Irwin Allen Television Productions, 1964-1970 Jon Abbott,2015-06-14 Before establishing himself as the “master of disaster” with the 1970s films The Poseidon Adventure and The Towering Inferno, Irwin Allen created four of television’s most exciting and enduring science-fiction series: Voyage to the Bottom

of the Sea, Lost in Space, The Time Tunnel and Land of the Giants. These 1960s series were full of Allen's favorite tricks, techniques and characteristic touches, and influenced other productions from the original Star Trek forward. Every science-fiction show owes something to Allen, yet none has equaled his series' pace, excitement, or originality. This detailed examination and documentation of the premise and origin of the four shows offers an objective evaluation of every episode—and demonstrates that when Irwin Allen's television episodes were good, they were great, and when they were bad, they were still terrific fun.

Tasmanian Mayflies Ron Thresher,2023-09 Mayflies are one

of the world's most diverse, abundant and important aquatic insects. Famous for their brief adult life spans, mayflies play a key role in the ecology of aquatic and associated terrestrial ecosystems, and are critical bioindicators of ecosystem health. Sitting at the southern limit of Australia's temperate zone, Tasmania is home to a diverse array of mayflies and renowned fisheries based on them. The state's storied 'Lambda Dun' hatches bring fishers from all over Australia to try their luck each summer on its rivers and ponds. Yet little is known about their behaviour and ecology, and more than half of the mayflies in Tasmania have never been described. This extensively illustrated book is the first synthesis of the biology of south-east Australia's mayflies, with a focus on those in Tasmania. It combines information gleaned from scientific literature as well as more than 30 years of the author's studies and flyfishing experiences. It explores the biology, identification, conservation, ecology and behaviour of mayflies, and also includes fishing strategies and fly patterns. Tasmanian Mayflies is an essential information source for Australia's aquatic biologists and for flyfishers, novice and experienced alike, who chase the insects and the fish that feed on them.
