Farthest North Fridtjof Nansen,2000-05-12 In 1893 Nansen set sail in the Fram, a ship specially designed and built to be frozen into the polar ice cap, withstand its crushing pressures, and travel with the sea's drift closer to the North Pole than anyone had ever gone before. Experts said such a ship couldn't be built and that the voyage was tantamount to suicide. This brilliant first-person account, originally published in 1897, marks the beginning of the modern age of exploration. Nansen vividly describes the dangerous voyage and his 15-month-long dash to the North Pole by sledge. An unforgettable tale and a must-read for any armchair explorer.

Farthest North Fridtjof Nansen,2022-05-17 The memoirs by Fridtjof Nansen tell about the epoch-making attempt to reach the North Pole, which ended in the farthest northern journey in the history of his time. Fridtjof Nansen had an extraordinary idea of how to get to the North Pole by ship. After discovering that the remains of the boat, wrecked near Russian Siberia, were found in the Northern Atlantic, he presumed that there should be some drift through the North Pole. So, he developed a specifically customized ship that was frozen into an ice cube and crossed the Polar waters in this shape. The vessel did freeze successfully. Yet, the journey was too long, and Nansen left the ship to reach the Pole on skis. He and his companion Hjalmar Johansen left for the pole but didn't manage to get it. However, they were the first people to achieve the farthest north latitude of 86°13.6’N. The story tells about this challenging journey through snow and waters makes a unique record of one of the most incredible northern expeditions.

Farthest North: volume II Fridtjof Nansen,2023-11-27 Nansen's Fram expedition was an attempt by the Norwegian explorer Fridtjof Nansen to reach the geographical North Pole by harnessing the natural east-west current of the Arctic Ocean. Despite much discouragement from other polar explorers, in 1893, Nansen took his schooner Fram, specially designed to withstand the relentless challenges of the poles, to the New Siberian Islands in the eastern Arctic Ocean, froze her into the pack ice, and waited for the drift to carry her towards the North Pole. Three years later, Frederick Jackson, who had organised his own expedition to Franz Josef Land, was astonished to see a tall man, wearing a soft felt hat, loosely made, voluminous clothes and long shaggy hair and beard, all reeking with black grease. After a moment's awkward hesitation, Jackson recognised his visitor: You are Nansen, aren't you?, and received the reply Yes, I am Nansen. Nansen's first task on his return was to write his account of the voyage. This he did remarkably quickly, producing 300,000 words of Norwegian text by November 1896; the English translation, titled “Farthest North” was ready in January 1897. The book was an instant success, and secured Nansen's long-term financial future. Although Nansen retired from exploration after this expedition, the methods of travel and survival he developed with Johansen influenced all the polar expeditions, north and south, which followed in the subsequent three decades. In his brilliant and spellbound first-person account of this epic polar expedition, Nansen vividly describes the dangerous voyage he took with his crew in the “Fram”, and the 15-month-long attempt to reach the North Pole by sledge, when realizing that the ship would not drift to the pole, he departed with Johansen alone and faced on foot the drifting ice, violent storms, the extreme cold of the Arctic winter and the attacks of wild animals, like polar bears and walruses. “Farthest North” is an unforgettable tale and a unique chance to accompany one of the world’s greatest explorers on one of history’s most daring expeditions.

Farthest North Fridtjof Nansen,2008-06-17 If Outside magazine had been around during the first turn of the century, Fridtjof Nansen would have been its No. 1 cover boy.—The Chicago Sun-Times In September of 1893, Norwegian zoologist Fridtjof Nansen and crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go farthest north. They survived a winter in a moss hut eating walruses and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration. 20 b/w photographs. The First Crossing of Greenland Fridtjof Nansen,1890

Nansen Roland Huntford,2012-08-23 Behind the great polar explorers of the early twentieth century - Amundsen, Shackleton, Scott in the South and Peary in the North - looms the spirit of Fridtjof Nansen (1861-1930), the mentor of them all. He was the father of modern polar exploration, the last act of territorial discovery before the leap into space began. Nansen was a prime illustration of Carlyle's dictum that 'the history of the world is but the biography of great men'. He was not merely a pioneer in the wildly diverse fields of oceanography and skiing, but one of the founders of neurology. A restless, unquiet Faustian spirit, Nansen was a Renaissance Man born out of his time into the new Norway of Ibsen and Grieg. He was an artist and historian, a diplomat who had dealings with Lenin, Trotsky and Stalin, and played a part in the Versailles Peace Conference, where he helped the Americans in their efforts to contain the Bolsheviks. He also undertook famine relief in Russia. Finally, working for the League of Nations as both High Commissioner for Refugees and High Commissioner for the Repatriation of Prisoners of War, he became the first of the modern media-conscious international civil servants.
