Distributed Computing in Sensor Systems Phil Gibbons,2006-06-09 The book constitutes the refereed proceedings of the Second International Conference on Distributed Computing in Sensor Systems, DCOSS 2006, held in San Francisco, California, USA in June 2006. The 33 revised full papers presented were carefully reviewed and selected from 87 submissions. The papers focus on distributed computing issues in large-scale networked sensor systems, including systematic design techniques and tools; they cover topics such as distributed algorithms and applications, programming support and middleware, data aggregation and dissemination, security, information fusion, lifetime maximization, and localization.

Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements Xueyan Liu,Kumar Anupam,Sandra Erkens,Lijun Sun,Jianming Ling,2021-11-25 Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport

Engineering (IFRAE 2021, Delft, the Netherlands, 12-14 July 2021). The contributions focus on research in the areas of Circular, Sustainable and Smart Airport and Highway Pavement and collects the state-of-the-art and state-of-practice areas of long-life and circular materials for sustainable, cost-effective smart airport and highway pavement design and construction. The main areas covered by the book include: • Green and sustainable pavement materials • Recycling technology • Warm & cold mix asphalt materials • Functional pavement design • Self-healing pavement materials • Eco-efficiency pavement materials • Pavement preservation, maintenance and rehabilitation • Smart pavement materials and structures • Safety technology for smart roads • Pavement monitoring and big data analysis • Role of transportation engineering in future pavements Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements aims at researchers, practitioners, and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods, and for those involved or working in the broader field of pavement engineering.

The Course of God's Providence Philippa Koch,2021-04-13 Shows that a religious understanding of illness and health persisted well into post-Enlightenment early America The COVID-19 pandemic has demonstrated the power of narrative during times of sickness and disease. As Americans strive to

find meaning amid upheaval and loss, some consider the nature of God's will. Early American Protestants experienced similar struggles as they attempted to interpret the diseases of their time. In this groundbreaking work, Philippa Koch explores the doctrine of providence—a belief in a divine plan for the world—and its manifestations in eighteenth-century America, from its origins as a consoling response to sickness to how it informed the practices of Protestant activity in the Atlantic world. Drawing on pastoral manuals, manuscript memoirs, journals, and letters, as well as medical treatises, epidemic narratives, and midwifery manuals, Koch shows how Protestant teachings around providence shaped the lives of believers even as the Enlightenment seemed to portend a more secular approach to the world and the human body. Their commitment to providence prompted, in fact, early Americans' active engagement with the medical developments of their time, encouraging them to see modern science and medicine as divinely bestowed missionary tools for helping others. Indeed, the book shows that the ways in which the colonial world thought about questions of God's will in sickness and health help to illuminate the continuing power of Protestant ideas and practices in American society today.

Tertiary Basins of Spain Peter F. Friend, 1996-01-26 This is the first book to deal comprehensively with Spain's tectonic and sedimentary history over the past sixty or so million years. During Tertiary times, Spain had suffered compressional collision between France and Africa, and its Atlantic and Mediterranean coasts had been further modified by extensional rifting.

Applied Multivariate Research Lawrence S. Meyers, Glenn Gamst, A.J. Guarino, 2006 Multivariate designs were once the province of the very few exalted researchers who understood the underlying advanced mathematics. Today, through the sophistication of statistical software packages such as SPSS, virtually all graduate students across the social and behavioural

sciences are exposed to the complex multivariate statistical techniques without having to learn the mathematical computations needed to acquire the data output. These students - in psychology, education, political science, etc. - will never be statisticians and appropriately so, their preparation and coursework reflects less of an emphasis on the mathematical complexities of multivariate statistics and more on the analysis and the interpretation of the methods themselves and the actual data output. This book provides full coverage of the wide range of multivariate topics in a conceptual, rather than mathematical, approach. The author gears toward the needs, level of sophistication, and interest in multivariate methodology of students in applied areas that need to focus on design and interpretation rather than the intricacies of specific computations. The book includes: - Coverage of the most widely used multivariate designs: multiple regression, exploratory factor analysis, MANOVA, and structural equation modeling. - Integrated SPSS examples for hands-on learning from one large study (for consistency of application throughout the text). - Examples of written results to enable students to learn how the results of these procedures are communicated. - Practical application of the techniques using contemporary studies that will resonate with students.
