Macchi C.202 Folgore Davide F. Jabes,Alessandro Romanello,Niccolò Tognarini,2021-12-02 The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk. V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time, the Mc.202 is the symbol of the dysfunctions in the Italian military-industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different aircraft; the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch; the corruption of politics and the culpable connivance of the high military spheres. The Mc.202 was therefore produced in limited numbers, while there is consensus that air war, especially in the African theatre, would have been different had the aircraft been adopted before.

The Italian Folgore Parachute Division Paolo Morisi,2020-08-19 The North African campaign was one of the hardest fought episodes of the Second World War, yet the vital part played by the Italian Army - and in particular, its Folgore Parachute Division on behalf of the Axis Alliance - is frequently overlooked. Initially created to emulate the German Fallschirmjäger in order

to carry out the planned airborne attack against the British base of Malta, Folgore Airborne Division fought on the battlefields of North Africa - including the key Battle of El Alamein. This elite unit distinguished itself at El Alamein despite inadequate equipment and weapons while facing unfavorable odds. This book describes a paratroop unit that earned the respect of its Allied opponents during some of the hardest-fought engagements of North Africa. The key theme of the book is the paratroopers' involvement in the Axis war effort through an analysis of their training, weaponry and battle tactics. Another key focus is an assessment of the Folgore's specific role during the major battles of the North African campaign. It covers in detail, for example, the Folgore's first fierce military engagement against British and New Zealand troops during the Battle of Alam El Halfa in September 1942. It then details a number of smaller actions that preceded the Battle of El Alamein such as the counter-attack during the British 'Operation Beresford', which led to the capture of Brigadier General G.H. Clifton, commander of the New Zealand 6th Brigade, by a patrol of Folgore soldiers. The focus then shifts upon the Folgore's major engagement of the campaign during the Battle of El Alamein: 'Operation Lightfoot', which was launched by General Montgomery on 24 October 1942. It was designed to break through the Italian-held southern sector of the El Alamein line, where the Bologna, Brescia, Pavia and Folgore Divisions anchored the Axis right flank. While describing key events during this operation, the book also highlights how the

Folgore used unusual tactics to repulse the massive enemy-armored attack. This included letting the enemy advance into a 'cul-de-sac' and then launching a counter-attack against its armored vehicles and infantry units from all sides and by a combination of fire from 47 mm anti-tank guns, mortars, hand grenades and other incendiary devices. It describes the desperate retreat in the desert of the Italian units as a result of the collapse of Axis military defenses in November 1942. Finally, it highlights the role of the paratroopers during the last battles in Tunisia - especially those in defense of the Mareth line and Takrouna in the spring of 1943. Illustrated with rare archival photographs, detailed maps and specially commissioned artwork, this volume offers a fascinating insight into a little-studied aspect of Axis forces. The volume draws heavily upon both Axis and Allied (Britain and New Zealand) archival sources such as the war diaries and the post-battle reports of the military units engaged in North Africa. It thus sheds new light into one of the most important campaigns of the Second World War. By drawing from archival sources from both sides, it also furnishes a more complete and balanced perspective on a critical juncture in the war such as the Battle of El Alamein.

Spitfire V vs C.202 Folgore Donald Nijboer, 2014-04-20 The inability of the Italians and Germans to invade Malta proved decisive for Allied victory in the Mediterranean during World War II, as the islands provided the Allies with a base from which to project air power. Early Italian efforts to pound

the islands into submission were supplemented by major German forces from January 1942 and in a few weeks the situation for the defenders reached a critical stage; in response, in March 1942 the first Spitfires were delivered to Malta. Throughout the summer C.202s fought over Malta, escorting tiny formations of Cant Z.1007s, SM.79s and Ju 88s. The fighting subsided in August and September, but grew in strength with the arrival of more C.202s. In October the Regia Aeronautica could muster three Gruppi with a total of 74 C.202s. For ten days the Italians pressed a relentless attack before attrition brought the offensive to a halt. Throughout the bombing campaign the British were able to supply Malta with ever increasing numbers of Spitfires.

Folgore Da San Gimignano and His Followers: the Complete Poems Folgore (da San Gimignano), 2019 This translation brings the complete works of three minor but important Italian poets -- Dante's contemporaries at the turn of the 14th century -- to English speakers for the very first time. Taken together, the three authors sketch an idealized portrait of courtly life juxtaposed to the gritty, politically fractured world of northern Italy's mercantile urban centers in which they lived. One poet, Folgore di San Gimignano, idealizes court life during the period; the second, Cenne da la Chitarra, looks at it more realistically and parodies Folgore; and the third, Pietro dei Faintinelli, takes inspiration from Folgore's political writings and focuses on the politics of the times. The juxtaposition of the three poets in this

work is effective and arguably shows them to be a poetic school. Tournaments, dinner tables, and public squares spring to life through vivid, material details, which should catch the interest of cultural historians and literary scholars alike. This translation is especially deft at reproducing the rich variety of culinary and sartorial vocabulary offered by the poets, and the translations of Pietro dei Fautinelli are especially well-executed.

Jabes,Alessandro Romanello,Niccolo Tognarini,2022-02-03 The Macchi C.202 was probably the most successful Italian fighter in WW2, the aircraft of almost all Italian top scoring aces. Mc.202 was fast and manoeuvrable, on par with, or better than the allied fighters of the same period. However, there were too few machines to exert a determinant role during the war due to inadequate planning and resources.

Macchi C. 202 Folgore 3rd Edition Przemyslaw Skulski, 2020-11-15 Third edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 3rd edition contains: scale plans, photos and drawings from Technical Manuals, superb colour illustrations of camouflage and markings, and rare b&w archive photographs. Colour photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodellers.

Macchi C.202/C.205V Units in Combat Marco Mattioli, 2022-05-26 A study of the Macchi Folgore and Veltro, the most successful Italian fighters in World War II. With specially commissioned profiles, the book examines how these fighters were conceived, their performance and the fascinating stories of their pilots. Italian fighters, such as the Fiat G.50 and Macchi C.200, had always struggled with their straight-line speed and restricted armament when engaging their Allied counterparts. To solve these problems, Macchi initially

designed the C.202 Folgore using German engines, which contributed to create a faster aircraft, with a superior rate of climb and reachable altitude. Folgore's success in various North African engagements then paved the way for the development of Macchi's most successful fighter, the C.205V Veltro, which managed to combine increased speed and increased power. Packed with specially commissioned artwork and original photos, and written by Italian military aviation specialist Marco Mattioli, this fascinating book explores how the premier Italian fighter of the war came to life and the historical circumstances that prevented it from becoming one of the most dreaded aircraft in the Mediterranean.
