The Flying Tank Noah,2022-10-21 This book is about the tank that could fly into any battle. In World War II, the Soviet Union built a tank that could fly and land into a battle. This book explains what happened to this ingenious invention.

Edison's Concrete Piano Judy Wearing,2009-10-31 Not even geniuses get it right the first time . . . An “entertaining” look at the failures of great inventors (Booklist). To achieve great things, you have to be willing to take risks—and as Edison’s Concrete Piano reveals, some of the most famous names in history experienced plenty of flops and face-plants in the course of their careers. Thomas Edison, for example, not only revolutionized the world with the light bulb, but also designed a concrete piano, a nonoperational helicopter made from box kites and piano wire, and a machine to speak to the dead. Alexander Graham Bell, inventor of the telephone, actually devoted most of his time to his sheep farm in Nova Scotia—devising a multi-nippled sheep somewhere along the way. You’ll also read about Leonardo da Vinci’s walk-on-water shoes, George Washington Carver’s miracle peanut cure, and much more. The ludicrous ideas, faulty designs, and offbeat hobbies in this volume will inspire laughs—and serve as a reminder that even the very best minds make mistakes. “Captivating . . . This book is full of lessons for inventors and non-inventors alike.” —Henry Petroski, author of *Success through Failure*

My Tank Is Fight! Zack Parsons,2006-10-01 Soldiers that fly! Tanks that fly! Cruisers that . . . sink! What Fight Have Been My Tank Is Fight! contains a humorous and exciting examination of twenty real inventions from World War II that never saw the light of day. Each entry includes full technical details, a complete development history, in-depth analysis, and a riveting fictionalized account of the invention's success or failure on the battlefield. Lavish color artwork and technical illustrations are falling from the pages of this book like toenails from a trench foot. Dive under the Atlantic in the turreted U-Cruiser, or rule its surface from an aircraft carrier made out of ice. Shred bomber formations in a high-performance flying wing fighter and then rocket to your untimely end from the cockpit of your very own suicide missile. We've got a pair of German armored land vehicles for you that are so large they had to be powered by naval engines! My Tank Is Fight! delivers the thrilling action of the Second World War as it might have been with a touch of humor and a lack of class. Only the slow-witted are reading this anywhere other than in line at the cash register. Ask an adult to help you if you're still not sure you want to buy the book.

Pilot Training Manual for the Skymaster C-54 United States. Army Air Forces. Office of Flying Safety,1945

Northrop Yb-49 Flying Wing Pilot's Flight Manual Film Com Periscope Film Com,Periscope Film.Com Staff,2006-04-04 Visionary designer Jack Northrop built a series of experimental flying wing aircraft both before and during WWII. One of the most radical designs of the post-war era, the propeller-driven YB-35 bomber's all-wing design minimized drag and promised maximum payload capacity and terrific endurance. The YB-49, a turbojet powered variant built on the YB-35 airframe, forever altered aviation history and inspired the design of the B-2 Spirit stealth bomber. Originally printed by Northrop Aircraft in 1948, the YB-49 Flying Wing Pilot's Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Originally classified Restricted, the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Tank Tests of a Family of Flying-boat Hulls James M. Shoemaker,John B. Parkinson,1934 This report presents towing tests made in the N.A.C.A. tank of a parent form and five variations of a flying-boat hull. The beams of two of the dervied forms were made the same as that of the parent and the lengths changed by increasing and decreasing the spacing of stations. The lengths of two other of the derived forms were made the same as that of the parent while the beams were changed by increasing and decreasing the spacing of buttocks, all other widths being changed in proportion. The remaining derived form has the same length and beam as the parent, but the lines of the forebody were altered to give a planing bottom with no longitudinal curvature forward of the step.

"Tanks" for the Memories? Will Airpower, Specifically Helicopters, Replace Tanks in 2010? ,1998 The subject of helicopters replacing tanks has been a matter of controversy for years. This high-stakes doctrinal debate, possibly driven by limited service budgets, historical events, and even some parochialism, complicates the task of Joint Force Commanders as they create plans to effectively integrate available forces to achieve full spectrum battlefield dominance. Many people argue that occupational forces must consist of boots and treads on the ground to dominant and hold land. Conversely, flying tank advocates suggest armed helicopters should be employed to replace conventional tanks. Although helicopters are powerful tools, they cannot in some cases, and should not in others, replace tanks. To defend this assertion, this study begins by reviewing thoughts and recommendations throughout airpower and landpower literature. Joint Vision 2010, the conceptual template directing the organization and development of the US armed forces is examined, as is a proposal from the Future Concepts Division of the Joint Warfighting Center to study the concept of helicopters replacing tanks in 2010. This research then considers the geostrategic environment of the future, then describes why and how Joint Force Commanders should use and exploit tanks and helicopters. Future conflicts will demand tanks to dominate and hold land, while helicopters will be better suited for airpower operations. Joint Force Commanders should employ helicopters, not as flying tanks, but as airpower assets. Logistic and command and control structures should support these concepts, resulting in Joint Force Commanders receiving tanks whenever and wherever they need them.

P-40 Warhawk Pilot's Flight Operating Manual Periscope Film Com,2006-05 Flown by the American Volunteer Group in China known as the Flying Tigers, the P-40 Warhawk earned a reputation for its toughness in combat. Facing odds of 6 to 1 in most combat situations, AVG pilots relied on their skill, daring and their aircraft's superior diving speed to achieve victory. By war's end the Tigers had destroyed more than 1200 Japanese planes, with another 700 listed as probables. Their own losses came to 573 aircraft. Originally printed by the U.S. Army Air Force for pilots transitioning to the P-40, this flight manual contains detailed information about one of history's great planes. Originally classified as restricted, the manual was declassified long ago and is here reprinted in book form. Some color images appear in black and white, and some pages have been slightly reformatted. Care has been taken however to preserve the integrity of the text.

Richard Bong Pete Barnes,2013-06-19 Who would have imagined a farm boy from Wisconsin would be the greatest air hero of World War II? Richard Bong was an athletic and hard-working boy from northern Wisconsin who dreamed of flying from the first time a plane buzzed low over his family farm. When war broke out, he left behind a life of sports, deer hunting, and farm chores to fly the new P-38 Lightning for the Army Air Force. Stationed in New Guinea, Bong shot down a total of 40 Japanese flyers in under three years - beating the record of 26 set by Eddie Rickenbacker in World War I. His

accomplishments won this modest pilot the title Ace of Aces and a Congressional Medal of Honor awarded by General MacArthur himself. Follow Bong as he navigates his way through basic training, flight school, and life on an overseas army base. Watch as he takes to the skies in his P-38 fighter jet, outflying Japanese aircraft with barrel rolls, dives, and turns. Celebrate as he meets and marries the love of his life back home in Wisconsin, and mourn as his life comes to a swift and unexpected end during an ill-fated training flight in California. Richard Bong: World War II Flying Ace is part of the Badger Biographies series for young readers. The engaging narrative is complemented by an accessible format that includes historic photographs, a glossary of terms, sidebars on life in the military, and suggestions for activities and discussion.

Hangar Flying Alfred J. D'Amario,2008 Flying is sometimes defined as hours and hours of sheer boredom punctuated by moments of stark panic. In HANGER FLYING, Lt/Col Alfred J. D'Amario shares many of those moments of stark panic that punctuated the 5,000 or so flying hours he accumulated during his twenty years in the Air Force. The author, who much prefers to be called Joe, takes the reader through Basic and Advanced pilot training, transition to jets, fighter gunnery and fighter bomber training and real combat inKorea. Then there are six years of peace time flying in Training Command followed by eleven years of Cold War missions in the six engine B-47 and eight engine B-52. But, Hanger Flying is about in-flight emergencies and hair-raising experiences, not about the hours and hours of just boring holes in the sky. Hanger Flying (the practice, not the book) is what assembled pilots do when they aren't flying. It is a Can you top this? exercise in story telling. And that is what the author does in this easy reading, fast paced account of many of the close calls he had both in and out of combat.

There are old pilots and there are bold pilots; there are no old, bold pilots. Maybe one! Bruce E Tuttle,2017-05-23 Flying has always been a way of life for me, handed down to me by my father. I've shared my life of aviation for all to read. I've always enjoyed flying even though flying is and has always been dangerous! These stories are from my personal experiences! After reading my own stories, I realized just how lucky my life has been! Thanks be to GOD!

Northrop F-89 Scorpion Pilot's Flight Operating Manual United States Air Force,2008-09-01 he F-89 Scorpion was the first multi-seat, all-weather jet interceptor in the U.S. Air Force. It also became the first aircraft ever equipped with a nuclear air-to-air weapon , the 1.5 kiloton Genie missile. The F-89 made its debut in 1948, joined the Air Force in 1950, and then served as the mainstay of Air Defense Command for 17 years. Over 1,000 F-89s were produced, including 350 of the ,J, model equipped with pylons to carry the Genie. (One F-89 did fire the missile as part of Operation Plumbob in 1957.) Originally printed by Northrop and the USAF, this F-89 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Flying Aircraft Carriers of the USAF Brian Lockett,2008-09-11 Project FICON (Fighter conveyer): In the early 1950s, the Air Force conducted a series of experiments to establish the feasibility of carrying, launching, and retrieving jet reconnaissance airplanes from giant Convair RB-36 bombers. It was hoped that the bombers would carry the reconnaissance jets to the perimeter of the Soviet Union and then release them to penetrate the air defenses. Tests of the concept were conducted in 1952 and 1953 with a Republic F-84E Thunderjet and the YF-84F Thunderstreak prototype. Twenty-six Republic RF-84F Thunderflashes and ten Convair GRB-36D carriers were modified for the project. In 1955, a squadron of carriers was established at Fairchild Air Force Base, Washington. A squadron of parasites was established at nearby Larson Air Force Base. Training operations began in December 1955, but the composite aircraft system faced competition from the Boeing RB-52B, Lockheed U-2, and the development of aerial refueling.
