Redefining Judaism in an Age of Emancipation Christian Wiese,2006-11-30 The first comprehensive comparative interpretation of Samuel Holdheim's radical Reform philosophy in the context of the intellectual, cultural, and political experience of mid-nineteenth century German Jewry, provided by leading international scholars in the field of Jewish intellectual history.

Reconstructing a National Identity Marsha L. Rozenblit,2004 This book explores the impact of war and political crisis on the national identity of Jews, both in the multinational Habsburg monarchy and in the new nation-states that replaced it at the end of World War I. Jews enthusiastically supported the Austrian war effort because it allowed them to assert their Austrian loyalties and Jewish solidarity at the same time. They faced a grave crisis of identity when the multinational state collapsed and they lived in nation-states mostly uncomfortable with ethnic minorities. This book raises important questions about Jewish identity and about the general nature of ethnic and national identity.

The Consuming Temple Paul Lerner,2015-05-05 Department stores in Germany, like their predecessors in France, Britain, and the United States, generated great excitement when they appeared at the end of the nineteenth century. Their sumptuous displays, abundant products, architectural innovations, and prodigious scale inspired widespread fascination and even awe; at the same time, however, many Germans also greeted the rise of the department store with considerable unease. In *The Consuming Temple*, Paul Lerner explores the complex German reaction to department stores and the widespread belief that they posed hidden dangers both to the individuals, especially women, who frequented them and to the nation as a whole. Drawing on fiction, political propaganda, commercial archives, visual culture, and economic writings, Lerner provides multiple perspectives on the department store, placing it in architectural, gender-historical, commercial, and psychiatric contexts. Noting that Jewish entrepreneurs founded most German department stores, he argues that Jews and Jewishness stood at the center of the consumer culture debate from the 1880s, when the stores first appeared, through the latter 1930s, when they were Aryanized by the Nazis. German responses to consumer culture and the Jewish question were deeply interwoven, and the Jewish department store, framed as an alternative and threatening secular temple, a shrine to commerce and greed, was held responsible for fundamental changes that transformed urban experience and challenged national traditions in Germany's turbulent twentieth century.

Space and Self in Early Modern European Cultures David Warren Sabeau,Malina Stefanovska,2012-01-01 The notion of 'selfhood' conjures up images of self-sufficiency, integrity, introspectiveness, and autonomy — characteristics typically associated with 'modernity.' The seventeenth century marks the crucial transition to a new form of 'bourgeois' selfhood, although the concept goes back to the pre-modern and early modern period. A richly interdisciplinary collection, *Space and Self* integrates perspectives from history, history of literature, and history of art to link the issue of selfhood to the new and vital literature on space. As *Space and Self* shows, there have at all times been multiple paths and alternative possibilities for forming identities, marking personhood, and experiencing life as a concrete, singular individual. Positioning self and space as specific and evolving constructs, a diverse group of contributors explore how persons become embodied in particular places or inscribed in concrete space. *Space and Self* thus sets the terms for current discussion of these topics and provides new approaches to studying their cultural specificity.

Gender, Judaism, and Bourgeois Culture in Germany, 1800-1870 Benjamin Maria Baader,2006-06-14 Baader examines changes in practices of prayer and synagogue worship, rabbinic writings that encouraged men to cultivate a Judaism shaped by feminine values, the transformation of exclusively male philanthropic organizations into modern voluntary organizations in which men and women participated, and the new roles assumed by women as educators, activists, and religious writers. By documenting the expansion of women's spaces and women's roles in bourgeoisie Judaism and tracing the feminization of Jewish men's religious practices, Baader provides fresh insights into the gender organization of traditional Jewish culture and modern German middle-class society.--BOOK JACKET.

Thomas Mann and Shakespeare Tobias Döring,Ewan Fernie,2015-10-22 Bringing together scholars from diverse disciplines and countries, *Thomas Mann and Shakespeare* is the first book-length study to explore the always fascinating, if sometimes disturbing, connections between Shakespeare and Mann. It establishes startling resonances between the central works of these two authors, pairing, for instance, *Der Zauberberg* with *The Tempest*, *Der Tod in Venedig* with *The Merchant of Venice*, Tonio Kröger with *Othello* and *Love's Labour's Lost* with *Doktor Faustus*. Showing how the conjunction of Shakespeare and Mann affords new, alternative perspectives on fundamental issues such as modernity, irony, art, desire, authorship and religion, *Thomas Mann and Shakespeare* challenges the increasingly walled-in specialism of literary topics and periodization and demonstrates the scope for new ways of reading in literary studies.

Paul Hindemith Stephen Luttmann,2013-01-11 *Paul Hindemith: A Research and Information Guide* is an annotated bibliography concerning both the nature of primary sources related to the composer and the scope and significance of the secondary sources which deal with him, his compositions, and his influence as a musician and teacher. Israel's History and the History of Israel Mario Liverani,2014-12-18 In 'Israel's History and the History of Israel' one of the world's foremost experts on antiquity addresses the birth of Israel and its historic reality. Many stories have been told of the founding of ancient Israel, all rely on the biblical story in its narrative scheme, despite its historic unreliability. Drawing on the literary and archaeological record, this book completely rewrites the history of Israel. The study traces the textual material to the times of its creation, reconstructs the evolution of political and religious ideologies, and firmly inserts the history of Israel into its ancient-oriental context.

The Architecture of Rome Ulrich Füst,1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the 'eternal city'. Rome is eternal above all because it was always young, always 'in its prime'. Here the buildings that defined the West appeared over more than 2000 years, here the history of European architecture was written. The foundations were laid even in ancient Roman times, when the first attempts were made to design interiors and thus make space open to experience as something physical. And at that time the Roman architects also started to develop building types that are still valid today, thus creating the cornerstone of later Western architecture. In it Rome's primacy remained unbroken -- whether it was with old St Peter's as the first medieval basilica or new St. Peter's as the building in which Bramante and Michelangelo developed the High Renaissance, or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna, Bohemia and Lower Franconia, and also with Modern buildings, of which there are many unexpected pearls to be found in Rome. All this is comprehensible only if it is presented historically, i. e. in chronological sequence, and so the guide has not been arranged topographically as usual but chronologically. This means that one is not led in random sequence from a Baroque building to an ancient or a modern one, but the historical development is followed successively. Every epoch is preceded by an introduction that identifies its key features. This produces a continuous, lavishly illustrated history of the architecture of Rome -- and thus at the same time of the whole of the West. Practical handling is guaranteed by an alphabetical index and detailed maps, whose information does not just immediately illustrate the historical picture, but also makes it possible to choose a personal route through history.

The Pillars of the First Temple (1 Kgs 7,15-22) Daniel Prokop,2020-04-27 In this work Daniel Prokop examines the description of the pillars in 1 Kgs 7, 15-22. He analyzes extrabiblical parallels, Greek and Hebrew textual witnesses as well as iconography and archaeological finds and asks about the symbolic meaning of the columns.

Purity and the Forming of Religious Traditions in the Ancient Mediterranean World and Ancient Judaism Christian Frevel,Christophe Nihan,2012-11-01 Focusing on concepts, practices and images associated with purity in the ancient Mediterranean, this volume contributes new aspects to the current discussion about the forming of religious traditions, from a comparative perspective that acknowledges individual developments, mutual exchanges, as well as transcultural processes.

National Innovation Systems Richard R. Nelson,1993-06-03 The slowdown of growth in Western industrialized nations in the last twenty years, along with the rise of Japan as a major economic and technological power (and enhanced technical sophistication of Taiwan, Korea, and other NICs) has led to what the authors believe to be a techno-nationalism. This combines a strong belief that technological capabilities of a nation;s firms are a key source of their competitive process, with a belief that these capabilities are in a sense national, and can be built by national action. This book is about these national systems of technical innovation. The heart of the work contains studies of seventeen countries--from large market-oriented industrialized ones to several smaller high income ones, including a number of newly industrialized states as well. Clearly written, this work highlights institutions and mechanisms which support technical innovation, showing similarities, differences, and their sources across nations, making this work accessible to students as well as the scholars of innovation.

Temples and Sanctuaries in the Roman East Arthur Segal,2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE, within a broad region encompassing the modern states of Syria, Lebanon, Israel and Jordan. Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome. The source of this power lay in the uniformity of the architectural language, the inventory of forms, the choice of styles and the spatial layout of the buildings. Thus, while temples have an eclectic character, there is an underlying unity of form comprising the podium, the stairway between the terminating walls (antae) and the columns along the entrance front - in other words, the axiality, frontality and symmetry of the temple as viewed from outside. The temples and sanctuaries studied in this volume demonstrate individual nuances of plan, spatial design, location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories: Vitruvian temples (derived from Hellenistic-Roman architecture) and Non-Vitruvian temples (those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius). The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion.

The Day of Atonement Thomas Hieke,Tobias Nicklas,2011-11-11 The “Day of Atonement” in Leviticus 16 had a formative influence on Judaism and Christianity. The essays in this volume form a representative cross section of the history of reception of Leviticus 16 and the tradition of the Yom ha-Kippurim.

The Oxford Handbook of Roman Egypt Christina Riggs,2012-06-21 This handbook, arranged in seven thematic sections, is unique in drawing together many different strands of research on Roman Egypt, in order to suggest both the state of knowledge in the field and the possibilities for collaborative, synthetic, and interpretive research.

The Crimson Code Rachel Lee,2010-11-01 DECEMBER 25: A BOMB RIPS THROUGH A PACKED CATHEDRAL IN JAKARTA. As the hours pass, terrorist explosions continue around the globe, triggering worldwide panic and creating a nightmare beyond words.... Inside the covert agency known only as Office 119, agents Renate Bächle and Lawton Caine are called upon to identify the groups responsible for the bloodshed. But the so-called Black Christmas attacks are nothing more than a smoke screen for a far more sinister conspiracy. At its heart are ruthless secret societies with blood ties that date back thousands of years, whose goals are nothing less than global domination. Renate and Lawton are only beginning to fathom how far the darkness extends. With the U. S. president set to deploy nuclear weapons against the wrong targets and religious violence erupting across Europe, they must untangle the interwoven plots before time runs out and Armageddon becomes a terrifying reality.
