When Crisis Strikes Francis Herd,2020-05-01 In the past few years, so many scandals have rocked corporate South Africa that crises seem to be the norm rather than the exception. In the glare of the public eye, with cameras, microphones and cellphones in their face, many leaders who excel in organisations suddenly become scared, confused and can even appear shady. When Crisis Strikes looks at a variety of crises in the age of social media in South Africa and abroad, with examples of who got it right, who got it wrong and how they could have done better. The organisations range from schools to local companies to multinationals caught up in state capture claims and giants such as Boeing and BP. The book provides ten simple and effective rules to help manage crisis situations. The practical advice in each rule is backed up by academic research that draws from public relations, marketing, management, leadership and psychology. It combines insights from a seasoned journalist and an accomplished academic to give you the advice and tools to ward off a crisis before it strikes and, if it's too late, to resolve a situation quickly and with integrity.

The Automotive Industry and European Integration A. J. Jacobs,2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium.

Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Is That a Bat? Neil Middleton,2020-01-13 Bat detector surveys are carried out by ecological consultants, researchers, conservationists and hobbyists. Understanding and categorising non-bat sounds in surveys offers the potential of knock-on benefits for informing development projects (e.g. other important records discovered within a site), as well as the possibility of associated conservation benefits. In recent years the number of people carrying out these surveys and recording calls with bat detectors has grown considerably. These surveys often generate vast amounts of audio recordings, resulting in the heavy workload associated with completing the sound analysis and reporting process. Those carrying out analysis can be distracted, intrigued or delayed

owing to the occurrence of recordings that are unfamiliar and not identifiable to them. These recordings can relate to ‘difficult to ID’ bat species, but also, often, sounds not related to bats. This can be especially true when noise triggers such as insects, small mammals or birds look like bat-related noise. Therefore, only knowing what bats sound like is not enough. It is extremely useful to know what other sources of noise look and sound like within the same soundscape. This resource will help bat workers, in whatever environment they are in, to be more confident in recognising, categorising and dismissing other sounds. The book includes a substantial downloadable sound library (.wav format) that readers can listen to by ear or process through sound analysis software. Is That a Bat? also caters for sounds that are also heard by ear alone, in the field, during the hours of darkness. These scenarios often have bat surveyors intrigued or confused as to what they are listening to. Occasionally, knowing what these sounds are could be important, or at the very least, of interest. The first chapter caters for the subject overall, including suggestions from the author as to why the subject matter is of value. It also discusses bat-related calls (including social calls) with a view to offering comparisons against the other sources of sound discussed in separate chapters. Continuing through the book, there are chapters covering the following: small mammals; amphibians; insects; birds; electrical/mechanical noise; and other noise/nuisances. Within each chapter there are sub-sections about bat detector recorded sound, sound by ear, as well as advice on techniques and methods to reduce or increase the likelihood of recording other sounds. The book concludes with associated appendices, including a ‘Problem Solving Key’ to help those encountering an unfamiliar sound to narrow it down to the likely source. With technology advancing at pace, the technical ability of the analyst is of huge importance. With a wider perspective and more knowledge, those responsible for interpreting field encounters can be more confident when making decisions

about sources of sound. Apart from that, ‘knowing stuff’ makes the job far more interesting and gives the bat worker a greater appreciation of the natural world within which they are working.

TURKISH POLICY QUARTERLY - VOL. 20 - NO. 1 - SPRING 2021 Delise O’Meally,Kemal Köprülü,Maya Wang,Tuba Torun,Mehmet Yegin,Salim Çevik,Gözde Serbest,Nancy Butler,Ali Abbas,Miloš Todorovic,2021-06-01 Following up on the Winter 2020/21 edition, TPQ’s Spring 2021 issue continues with the series of debates that we hope to ignite on “systems in decay,” and the shifting world order at large. On that note, this edition inquires, “Where Do We Go from Here?”—exploring the deteriorating state of human rights across the globe, from social injustices in the US, to Turkey’s withdrawal from the Istanbul Convention, and to the Chinese government’s growing repression of Uyghurs in Xinjiang. Our authors also discuss how the US's foreign policy is evolving, along with its societal values and political principles, amid ongoing tensions within both its borders and outside of them. In this special issue, Delise O'Meally, CEO of the Institute for Sport and Social Justice, explains how sports can serve as a social institution, one especially suited to spur systemic change in society. O'Meally analyzes the role sports has played in the fight against racial injustice, starting in 1968 when John Carlos and Tommie Smith raised their fists at the Olympics, to 2020, when US sports leagues showed solidarity with the Black Lives Matter movement. While underlining the universality of sports, O'Meally illustrates how sports, with its shared values of teamwork, unity, mutual aspirations, and respect, can advance positive social change. As part of a multi-part contribution, TPQ Publisher, Kemal Köprülü delves further into the systemic problems, including corruption, biased media, and the lack of accountability, that plague American politics. While reflecting on US policies and their domestic and international ramifications in modern history, Köprülü asserts that America is far from being “back”—and, in fact, is at its weakest. As the specter

of a rising China and its connections to Democratic politicians and donors becomes increasingly apparent, Köprülü argues containing China during Biden's presidency will be impossible. Despite their efforts to divert attention away from China and toward Russia, Democrats' corrupt acts will come back to haunt them, Köprülü writes—especially ahead of the 2022 and 2024 elections. Noting that the Chinese government's oppression of Uyghurs and other Turkic Muslim peoples has reached unprecedented levels since late 2016, Maya Wang, senior researcher on China at Human Rights Watch, highlights that the Chinese government has committed, and continues to commit, crimes against humanity in Xinjiang. Wang points to how the response—or lack, thereof—of Muslim-majority countries has been particularly disappointing, including Turkey, whom many had hoped would take a clearer stance against these human rights abuses. However, Wang notes, it is not too late. The Turkish government still has the chance to adopt concrete policies both domestically and internationally, including through individual sanctions, trade restrictions, and measures, to protect the Uyghur and Turkic diaspora in Turkey.

Rookie to Retirement Brian Waugh,2019-11-19 From Rookie to Retirement, 1960 to 1990, Warts and All, PC 1538 The incidents recorded in this book are my recollections of them during my life. I cannot recall working anywhere that was free from corruption, theft, or fraudulent activity. Judge me personally after you read the book, and ask yourself one question, which is this, what would you have done if you found yourself in similar circumstances? A lot of the content is funny—some hilarious, some very serious, and some very sad. I use some bad language only to illustrate frustration, disgust, despair, and temper. You will notice I used first names only. I can honestly say I have met and worked with lot of very honest and trustworthy people over the years, for which I feel very privileged and grateful.

Land Rover Design Nick Hull,2021-10-20 A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design

story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

Re-Modeling the Brand Purchase Funnel Alexander Dierks,2017-04-05 Alexander Dierks conceptualizes and applies a more nuanced model of the brand purchase funnel. The re-conceptualization builds on a holistic, theory-based, and practically applicable set of 10 propositions, which capture dynamics of consumers' contemporary search and decision behavior and allow for a more differentiated assessment of brand performance across the buying cycle. The model's value add is investigated based on two survey-based studies from the automotive and the electricity industry. Using logistic regression analysis, the author uncovers insightful differences in the determinants of consumers' purchase decisions depending on the stage of consideration set formation. The findings support the employment of the more nuanced funnel in brand management.

Round the Bend Jeremy Clarkson,2011-10-13 Jeremy Clarkson gets really riled in Round the Bend What's it like to drive a car that's actively trying to kill you? This and many other burning questions trouble Jeremy Clarkson as he sets out to explore the world from the safety of four wheels. Avoiding the legions of power-crazed traffic wombles attempting to block highway and byway, he: • Shows how the world of performance cars may be likened to Battersea Dogs' Home • Reveals why St Moritz may be the most bonkers town in all of the world • Reminds us that Switzerland is so afraid of snow that any flakes falling on the road are immediately arrested • Argues that washing a car is a waste of time Funny, globe-trotting, irreverent and sometimes downright rude, Round the Bend is packed with curious and fascinating but otherwise hopelessly useless stories and facts about everything under the sun (and just occasionally cars). It's Jeremy Clarkson at his brilliant best. Round the Bend is a collection of Jeremy's motoring journalism from his column in the Sunday Times. Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out Number-one bestseller Jeremy Clarkson writes on cars, current affairs and anything else that annoys him in his sharp and funny collections.
