William H. Tunner

Fokker E.V/ Tomasz J. Kowalski,2010-01-01 Includes a free decal sheet in 1:72, 1:48 and 1:32 The German Fokker E.V was a parasol-monoplane fighter aircraft, designed by Reinhold Platz. It entered into service with the Luftstreitkräfte in the last few months of World War I, yet after several fatal accidents due to wing failures, the E.V. was modified and re-designated as the Fokker D.VIII. Dubbed the Flying Razor by Allied pilots, the D.VIII had the distinction of scoring the last aerial victory of the war. This is a detailed, illustrated review of both aircraft, covering all modifications and includes color artwork profiles and a decal sheet in three scales: 1:72, 1:48 and 1:32. About the Series Famous Airplanes focuses on the great aircraft of history and their combat history, featuring color profiles and photographs of the premier planes from a particular unit, theater or service. With detailed development history, profiles of the men who flew them and strategic and tactical analysis, these books provide a wealth of information for any aviation enthusiast.

Fokker E.v/ Tomasz Kopański,2019-03-19 The next book in the popular Polish Wings series is on the famous German WWI fighters in Polish Air Forces. Covers duty of these aircraft during Polish-Bolsheviks war and early 1920s. More than 120 photos, mostly unpublished, and many color profiles.

WW1 Aircraft Performance Anders F. Jonsson,2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time. German Aircraft of the First World War Peter Gray,Owen Thetford,2005-01 The first edition of this book, by Peter Gray and Owen Thetford, when published in 1962 earned world-wide acclaim as the most comprehensive reference on German combat aircraft of the First World War. The second revised edition incorporated a large proportion of new photographs, most of them never previously published. This new impression is a reprint of that edition. The entire text has been checked against original German sources, and over 500 aircraft are described and illustrated, covering two-seater fighters, multi-engined bombers, triplane and monoplane fighters, and seaplanes.

Polish Fighter Colours, 1939-1947 Bartłomiej Belcarz,Robert Gretzyngier,Tomasz Jan Kopański,Wojtek Matusiak,Wojciech Zmysłoni,Marek Rogusz,2016 This book describes in detail the camouflage and markings of the day fighters used by the Polish Air Force in 1939-47. Aircraft of Polish, French, British, American, Soviet and German origin are shown. Written by a well-known quartet of distinguished Polish aviation historians: Kopański, Belcarz, Gretzyngier and Matusiak. Many historical photos and color profiles.

Gloster Javelin Michael Napier,2016-02-29 The RAF's only delta-winged fighter the Gloster Javelin was also Britain's first true All-Weather Fighter. Based in the UK and in Germany, the RAF's Javelin squadrons formed the front line of Britain's air defences in the late 1950s and early 1960s. During this time Javelin crews pioneered the operational use of guided missiles and air-to-air refuelling by fighter aircraft. In the Far East, Javelins were involved in operations during the Indonesian Confrontation and the aircraft was also deployed to Zambia during the Rhodesian UDI Crisis. In this history, which is richly illustrated with many previously unpublished photographs, Michael Napier blends official records with personal accounts to describe the operational history of this iconic jet fighter.

Command Of The Air General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Anthony Fokker Marc Dierikx,2018-04-03 Comprehensive biography of Anthony Fokker, the famed Dutch pilot and daredevil aviator Anthony Fokker: The Flying Dutchman Who Shaped American Aviation tells the larger-than-life true story of maverick pilot and aircraft manufacturer Anthony Fokker. Fokker came from an affluent Dutch family and developed a gift for tinkering with mechanics. Despite not receiving a traditional education, he stumbled his way into aviation as a young stunt pilot in Germany in 1910. He survived a series of spectacular airplane crashes and rose to fame within a few years. A combination of industrial espionage, luck, and deception then propelled him to become Germany's leading aircraft manufacturer during World War I, making him a multimillionaire by his midtwenties. When the German Revolution swept the country in 1918 and 1919, Fokker made a spectacular escape to the United States. He set up business in New York and New Jersey in 1921, and shortly thereafter became the world's largest aircraft manufacturer. The U.S. Army and Navy acquired his machines, and his factories equipped legendary carriers such as Pan American and TWA at the dawn of commercial air transport. Yet despite his astounding success, his empire collapsed in the late 1920s after a series of ill-conceived business decisions and deeply upsetting personal dramas. In 1927, aviator Richard Byrd solicited a Fokker three-engine plane to be the first to fly non-stop across the Atlantic. The plane was damaged on a test flight and Charles Lindbergh beat him to it. Lindbergh's solo adventure in the Spirit of St. Louis earned him--and cost Fokker--a lasting place in the history books. Using previously undiscovered records and primary sources, Marc Dierikx traces Fokker's extraordinary life and celebrates his spectacular achievements.

Spitfire Aces of Burma and the Pacific Andrew Thomas,2013-02-20 The arrival of the Spitfire in Burma came at a crucial time as the RAF struggled against the Japanese to support the Chindit operation on the ground. Proving a huge boost to morale, the Spitfire played a large part in defeating the enemy, and covering the subsequent Allied advance through Burma, protecting the ground troops and providing vital supplies. Covering this little documented aerial war, this book tells the stories of the 54 aces who flew against the Japanese, and also those who fought in India and Australia. Full-colour artwork reveals the markings and paint schemes of this most-famous of British planes, whilst first-hand accounts and archive photographs bring the aerial battles of Burma, India and Australia to life.

Over the Hump William H. Tunner,1964 William Henry Tunner (July 14, 1906 - April 6, 1983) was a general officer in the United States Air Force and its predecessor, the United States Army Air Forces. Tunner was

known for his expertise in the command of large-scale military airlift operations, first in Air Transport Command (ATC) during World War II, commanding The Hump operation, and later in Military Air Transport Service (MATS) during the Berlin Airlift in 1949-1951. He eventually rose to the rank of Lieutenant general and commanded MATS itself.--Wikipedia, 10 November 2020, https://en.wikipedia.org/wiki/William_H._Tunner

Yakovlev Yak-1, Yak-3, Yak-7, Yak-9 Wojciech Sankowski,Wojciech Zmyslony,2015 By 1941, the career of the Spitfire is well underway and the RAF has a powerful aircraft with the Mark V that exceeds all expectations. But it is the Mk IX, commissioned urgently in the summer of 1942, which becomes the most famous Spitfire. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

Fokker D.XXI Aces of World War 2 Kari Stenman,Peter de Jong,2013-04-20 The Dutch D.XXIs saw less than a week of action following the German invasion of the west on 10 May 1940, with many of the country's 28 fighters being destroyed on the ground. However, those that survived the initial onslaught inflicted losses on the Luftwaffe. By then, however, the D.XXI had found everlasting fame in Finland during the Winter War of 1939-40. Proving itself a real thorn in the side of the Soviets, the fighter, operating in primitive conditions and against vastly superior numbers, Finnish D.XXIs racked up an incredible score against the Red Air Force. The D.XXI also has the distinction of producing the first 'ace in a single mission' in World War 2, when then 1Lt Jorma Sarvanto shot down six Ilyushin DB-3 bombers on 6 January 1940. After spending a year providing home defence and flying coastal patrols during the early stages of the Continuation War in 1941, all surviving Finnish Fokker D.XXIs were relegated to the reconnaissance role, which they performed through to the end of hostilities in September 1944.
The German Fighter Since 1915 Rüdiger Kosin,1988 The author, with 60 years' experience of the German aircraft industry, traces this innovative area of aircraft design from the first German fighter - the Fokker E1 - through to such collaborative ventures as the Alpha Jet and the Tornado.
