*Life and death of a rural village in Garamantian Times. Archaeological investigations in the oasis of Fewet (Libyan Sahara)* Lucia Mori, 2013-12-01 This volume presents the results of the archaeological investigations in the oasis of Fewet (SW Libyan Sahara), carried out by the Archaeological Mission in the Sahara of the Sapienza University of Rome. Evidences of an ancient rural village were identified under the houses of the modern town of Tan Afella and a large necropolis, dated to the Garamantian times, spread at the fringes of the modern settlement. Until 1997 very little was known on the Garamantian period in the Wadi Tanezzuft area and on the transition from the pastoral to the early-historical phase. This period witnessed the gradual sedentarisation of human groups in the oases, and the development of caravan routes with the flourishing of an intra- and trans-Saharan trade. These processes, also influenced by significant alterations in climate, which led to the agricultural exploitation of the limited areas where water resources were available – the oases – were archaeologically unknown as far as settlements were concerned. The archaeological surveys and excavations carried out in the area of Fewet were particularly promising and are here analysed in a multidisciplinary perspective, which takes into consideration environmental and anthropological studies in the attempt to reconstruct the culture and the life of people inhabiting the Southern Fezzan region in early-historical times. «The historical archaeology of the Sahara remains an underdeveloped field of research, especially for the pre-Islamic period. The most significant exception to this rule has for long concerned the people known as the Garamantes, who inhabited the central Saharan region coincident with Libya's south-west

province, Fezzan. (...) This volume is a marvelous addition to the small corpus of published research on the Pre-Islamic oasis societies of the Sahara and provides a complementary perspective on the world of the Garamantes to the Anglo-Libyan work I have directed from their heartlands in the Wadi el-Ajal, c. 400 km to north-east of Ghat». Prof. David J. Mattingly, University of Leicester, UK.

FST TCS 2002: Foundations of Software Technology and Theoretical Computer Science Manindra Agrawal, Anil Seth, 2003-07-01 This volume consists of the proceedings of the 22nd International Conference on the Foundations of Software Technology and Theoretical Computer Science (FSTTCS 2002), organized under the auspices of the Indian Association for Research in Computing Science (IARCS). The conference was held at the Indian Institute of Technology, Kanpur during December 12-14, 2002. The conference attracted 108 submissions (of which two were withdrawn). Of these, a total of 26 papers were selected for presentation in the conference. As in the last year, the PC meeting was held electronically (stretching over nearly three weeks in August 2002) and was a great success. In addition to the contributed papers, we had 7 invited speakers this year: Hendrik Lenstra, Jr., Harry Mairson, Dale Miller, Chih-Hao Luke Ong, and Margus Veanes. We thank them for accepting our invitation and for providing abstracts (or even full papers) for the proceedings. Two workshops were organized in conjunction with the conference - both in Kanpur. A workshop on Parameterized Complexity was held during December 10-11, organized by Mike Fellows and Venkatesh Raman. The second workshop actually consisted of three miniworkshops: on Coding Theory by Madhu Sudan; on Finite Field Algorithms by Hendrik Lenstra, Jr.; and on Sieve Theory by R. Balasubramanian. We wish to thank all the reviewers and PC members who contributed greatly to making the conference a success. We also wish to thank the team at Springer-Verlag for their help in preparing the proceedings.

### **Safety and Risk Modeling and Its Applications**

Hoang Pham, 2011-09-08 Safety and Risk Modeling presents the latest theories and methods of safety and risk

with an emphasis on safety and risk in modeling. It covers applications in several areas including transportations and security risk assessments, as well as applications related to current topics in safety and risk. Safety and Risk Modeling is a valuable resource for understanding the latest developments in both qualitative and quantitative methods of safety and risk analysis and their applications in operating environments. Each chapter has been written by active researchers or experienced practitioners to bridge the gap between theory and practice and to trigger new research challenges in safety and risk. Topics include: safety engineering, system maintenance, safety in design, failure analysis, and risk concept and modelling. Postgraduate students, researchers, and practitioners in many fields of engineering, operations research, management, and statistics will find Safety and Risk Modeling a state-of-the-art survey of reliability and quality in design and practice.

Transportation Management with SAP TM 9 Jayant Daithankar, Tejkumar Pandit, 2014-08-07 The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/CXOs

evaluating options for various transportation management solutions available in the market and helps inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM.

Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients who are on TM 8.

Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage-transformation. The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes. Our book covers end-to-end air freight configuration scenarios for logistic companies.

*GRIHA Version 2019: The Sustainable Habitat Handbook (6 Volume Set)* A GRIHA Council

Publication, 2022-01-14 GRIHA V 2019 is the 5th updated version of the GRIHA Rating system which addresses relevant, present-day concerns of the green building fraternity by encapsulating concepts such as water

performance index, life cycle cost analysis, life cycle analysis, liveability index, etc. It captures social aspects of sustainability and aids the design of healthy and comfortable habitats. This set of GRIHA manuals provides a detailed understanding of the GRIHA Rating system, its underlying criteria, rating process, strategies for compliance, and the documentation and evaluation procedure. It serves as a handbook for multiple stakeholders like (architects, service engineers, landscape designers, project managers, and contractors) involved in the design and construction of sustainable buildings.

**Salient features** The following are the salient features of the new version of GRIHA rating:

- Indigenous rating system
- Adoption of holistic approach towards sustainability
- Process driven and performance oriented
- Integrated team approach

Process Automation Handbook Jonathan

Love,2007-12-22 This book distils into a single coherent handbook all the essentials of process automation at a depth sufficient for most practical purposes. The handbook focuses on the knowledge needed to cope with the vast majority of process control and automation situations. In doing so, a number of sensible balances have been carefully struck between breadth and depth, theory and practice, classical and modern, technology and technique, information and understanding. A thorough grounding is provided for every topic. No other book covers the gap between the theory and practice of control systems so comprehensively and at a level suitable for practicing

engineers.
