Your Inner Fish Neil Shubin, 2008-01-15 The paleontologist and professor of anatomy who co-discovered Tiktaalik, the “fish with hands,” tells a “compelling scientific adventure story that will change forever how you understand what it means to be human” (Oliver Sacks). By examining fossils and DNA, he shows us that our hands actually resemble fish fins, our heads are organized like long-extinct jawless fish, and major parts of our genomes look and function like those of worms and bacteria. Your Inner Fish makes us look at ourselves and our world in an illuminating new light. This is science writing at its finest—enlightening, accessible and told with irresistible enthusiasm.

The Fabric of the Cosmos Brian Greene, 2007-12-18 NATIONAL BESTSELLER • From one of the world’s leading physicists and author of the Pulitzer Prize finalist The Elegant Universe, comes “an astonishing ride” through the universe (The New York Times) that makes us look at reality in a completely different way. Space and time form the very fabric of the cosmos. Yet they remain among the most mysterious of concepts. Is space an entity? Why does time have a direction? Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive, mathematical concepts like String Theory, the Heisenberg Uncertainty Principle, and Inflationary Cosmology with analogies drawn from common experience. From Newton’s unchanging realm in which space and time are absolute, to Einstein’s fluid conception of spacetime, to quantum mechanics’ entangled arena where vastly distant objects can instantaneously coordinate their behavior, Greene takes us all, regardless of our scientific backgrounds, on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.

The Boys in the Boat Daniel James Brown, 2013-06-04 Now a Major Motion Picture Directed by

George Clooney The #1 New York Times–bestselling story about the American Olympic rowing triumph in Nazi Germany—from the author of *Facing the Mountain*. For readers of *Unbroken*, out of the depths of the Depression comes an irresistible story about beating the odds and finding hope in the most desperate of times—the improbable, intimate account of how nine working-class boys from the American West showed the world at the 1936 Olympics in Berlin what true grit really meant. It was an unlikely quest from the start. With a team composed of the sons of loggers, shipyard workers, and farmers, the University of Washington’s eight-oar crew team was never expected to defeat the elite teams of the East Coast and Great Britain, yet they did, going on to shock the world by defeating the German team rowing for Adolf Hitler. The emotional heart of the tale lies with Joe Rantz, a teenager without family or prospects, who rows not only to regain his shattered self-regard but also to find a real place for himself in the world. Drawing on the boys’ own journals and vivid memories of a once-in-a-lifetime shared dream, Brown has created an unforgettable portrait of an era, a celebration of a remarkable achievement, and a chronicle of one extraordinary young man’s personal quest.

The Big Burn Timothy Egan, 2009-10-19 National Book Award–winner Timothy Egan turns his historian’s eye to the largest-ever forest fire in America and offers an epic, cautionary tale for our time. On the afternoon of August 20, 1910, a battering ram of wind moved through the drought-stricken national forests of Washington, Idaho, and Montana, whipping the hundreds of small blazes burning across the forest floor into a roaring inferno that jumped from treetop to ridge as it raged, destroying towns and timber in the blink of an eye. Forest rangers had assembled nearly ten thousand men to fight the fires, but no living person had seen anything like those flames, and neither the rangers nor anyone else knew how to subdue them. Egan recreates the struggles of the

overmatched rangers against the implacable fire with unstoppable dramatic force, and the larger story of outsized president Teddy Roosevelt and his chief forester, Gifford Pinchot, that follows is equally resonant. Pioneering the notion of conservation, Roosevelt and Pinchot did nothing less than create the idea of public land as our national treasure, owned by every citizen. Even as TR's national forests were smoldering they were saved: The heroism shown by his rangers turned public opinion permanently in favor of the forests, though it changed the mission of the forest service in ways we can still witness today. This e-book includes a sample chapter of *SHORT NIGHTS OF THE SHADOW CATCHER*.

What It's Like to Be a Bird David Allen Sibley, 2020-04-14 The bird book for birders and nonbirders alike that will excite and inspire by providing a new and deeper understanding of what common, mostly backyard, birds are doing—and why: Can birds smell?; Is this the same cardinal that was at my feeder last year?; Do robins 'hear' worms? The book's beauty mirrors the beauty of birds it describes so marvelously. —NPR In *What It's Like to Be a Bird*, David Sibley answers the most frequently asked questions about the birds we see most often. This special, large-format volume is geared as much to nonbirders as it is to the out-and-out obsessed, covering more than two hundred species and including more than 330 new illustrations by the author. While its focus is on familiar backyard birds—blue jays, nuthatches, chickadees—it also examines certain species that can be fairly easily observed, such as the seashore-dwelling Atlantic puffin. David Sibley's exacting artwork and wide-ranging expertise bring observed behaviors vividly to life. (For most species, the primary illustration is reproduced life-sized.) And while the text is aimed at adults—including fascinating new scientific research on the myriad ways birds have adapted to environmental changes—it is nontechnical, making it the perfect occasion for parents and grandparents to share their love of

birds with young children, who will delight in the big, full-color illustrations of birds in action. Unlike any other book he has written, *What It's Like to Be a Bird* is poised to bring a whole new audience to David Sibley's world of birds.

The National Parks Dayton Duncan, Ken Burns, 2009-09-08 The companion volume to the twelve-hour PBS series from the acclaimed filmmaker behind *The Civil War*, *Baseball*, and *The War*. America's national parks spring from an idea as radical as the Declaration of Independence: that the nation's most magnificent and sacred places should be preserved, not for royalty or the rich, but for everyone. In this evocative and lavishly illustrated narrative, Ken Burns and Dayton Duncan delve into the history of the park idea, from the first sighting by white men in 1851 of the valley that would

become Yosemite and the creation of the world's first national park at Yellowstone in 1872, through the most recent additions to a system that now encompasses nearly four hundred sites and 84 million acres. The authors recount the adventures, mythmaking, and intense political battles behind the evolution of the park system, and the enduring ideals that fostered its growth. They capture the importance and splendors of the individual parks: from Haleakala in Hawaii to Acadia in Maine, from Denali in Alaska to the Everglades in Florida, from Glacier in Montana to Big Bend in Texas. And they introduce us to a diverse cast of compelling characters—both unsung heroes and famous figures such as John Muir, Theodore Roosevelt, and Ansel Adams—who have been transformed by these special places and committed themselves to saving them from destruction so that the rest of us could be transformed as well. *The National Parks* is a glorious celebration of an essential expression of American democracy.

Planet Earth Jonathan Weiner, 1986 Plate tectonics, oceanography, climatic change, the composition of the other planets, the workings of the sun, the origin of natural resources, and the origin and future of life on Earth are among the topics discussed.

American Portrait PBS, 2021-06-22 Based on the popular and revolutionary PBS multiplatform documentary project, an inspiring and striking photographic portrait that brilliantly captures the tumultuous, historic year that was 2020, offering an intimate look at the heart and soul of our national life and what it means to be an American today, revealed through the stories of ordinary people from sea to shining sea. Everyone has a story . . . In January 2020, in celebration of its 50th anniversary, PBS launched an ambitious national storytelling project, *American Portrait*, inviting people across the country to participate in a national conversation about what it means to be an American today. The multiplatform experience, including a television series that will air on PBS stations nationwide in January 2021, has created a communal voice through the individual stories of participants—each one a unique stitch in the beautiful, diverse quilt that is America. A vivid yet nuanced snapshot of who we are, this visually striking companion volume features more than 400 entries and photographs, all which began with an answer to a simple cue: My American story started when . . . You don't know what it's like to . . . My greatest challenge is . . . The tradition I carry on is . . . I was raised to believe . . . What keeps me up at night is . . . I took a risk when . . . When I step outside my door . . . Most days I feel . . . Told by people of all ages, orientations, and walks of life, these unique stories of joy, adversity, love, sacrifice, grief, sharing, triumph, and grace, centered on

the themes of family, work, fun, faith, and community, illuminate the struggles, hopes, dreams, and convictions of Americans today. The more we share with our fellow citizens, the more we can see a real, complex, and fascinating representation of our country that is far richer and deeper than headlines and elections tell us. As intriguing, thoughtful, and distinct as the nation it embodies, *American Portrait* is a photographic manifestation of Walt Whitman's immortal words, "I am large. I contain multitudes"—and a vital and ultimately hopeful reminder that what we all share is much greater and enduring than what may divide us.

Dream Dancers: E Pluribus Unum— The Battle for American Equality 1924-1947 Spencer Jourdain,2019-12-15

Evolution Carl Zimmer,2010-11-23 “This brilliant book is a virtual Voyage of the Beagle! Carl

Zimmer shows, with the benefit of a hundred and fifty years of hindsight, how right Darwin was.” —Steve Jones, author of *Darwin’s Ghost* *Darwin’s The Origin of Species* was breathtaking—beautifully written, staunchly defended, defiantly radical. Yet it emerged long before modern genetics, molecular biology, and contemporary findings in paleontology. In this remarkable book, a rich and up-to-date view of evolution is presented that explores the far-reaching implications of Darwin’s theory. At a time when controversies surrounding creationism and education are bursting into public consciousness, this book’s emphasis on the power, significance, and relevance of evolution will make it a catalyst for public debate. Evolution marks a turning point in the 150-year debate and will be an indispensable asset to any serious reader with an interest in the life sciences, a passion for truth in education, or a concern for the future of the planet. “The evolution of life over four billion years is a grand narrative, full of plots, intrigues, surprises and deaths. Carl Zimmer tells the tale with zest and style.” —Matt Ridley, New York Times–bestselling author “Proceeding from the flurry of preparations for Darwin’s famous voyage, Carl Zimmer leads us off on a journey of our own, tracking the development—and the implications—of one of the most powerful ideas in the biological sciences.” —Scientific American “Science writer Zimmer does a superb job of providing a sweeping overview of most of the topics critical to understanding evolution, presenting his material from both a historical and a topical perspective.” —Publishers Weekly “Popular science that will truly be popular.” —Booklist
