multi-purpose furniture. So Heath Robinson was way ahead of his time and reading 'How to Live in a Flat' may spark other innovative solutions to making life bearable in a tiny twenty-first century home! If,

in addition to being a flat-dweller (perhaps in a garden flat), you are also married with a car and you play golf then you will find much to amuse and inform you in our other titles by Heath Robinson and K. R. G. Browne: *How to be a Perfect Husband* *How to Make a Garden Grow* *How to be a Motorist* *Humours of Golf* All our Heath Robinson titles include a Foreword by Geoffrey Beare, Trustee of the William Heath Robinson Trust, who is working to build a Heath Robinson museum in North London.

Action-based Approaches in Popular Music Education Steve Holley, Kat Reinhert, Zack Moir, 2021-08 As music educators continue to explore various ways of learning and teaching popular music, recognizing and understanding a blend of traditional and non-traditional pedagogies that engage teachers and learners in authentic practices is of vital importance. To meet this emerging need, *Action-based Approaches in Popular Music Education* delves into the practices and philosophies of 26 experienced music educators who understand both the how and the why of popular music education. This edited collection represents the variety, the diversity, and the multiplicity of ideas and approaches to the teaching and learning of popular music. It's these actionable approaches, practices, applications, lessons, and ideas that will enable music educators to understand how to better incorporate popular music into their teaching. This book is not an antidote to the lack of uniformity in popular music education – it is a celebration of it.

Hercule Poirot: The Adventure of the Cheap Flat Agatha Christie, 2019-01-07 Hastings is at a friend's house with several other people when the talk turns to flats and houses. Mrs Robinson tells the party how she and her husband have managed to obtain a flat in Knightsbridge for a very attractive price. Poirot is interested in this strange event and starts to investigate.

Rules for a Flat World Gillian Kereldena Hadfield, 2017 How can we promote economic progress in a staggeringly complex global system? In the bestselling book *The World is Flat*, Thomas Friedman argued that technology and globalization have leveled the playing field among workers and innovators worldwide. But why, ten years after he proposed this thesis, are billions of people around the world still locked out of global prosperity and security? In *Rules for a Flat World*, law and economics professor Gillian Hadfield points to an outdated legal infrastructure as the cause of stagnating progress in the global economy. The world's biggest corporations are struggling to manage workers, and advance a consistent strategy, in dozens of countries at once. Small businesses are being crushed by disruption a hemisphere away. Billions of people who constitute the bottom of the economic pyramid are still shut out of the technological, legal, and medical advancements that the other half of the world enjoys. Put simply, the law and legal methods on which we currently rely have failed to evolve along with technology. Hadfield argues not only that these systems are

too slow, costly, and localized to support an increasingly complex global economy, but also that they fail to address looming challenges such as global warming, poverty, and oppression in developing countries. Instead of growing more agile and less expensive, our legal infrastructure is drowning in costs and complexity, all the while growing less capable of responding to the needs of businesses, governments, and ordinary people. Through a sweeping review of the emergence and evolution of law over thousands of years, Hadfield makes the case that our existing methods of producing law—via legislatures, courts, and bureaucracies—need supplementing. Markets, she argues, have the capacity to spur investment in regulation so that we can better manage smarter, faster, and more complicated economic systems. Combining an impressive grasp of the empirical details of economic globalization with an ambitious re-envisioning of our global legal system, *Rules for a Flat World* is a crucial and influential intervention into the debates surrounding how best to manage the evolving global economy.

Mind Is Flat Nick Chater, 2018-08-07 In a radical reinterpretation of how the mind works, an eminent behavioral scientist reveals the illusion of mental depth. Psychologists and neuroscientists struggle with how best to interpret human motivation and decision making. The assumption is that below a mental “surface” of conscious awareness lies a deep and complex set of inner beliefs, values, and desires that govern our thoughts, ideas, and actions, and that to know this depth is to know ourselves. In this profoundly original book, behavioral scientist Nick Chater contends just the opposite: rather than being the plaything of unconscious currents, the brain generates behaviors in the moment based entirely on our past experiences. Engaging the reader with eye-opening experiments and visual examples, the author first demolishes our

intuitive sense of how our mind works, then argues for a positive interpretation of the brain as a ceaseless and creative improviser.
