Foxtrots of the Indian Navy P. R. Franklin, 2015-06-02 Cmde. P.R. Franklin, AVSM, VSM (retd.) narrates some true accounts of the Soviet Foxtrot submarines that were in Indian Navy service. The names of the eight Foxtrots have been anagrammed to arrive at the name Vanshali, which is the central submarine character of these narratives. The book covers a spectrum of the activities of Foxtrots in the service including facets of training in the USSR, taking possession, bringing them to India, wartime and peacetime activities, and finally beaching a Foxtrot for display as a museum. The book has interesting revelations of a brush with a nuclear submarine in the Arabian Sea and of an Indian submarine's predicament when confronted with the situation of meeting up with the American Carrier USS Enterprise when it entered the Bay of Bengal during 1971 Indo-Pak war.

Transition to Eminence G. M. Hiranandani, 2005 This volume of the navy's history covers the period from 1976 to 1990. It examines the navy's success in keeping abreast of advances in technology in step with progressive self-reliance. In a decade and a half of innovation, the navy equipped its indigenously built frigates, corvettes, and other vessels with combinations of the latest available weapons and equipment from the Soviet Union, from Europe, and from indigenous sources. A tiny ship design cell, which in 1965 was designing yard craft, was by 1990 designing an aircraft carrier, submarines, and missile destroyers. The new acquisitions from the Soviet Union ranged from missile destroyers, conventional submarines, and long-range reconnaissance aircraft, to minesweepers. All these high-tech inductions needed to be operated and manned by better-educated and better-trained personnel. New maintenance, repair, and refit facilities had to be created. The increase in the volume of spares and the diversity of sources compelled modernization of the logistics system. This volume analyzes how these problems were tackled.

The Naval Arms Trade Ian Anthony, 1990 This book offers a sober appraisal of the world trade in naval weapon systems at a time when recent attacks on merchant shipping in the Persian Gulf have kept maritime security at the centre of global attention. At the same time India, outside the international non-proliferation regime, has become the first-ever customer for a nuclear attack submarine. In 1987-88, the most expensive and controversial arms sales were related to naval systems, and yet while regional navies are busy increasing their firepower, the traditional naval powers remain dependent on their sea-borne trade. In particular the book highlights critical areas in which trade in naval systems differs from the sale of land or air systems, and it discusses the implications of these differences.

Deconstructing Dr. Strangelove Sean M. Maloney, 2020-07-01 King of the Cold War crisis film, *Dr. Strangelove* became a cultural touchstone from the moment of its release in 1964. The duck-and-cover generation saw it as a satire on nuclear issues and Cold War thinking. Subsequent generations, removed from the film's historical moment, came to view it as a quasi-documentary about an unfathomable secret world. Sean M. Maloney uses *Dr. Strangelove* and other genre classics like *Fail Safe* and *The Bedford Incident* to investigate a curious pop cultural contradiction. Nuclear crisis films repeatedly portrayed the failures of the Cold War's deterrent system. Yet the system worked. What does this inconsistency tell us about the genre? What does it tell us about the deterrent system, for that matter? Blending film analysis with Cold War history, Maloney looks at how the celluloid crises stack up against reality—or at least as much of reality as we can reconstruct from these films with confidence. The result is a daring intellectual foray that casts new light on *Dr. Strangelove*, one of the Cold War era's defining films.

Maritime Heritage of India Indian Navy, This photo-essay book is a modest attempt to link our maritime past, along with the entire progress, to the present, and in light of the same, to relate the future of the nation to a distinct maritime orientation with the Indian Navy as the lead national

maritime agency. It traces about 7,500 years of India's maritime history and heritage. There are eight chapters, each dwelling on different aspects of maritime heritage namely, trade and commerce, evolution of cultures, influence of architecture, forts and lighthouses, naval battles and the evolution of the Indian navy. With images and artwork, this book will give the reader a vivid insight into our country's rich maritime past.
