Chaotic Oscillators Tomasz Kapitaniak,1992 This volume brings together a comprehensive selection of over fifty reprints on the theory and applications of chaotic oscillators. Included are fundamental mathematical papers describing methods for the investigation of chaotic behavior in oscillatory systems as well as the most important applications in physics and engineering. There is currently no book similar to this collection.

German Aircraft of the First World War Peter Gray,Owen Thetford,2005-01 The first edition of this book, by Peter Gray and Owen Thetford, when published in 1962 earned world-wide acclaim as the most comprehensive reference on German combat aircraft of the First World War. The second revised edition incorporated a large proportion of new photographs, most of them never previously published. This new impression is a reprint of that edition. The entire text has been checked against original German sources, and over 500 aircraft are described and illustrated, covering two-seater fighters, multi-engined bombers, triplane and monoplane fighters, and seaplanes.

Construction of Global Lyapunov Functions Using Radial Basis Functions Peter Giesl,2007-04-11 The basin of attraction of an equilibrium of an ordinary differential equation can be determined using a Lyapunov function. A new method to construct such a Lyapunov function using radial basis functions is presented in this volume intended for researchers and advanced students from both dynamical systems and radial basis functions. Besides an introduction to both areas and a detailed description of the method, it contains error estimates and many examples.

Nuclear Fusion Edward Morse,2018-10-15 The pursuit of nuclear fusion as an energy source requires a broad knowledge of several disciplines. These include plasma physics, atomic physics, electromagnetics, materials science, computational modeling, superconducting magnet technology, accelerators, lasers, and health physics. Nuclear Fusion distills and combines these disparate subjects to create a concise and coherent foundation to both fusion science and technology. It examines all aspects of physics and technology underlying the major magnetic and inertial confinement approaches to developing nuclear fusion energy. It further chronicles latest developments in the field, and reflects the multi-faceted nature of fusion research, preparing advanced undergraduate and graduate students in physics and engineering to launch into successful and diverse fusion-related research. Nuclear Fusion reflects Dr. Morse's research in both magnetic and inertial confinement fusion, working with the world's top laboratories, and embodies his extensive thirty-five year career in teaching three courses in fusion plasma physics and fusion technology at University of California, Berkeley.
