Life and death of a rural village in Garamantian Times. Archaeological investigations in the oasis of Fewet (Libyan Sahara) Lucia Mori, 2013-12-01 This volume presents the results of the archaeological investigations in the oasis of Fewet (SW Libyan Sahara), carried out by the Archaeological Mission in the Sahara of the Sapienza University of Rome. Evidences of an

ancient rural village were identified under the houses of the modern town of Tan Afella and a large necropolis, dated to the Garamantian times, spread at the fringes of the modern settlement. Until 1997 very little was known on the Garamantian period in the Wadi Tanezzuft area and on the transition from the pastoral to the early-historical phase. This period witnessed the gradual sedentarisation of human groups in the oases, and the development of caravan routes with the flourishing of an intra- and trans-Saharan trade. These processes, also influenced by significant alterations in climate, which led to the agricultural exploitation of the limited areas where water resources were available – the oases – were archaeologically unknown as far as settlements were concerned. The archaeological surveys and excavations carried out in the area of Fewet were particularly promising and are here analysed in a multidisciplinary perspective, which takes into consideration environmental and anthropological studies in the attempt to reconstruct the culture and the life of people inhabiting the Southern Fezzan region in early-historical times. «The historical archaeology of the Sahara remains an underdeveloped field of research, especially for the pre-Islamic period. The most significant exception to this rule has for long concerned the people known as the Garamantes, who inhabited the central Saharan region coincident with Libya's south-west province, Fezzan. (...) This volume is a marvelous addition to the small corpus of published research on the Pre-Islamic oasis societies of the Sahara

and provides a complementary perspective on the world of the Garamantes to the Anglo-Libyan work I have directed from their heartlands in the Wadi el-Ajal, c. 400 km to north-east of Ghat». Prof. David J. Mattingly, University of Leicester, UK.

Measuring the Benefits of Energy Access Douglas F. Barnes, Hussain Samad, 2018-12-10 Impact

evaluation has gained recognition over the last decade as an essential component of project development. Impact evaluation details how and to what extent policies and project interventions contribute to socioeconomic welfare gains or losses for society. Such evaluations are also important for identifying key lessons for future policies and investments. In the case of modern energy access, the measurement of costs is fairly straightforward. However, measuring the benefits to society is more difficult and might involve implementing national or regional surveys. Past efforts have often underestimated the complex linkages of benefits produced by programs involved in providing electricity and clean cooking energy to rural and other populations without access to modern energy services. Thus, it has often been difficult to balance the costs of program investments in energy access vis-à-vis their benefits. This study's main objective is to develop a practical method by which to measure the benefits of rural energy, including both electricity and clean cooking. The methods reviewed in this report involve both formal and informal techniques of data collection, including quantitative and qualitative methods of analysis. The research pays attention to such concepts as quality of life, effects on education, and other key components of social development; that is, it tackles those benefits of modern energy access that traditionally have been difficult to measure, as well as the easier-to-measure benefits.

Freaks, Geeks, and Cool Kids Murray Milner Jr.,2013-04-15 In this timely and insightful book, award-winning sociologist Murray Milner tries to understand why teenagers behave the way they do. Drawing upon two years of intensive fieldwork in one high school and 300 written interviews about high schools across the country, he argues that consumer culture has greatly impacted the way our youth relate to one another and understand themselves and society. He also suggests that the status systems in high schools are in and of themselves an important contributing factor to the creation and maintenance of consumer capitalism explaining the importance of designer jeans and designer drugs in an effort to be the coolest kid

in the class.

Freaks, Geeks, and Cool Kids Murray

Milner, 2015-08-20 In *Freaks, Geeks, and Cool Kids*, Second Edition, award-winning sociologist Murray Milner tries to understand why teenagers behave the way they do. The first edition drew upon two years of intensive fieldwork in one high school and 300 written interviews about high schools across the country, where he argued that consumer culture greatly impacts the way our youth relate to one another and understand themselves and society. Milner now expands on that concept with a new year of fieldwork fifteen years after he began. He has uncovered in teens a move away from consumerism and towards the cultural capital of information in a time of social media and standardized tests.

Aghram Nadharif. The Barkat Oasis (Sha'abiya of

Ghat, Libyan Sahara) in Garamantian Times. The Archaeology of Libyan Sahara Volume II Mario Liverani, 2006-11-01 Il volume, secondo della serie dedicata alle ricerche ambientali, archeologiche e storiche nel Wadi Tanezzuft, l'imponente valle fluviale a occidente delle montagne del Tadrart Akakus, presenta la pubblicazione finale delle indagini condotte nel villaggio fortificato di Aghram Nadharif nell'oasi di Barkat.

L'insediamento ebbe vita fiorente dal 50 ca. a.C. al 250 ca. d.C. e offre per la prima volta un quadro completo di un abitato dell'età garamantica nell'età classica. Oltre alla pubblicazione dello scavo e dei reperti archeologici, botanici e faunistici rinvenuti, il volume contiene una serie di interventi sulla storia del sito, l'economia, la demografia e il ruolo svolto dalla cittadella nella vita dell'intera regione.

Political Moments Christopher Dutton, 2014-04-25 Political Moments is a collection of quotes taken from the novel 'A Dangerous God, bastards of angels' and other works. It covers areas such as war, politics, evolution, free will, religion, humanism, tyranny, liberty, economics. 2. Aggression is logic. It is Order, not Chaos. 3. Free Will as Equality enables evolution since it allows the creative to excel or decay by its own failures and successes 9. Equality is not found between power and powerlessness. It is found between suffering and empathy. FW27. Self-will expresses itself in only two ways....as Free Will ...and as Brutality. There is only power over oneself or power against others. The supposed Self Will or Free Will of Power is simply a will re-

entering the herd with a larger stick. It means nothing. R62. Do not curse the Little Devil so much..for it is not the God which creates the best Christian but , rather, the Lion.... R125. The mental diseases of chemical imbalances..thus wanders Evolution. Publisher Info BrokenWallsPublishing christopherduttonwritings The quotes in this book are given largely in their chronological order over the years 2012 to 2014. Some are taken from a novel in progress called A Dangerous God, Bastards of Angels. Many are simply my thoughts and wanderings on political and social events over History. I have included an Index at the back of book to help the reader find topics especially as I decided to not 'lump' the topics too much together for the sake of variety for the reader. There are three main categories however. Politics, which includes economics and social conditions as well as definitions on State and Government. The second is specifically Free Will as it pertains to individuality, collectivism and evolution. The last category is Religious thought. My purpose in this book is to share with the reader my own development of ideas on the duality of Civilization and Individuality..and, as well, the conflicts resulting from those 'experiments' in Man's evolution. The truth is simple but it grows always in complicated soils.
