United States Martial Pistols and Revolvers Arcadi

Gluckman,2015-02-17 A historical reference for more than one hundred handguns. United States Martial Pistols and Revolvers, first published in 1939, provides firearm collectors and enthusiasts with a single authoritative volume containing information on the development and description of martial short arms, from the flintlock pistol that was available at the birth of the nation to the latest available handguns during the World War I. This book is particularly useful to collectors as an important reference source, offering a listing of single-shot pistols, revolvers, and semiautomatic pistols, over the period of 1799–1917. Gluckman covers the brief histories of more than one hundred handguns, going into the specific details of the chemistry of gunpowder and the development of the first automatic firearms. Following innovators like Reverend Alexander Forsyth, John P. Lindsay, and Samuel Colt, the evolution of the weapons is carefully examined over time. The comprehensive text is accompanied by a series of original

illustrations of the pistols and revolvers, demonstrating the specifics of many gun mechanisms. For experts and the more casual hobbyist alike, this book offers a unique collection of information on martial pistols and revolvers in the United States, up until WWI. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Flintlock Pistols Frederick Wilkinson, 1976

Percussion Pistols and Revolvers Mike Cumpston, Johnny Bates, 2005-07 In the early transition from the long-lived flintlock system, handgun development closely paralleled that of the long

arms. With the advent of the revolving pistols, however; came patents that created monopolies in revolver production and the through-bored cylinder necessary for self-contained metallic cartridges. The caplock revolvers took on a separate evolution and remained state of the art long after the widespread appearance of cartridge firing rifles and shotguns. They rode in the holsters of explorers and adventurers across the world and granted safe conduct in the back-alleys of the Industrial West right up until the last quarter of the 19th Century. Handguns possess a mystique distinctly different from that of other firearms. They are tools of personal empowerment-chosen by their owners to provide independence and freedom of movement. In the ambitious, optimistic early years of western industrial civilization they were the emblem of liberty and equality and the bane of repressive governments and social movements. Largely because of the traditions that emerged in the time of the caplock pistols and revolvers, they remain so in the early years of the 21st Century.

The Scottish Pistol Martin Kelvin, 1996 Based on extensive research on the few pistols to have survived the Disarming Acts of the 18th century, this book traces in detail the evolution of the Scottish pistol in its various stylistic forms from the highly ornate to the functional. All aspects of the Scottish pistol's manufacturing history are covered, including contemporary shipping lists and Scotland's natural resources, as well as the history of the Hammerman Craft. Fakes and reproductions are discussed together with valuable advice to the unwary or inexperienced collector on their detection. An extensive section comprises an anthology of texts from the 17th to the 19th centuries relating

historical instances of the pistol in use. This book is an indispensable resource, not only for historians and collectors but all those interested in the decorative arts and the history of design.

Pepperbox Firearms Lewis Winant, 1952 The pepper-box revolver or simply pepperbox (also pepper-pot, from its resemblance to the household pepper grinder) is a multiple-barrel repeating firearm that has three or more barrels grouped around a central axis. It mostly appears in the form of a multi-shot handheld firearm. Pepperboxes exist in all ammunition systems: matchlock, wheellock, flintlock, percussion, pinfire, rimfire and centerfire. The pepperbox should not be confused with a volley gun (like the seven-barrel long gun made by Nock), a firearm that fires multiple projectiles simultaneously by use of multiple barrels.[1] The difference is that a volleygun fires all the barrels simultaneously while the pepperbox is a repeater. The pepperbox should also not be confused with or as a development of the Gatling gun, which fires rapidly by the use of rotating multiple barrels.--Wikipedia
