Garuda Indonesia Jozef Mols,2022-06-20 On January 26, 1949, Garuda Indonesia was officially established as Indonesia's government-owned flag carrier. To begin with, the airline focused on domestic and regional travel. However, in 1962, the Dutch-occupied island of Dutch New Guinea was added to the Indonesian territory and Garuda faced the huge challenge of starting up flights to the very remote and isolated settlements of Irian Jaya. Fortunately, the airline had the assistance of another Indonesian government-owned airline, Merpati, which would later become a feeder and subsidiary of Garuda. In the mid-1980s, a massive reorganization led to Garuda offering international flights, which required the modernization of the entire fleet. The late '90s saw a new management having to cope with the disastrous effects of the Asian financial crisis closely followed by the deregulation of the aviation industry in 2000, which greatly increased competition in the domestic market. Over subsequent years, Garuda has faced many more challenges, from the effects of the 9/11 terrorist attacks and the Bali bombings to the 2003 SARS epidemic and the COVID-19 pandemic. However, despite these setbacks, it has successfully transitioned from a small domestic carrier to a player on the international stage. This fully illustrated volume looks at Garuda's turbulent history from its involvement in Indonesia's postwar struggle for independence to operations during the 2020 COVID-19 pandemic.

Management Practices in Asia Christiane Prange,Ralph Kattenbach,2019-08-20 Asia is a continent of contradictions and boundaries; it offers exciting business opportunities, but is also characterized by unpredictability and conflict. While flexibility and creativity are in the DNA of many startups in China, major players like Xiaomi and Alibaba have also emerged as global giants, challenging established global competitors. The authors of this book show that these companies are crossing various boundaries - between cultures, mindsets, and perspectives. At the same time, Western companies entering Asian markets face challenges that are very different from those on their home turf. This book addresses the needs of current and future managers doing business in Asia, who need to understand the individual, social and business challenges that can arise from crossing boundaries. The respective case studies provide essential insights on how several Asian companies have made impressive strides towards becoming established players; how the revival of local brands and growing pride in local products has become a major challenge for global competition; how the need to actively practice corporate social responsibility in Asian markets is currently challenging many companies; and how the need for individual and team coaching among the members of management to support a company's development has grown tremendously, calling for new solutions.

The Report: Indonesia 2017 Oxford Business Group,2016-11-10 Although Chinese and global demand, low commodity prices and rising wages will continue to challenge trade growth in 2016, Indonesia remains on a positive trajectory. Rising domestic demand, increasing liberalization measures, improvements to the investment climate and a shift towards value-added production will bolster both exports and investment. At the same time, new trade agreements with the world's largest economies look set to drive long-term trade expansion. Prudent government policy, an ambitious reform agenda and rising recognition of the role of the private sector should help to keep investment and trade stable in 2016, and despite exports and growth have dipped in recent years, the country is well positioned to make the crucible transformation from a consumption- to investment-based economy.
