*Eternal Doctrine* Tommi Salminen, 2017-10-16 Six months have passed since the Precursor starship Vindicator arrived at the starbase in Earth's orbit. The Ur-Quan are busy fighting a civil war, but their forces are still grossly superior to those of the hastily assembled New Alliance of Free Stars. Both a carrot and a stick are bound to be needed when the Alliance deals with alien races. As Captain Zelnick of the Vindicator said: If you plan to save the galaxy, you have to be prepared to push a few old ladies down the stairs. This book continues where Groombridge Log left off and concludes the novelization of Star Control 2.

*The Elorian Conscript* Robert C. Seidler, 2010-08-15 Praise for *The Elorian Conscript*: This novel has a nail-biting, white-knuckle plot. Fiction thrives on conflict, and this book has conflict in spades. Danger jumps out over and over. This is a plot full of switcheroos. Whom do we trust? Whom are we fighting for? This is a high-concept novel about standing up for our ideals. *The Elorian Conscript* is a highly entertaining and thought-provoking read. - John M. Daniel: Editor, Writer, Consultant - [www.danielpublishing.com](http://www.danielpublishing.com) A true page-turner! With *The Elorian Conscript*, Rob has crafted an imaginative sci-fi/fantasy tale with plenty of action, adventure, intrigue, and even some interspecies romance and interstellar war to boot. The engaging story and compelling characters drew me in, and at the end of the book, I found myself wanting to jump right into the sequel! - John David Kudrick: Editor, Writer, Consultant

[www.johndavidkudrick.com](http://www.johndavidkudrick.com) Disgruntled assistant plant manager and ex-Army Ranger, Dustin Atropos, is a man of conscience who often feels like he's surrounded by soulless zombies. Living on modern-day planet Earth, it's no wonder Dustin can't seem to find his place in the world. It's no wonder he feels like somewhere along the line he missed out on his true destiny. As it turns out, Dustin didn't miss his destiny. It just took it's sweet damn time finding him. While Dustin is on a fishing trip to sort out his life (and catch all the cutthroat trout he can eat) his destiny picks him up, along with his dog and his truck, and moves him to a new square on life's chess board; four million light years away, in a different galaxy. Thus begins the saga of Dustin Atropos as he fights to stay alive, overcome the devious schemes of his adversaries, win back the love of his wife, and, along the way, save his home planet ... a place he sometimes loves to hate ... a place he, in the past, has had to escape from with his retreats to the mountains ... and a place that, deep down inside, he cherishes with every fiber of his being. Along the way some questions get asked. Some of them receive answers. Some can only be answered in the future. Where are we (humans) headed? What constitutes ethical behavior? Can an Eagle Scout and member of the Order of the Arrow, save the Earth, and possibly the universe? Will Linda Atropos ever get her husband back? What happened to Dustin and Linda's pet German Shepherd, Took? And what the hell is a Nornak? *The Elorian Conscript* is the first book of a planned trilogy. The sequel is in progress and stands at 60,000 words to date.

Joe Paladin's insight and engineering expertise, combined with help from partners, brings a new line of products to market. These products have a remarkable effect on water and serve to rejuvenate the body. These products include solid energy crystals that never wear out, and serve as a proof of concept for the physics presented in this book. The Earth's magnetosphere is pure primordial energy accelerating towards a massive near term energy release. **An Assessment of the Prospects for Inertial Fusion Energy** National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Prospects for Inertial Confinement Fusion Energy Systems, 2013-07-05 The potential for using fusion energy to produce commercial electric power was first explored in the 1950s. Harnessing fusion energy offers the prospect of a nearly carbon-free energy source with a virtually unlimited supply of fuel. Unlike nuclear fission plants, appropriately designed fusion power plants would not produce the large amounts of high-level nuclear waste that requires long-term disposal. Due to these prospects, many nations have initiated research and development (R&D) programs aimed at developing fusion as an energy source. Two R&D approaches are being explored: magnetic fusion energy (MFE) and inertial fusion energy (IFE). An Assessment of the Prospects for Inertial Fusion Energy describes and assesses the current status of IFE research in the United States; compares the various technical approaches to IFE; and identifies the scientific and engineering challenges associated with developing inertial confinement fusion (ICF) in particular as an energy source. It also provides guidance on an R&D roadmap at the conceptual level for a national program focusing on the design and construction of an inertial fusion energy demonstration plant.

*Centurion: In the Valley of the God-Kings* Steven F Warnock, Joined by his Myrmidon Team, Centurion Ranger prepares to continue his war against the alien Rochack that have invaded Kat Delbath's homeworld. First, though, he needs to gather new allies and new resources and prepare them for a battle unlike any the world has seen before. Alongside old friends and new, Ranger will destroy this threat to Humanity's safety. From the book You are Cobbald, yes? Son of the late Minister of War? Zeno asked. He frowned when Edgar nodded confirmation. My condolences, Mister Cobbald. If I understand Ranger's metaphor, you more than most, uh, 'have a dog in the fight'. No, sir, Edgar said. What I have is a duty. A duty to my fellow man to protect them from these alien ass clowns that have dared to land on our world, sir. He pointed a thumb at Ranger. These aliens may be jerks, but they're friendly jerks. They're willing to pay us to work for them. With their tech. Equal shares to governments that sign on, special deals to business partners in the private sector. Imagine, sir, being able to have bases on Huginn and Muninn, to mine asteroids for metals and minerals that are exceedingly rare here. You should see the fusion plants on that little ship. The size of a tractor tire but able to put out more energy than the nuclear plant powering New Inisfrack.
