*Reviews of National Policies for Education Education Policy in Japan Building Bridges towards 2030* OECD, 2018-07-27 Japan's education system is one of the top performers compared to other OECD countries. International assessments have not only demonstrated students' and adults' high level of achievement, but also the fact that socio-economic status has little bearing on academic results. In a nutshell, Japan ...

**Corpus-based Approaches to Sentence Structures** Toshihiro

Takagaki, 2005-01-01 This is the second volume of the series Usage-Based Linguistic Informatics, a product of the 21st century COE program held at Tokyo University of Foreign Studies (TUFS). The project has an objective to realize an integration of theoretical and applied linguistics on the basis of computer sciences. With a view to practically applying the results of linguistic analysis to language education, the promotion of individual language research has become a high-priority issue. A new field of linguistic research is intended to be developed by elucidating the state of linguistic usage based on the analysis of large amounts of linguistic data. The volume, thus, consists mainly of language-specific corpus-based analyses on sentence structures in ten different languages such as Nuuchahnulth, Korean, Chinese, Malay, Turkish, Arabic, Russian, French, English and Spanish. It also includes papers that deal with various theoretical issues in contrastive linguistics and typology.

**Japanese Grammar** Kimihiko Nomura, 2010-10-21 Japanese Grammar: The Connecting Point is instrumental for anyone learning Japanese who seeks to gain a firm grasp of the most important aspect of the language: verb usage. Learning Japanese may seem to be a daunting task, but Dr. Nomura's book will help readers conjugate verbs into a variety of formats, construct sentences systematically, and hold intelligible conversations in Japanese. He groups all Japanese verbs into clusters, creating a method of how each of those groups conjugate, and then demonstrates how to combine various verb forms with auxiliary expressions to form complex sentences. Not only is this method excellent for beginners, as it creates a solid foundation for learners to increase their language ability and attain fluency at a rapid rate, but also for intermediate and advanced levels, as it will help them solidify their verb usage and use Japanese with greater confidence. Learners will also benefit from Dr. Nomura's method because they will be able to shift the level of formality in any conversational situation according to what is culturally appropriate. Furthermore, when a new verb is uttered by other people, the learner will be able to immediately apply the agglutinative process described in this grammar book and generate sentences with a variety of suffixes in a culturally appropriate manner.

**East Asia's Haunted Present** Tsuyoshi Hasegawa, Kazuhiko Togo, 2008-06-30 This collection of essays by leading scholars from Japan, China, South Korea, and the United States examines how and why bitter historical memories have resurfaced in recent years as freshly virulent and contentious issues between Japan and its neighbors—especially China and South Korea. Moreover, it seeks to identify what set of conditions and what sequence of measures will enable these modern nations to manage, palliate, and exorcise the wrongs of the past in a spirit of reconciliation, so that the dangerous growth of nationalist resentments and revanchism can be checked. Comfort women ... the Yasukuni Shrine ... the history textbook controversies ... The single sorest issue confronting East Asia today is the growing animosity and conflict between Japan and its neighbors—especially China and South Korea—over their respective and collective memories of Japan's pre-1945 militaristic aggression, oppression, and atrocities. Even as East Asia has established itself as one of the most vibrant economic regions of the world, the strident nationalisms that have emerged here in the post-Cold War period have exacerbated historical grievances and heightened the international tensions that separate Japan from China and South Korea, blocking the development of an international system based on comity and cooperation.

**Manabi and Japanese Schooling** Masamichi Ueno,Yasunori Kashiwagi,Kayo Fujii,Tomoya Saito,Taku Murayama,2020-03-05 **Manabi and Japanese Schooling: Beyond Learning in the Era of Globalisation** considers the theory and practices behind the Japanese concept of Manabi, particularly as the progressive concept of learning in the globalised world. It seeks to provide educational visions of Manabi as an alternative concept of learning in the era of post-globalisation. The authors derive different perspectives in Manabi from Eastern philosophy, clarifying and comparing with learning and Bildung to give alternative educational discourses. It considers the idea of Confucius and Taoism and studies the practice of minna, characterising it as a cooperative and peaceful problem-solving method. Addressing the trend of 'learnification' and its contribution to educational reform, it explores the impacts, conflicts and difficulties of introducing learner-centred education into East Asian educational settings as well as the potential of Manabi as an effective tool for all types of learning. Expertly written and researched, this book includes a foreword by Gert Biesta and is a valuable resource for researchers, academics and postgraduate students in the field of educational philosophy, educational theory and Eastern philosophy.

**The Routledge International Handbook of Religious Education** Derek Davis,Elena Mikhaïlovna Miroshnikova,2013 How and what to teach about religion is controversial in every country. The Routledge International Handbook of Religious Education is the first book to comprehensively address

the range of ways that major countries around the world teach religion in public and private educational institutions. It discusses how three models in particular seem to dominate the landscape. Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model, where instruction is provided only in the tenets of the majority religion, often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a separation model, thus either offering instruction in a wide range of religions, or in some cases teaching very little about religion, intentionally leaving it to religious institutions and the home setting to provide religious instruction. Still other countries attempt managed pluralism, in which neither one, nor many, but rather a limited handful of major religious traditions are taught. Inevitably, there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss: Legal parameters in terms of subjective versus objective instruction in religion Constitutional, statutory, social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning. Regional assessments which provide a welcome overview and

comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians, and others interested in how religion and education interface around the world.

**A Political Sociology of Educational Knowledge** Thomas A. Popkewitz, Jennifer Diaz, Christopher Kirchgasler, 2017-01-20 Bringing together the sociology of knowledge, cultural studies, and post-foundational and historical approaches, this book asks what schooling does, and what are its limits and dangers. The focus is on how the systems of reason that govern schooling embody historically generated rules and standards about what is talked about, thought, and acted on; about the nature of children; about the practices and paradoxes of educational reform. These systems of reason are examined to consider issues of power, the political, and social exclusion. The transnational perspectives interrelate historical and ethnographic studies of the modern school to explore how curriculum is translated through social and cognitive psychologies that make up the subjects of schooling, and how educational sciences act to order and divide what is deemed possible to think and do. The central argument is that taken-for-granted notions of educational change and research paradoxically produce differences that simultaneously include and exclude.

**School Leadership in the Context of Standards-Based Reform** Louis Volante, 2012-05-16 "Although standards-based reform emerged in the United States and the United Kingdom, the idea has spread across the world, as an

approach to systemic reform. It might appear that there is a world-wide “tsunami” of standards-based reform that will standardize and homogenize the educational system across the globe. This volume makes it very clear, however, that there is no one approach to standards-based reform and countries change – there is a danger in paying attention to its evolution and impact in only one context. That’s what makes this volume so valuable. Louis Volante has drawn together descriptions from a wide range of countries, all involved in large-scale reform and using standards and assessments as part of their process. What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals, values, and processes. I’m sure you will find this book as interesting and challenging as I have – a gem that pushes your thinking and does not allow readers to remain neutral.” (Lorna Earl)
