The Flatiron Alice Sparberg Alexiou,2010-06-08 The marvelous story of the Flatiron: the instantly recognizable building that signaled the start of a new era in New York history. Critics hated it. The public feared it would topple over. Passersby were knocked down by the winds. But even before it was completed, the Flatiron Building had become an unforgettable part of New York City. The Flatiron Building was built by the Chicago-based Fuller Company--a group founded by George Fuller, the father of the skyscraper--to be their New York headquarters. The company's president, Harry Black, was never able to make the public call the Flatiron the Fuller Building, however. Black's was the country's largest real estate firm, constructing Macy's department store, and soon after the Plaza Hotel, the Savoy Hotel, and many other iconic buildings in New York as well as in other cities across the country. With an ostentatious lifestyle that drew constant media scrutiny, Black made a fortune only to meet a tragic, untimely end. In *The Flatiron*, Alice Sparberg Alexiou chronicles not just the story of the building but the heady times in New York at the dawn of the twentieth century. It was a time when Madison Square Park shifted from a promenade for rich women to one for gay prostitutes; when photography became an art; motion pictures came into existence; the booming economy suffered increasing depressions; jazz came to the forefront of popular music--and all within steps of one of the city's best-known and best-loved buildings.

Building the Black Arts Movement Jonathan Fenderson,2019-03-30 As both an activist and the dynamic editor of *Negro Digest*, Hoyt W. Fuller stood at the nexus of the Black Arts Movement and the broader black cultural politics of his time. Jonathan Fenderson uses historical snapshots of Fuller's life and achievements to rethink the period and establish Fuller's important role in laying the foundation for the movement. In telling Fuller's story, Fenderson provides provocative new insights into the movement's international dimensions, the ways the movement took shape at the local level, the impact of race and other factors, and the challenges--corporate, political, and personal--that Fuller and others faced in trying to build black institutions. An innovative study that approaches the movement from a historical perspective, *Building the Black Arts Movement* is a much-needed reassessment of the trajectory of African American culture over two explosive decades.

Skyscraper Facades of the Gilded Age Joseph J. Korom, Jr.,2013-03-08 This book is about the design of the facade of 51 of America's most extravagant early skyscrapers. Included are the biographies of noted architects and the aristocrats who financed America's first skyscrapers. This book discusses the influences of European aesthetic values in America--and scandals, rogues and class distinctions. Interpretations by contemporary critics are sprinkled throughout the text. Woven throughout the book are inquiries about the validity of Greek and Roman mythologies and their relationships to modern America and its spirit of invention and progress. Foreign traditions were challenged by some architects but then accepted by most. Why was it necessary for the long-dead hero of a faraway civilization to be included on the facade of a newly invented American skyscraper? This book tells why.

Sixteenth Street Architecture Sue A. Kohler,1978

New Views on R. Buckminster Fuller Hsiao-yun Chu,Roberto G. Trujillo,2009 In this book, leading scholars in architecture, design, history, and communications discuss the work of R. Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century.

Your Private Sky Richard Buckminster Fuller,2001 This book complements the volume *R. Buckminster Fuller, Your Private Sky: Design Art Science* and gives an authentic insight into the development of Fuller's architectonic, technical and anthropological concepts. This poet of technology was a poet as engineer, a thinker as designer, an artist as researcher who left an immense testament of writings - including texts of visionary importance, great consistency, penetrating linguistic force and not least of urgent topicality. The book documents various aspects of his widely ramified publications. Fuller spoke to the whole world, indeed to Spaceship Earth, the metaphor that he coined in 1950. He did this as one of the greatest and incomparably original individuals of our time in a genuinely American sense. Some of the texts are published here for the first time, such as his first programmatic manuscript *Lightful Houses* (1928), an informative lecture text on *Dymaxion House* (1929), his *Letter to Einstein* (1944) and the convolute *Noah's ArkII* (1951) as a commented facsimile. Photographs from Fuller's estate complement the texts.

The Chief Justiceship of Melville W. Fuller, 1888-1910 James W. Ely,2012-11-01 A study of the man who led the Supreme Court as the nineteenth century ended and the twentieth began, exploring issues of property, government authority, and more. In this comprehensive interpretation of the Supreme Court during the pivotal tenure of Melville W. Fuller, James W. Ely Jr., provides a judicial biography of the man who led the Court from 1888 until 1910 as well as a comprehensive and thoughtful analysis of the jurisprudence dispensed under his leadership. Highlighting

Fuller’s skills as a judicial administrator, Ely argues that a commitment to economic liberty, the security of private property, limited government, and states’ rights guided Fuller and his colleagues in their treatment of constitutional issues. Ely directly challenges the conventional idea that the Fuller Court adopted laissez-faire principles in order to serve the needs of business. Rather, Ely presents the Supreme Court’s efforts to safeguard economic rights not as a single-minded devotion to corporate interests but as a fulfillment of the property-conscious values that shaped the constitution-making process in 1787. The resulting study illuminates a range of related legal issues, including the Supreme Court’s handling of race relations, criminal justice, governmental authority, and private law disputes.

Oregon's Capitol Buildings Tom Fuller,2013 The state of Oregon has had not one, not two, but three state capitol buildings. Two of them met a sudden and unexpected end--destruction by fire. William Willson, a pioneer of Salem, donated some acres from his Donation Land Claim for a state capitol. The first, built in 1855, may have been torched in a desperate fight to move the capitol to Corvallis. A second capitol, built in 1873, was patterned after the US Capitol in Washington, DC. This capitol, adorned with a beautiful copper-clad dome, faced west toward the Willamette River. On April 25, 1935, a fire started in a basement storage area. It quickly spread to the whole structure, and within four hours, the entire thing lay in ruins. After an exhaustive design process, a new capitol was built in the midst of the Great Depression, topped with a golden pioneer.
