The Gatling Gun Joseph Berk,1991 Here is the first complete 130-year history of what is a truly remarkable and timeless weapon. Author Joseph Berk traces the glorious career of this multi-barreled, high-rate-of-fire gun from its inception during the Civil War to its current role as a state-of-the-art modern combat system of the US military.

The Gatling Gun Peter Smithurst,2015-05-20 A unique chapter in the history of firearms, the multibarrel, hand-cranked Gatling gun was one of the first practical rapid-fire weapons ever to be used in battle. It changed warfare by introducing the capability to project deadly, high-intensity fire on the battlefield, and portended the devastation that automatic weapons would wreak in World War I. During its 50-year career, it saw widespread service with US, British, and other forces on a host of battlefields through conflicts in Zululand and the American West, to the Spanish-American War. Although it saw widespread use in the hands of industrialized nations against various groups of indigenous native warriors, it was famously left behind by Custer at the battle of the Little Bighorn, where some argue it could have made all the difference. Featuring full-colour artwork plus contemporary and close-up photographs, this engaging study investigates the origins, development, combat use, and lasting influence of the formidable Gatling gun.

Dr. Richard Jordan Gatling's GATLING GUN PATENT DRAWINGS Ron Ruble,2009-03-15 This book contains copies of all Dr. Gatling's original Gatling Gun patent and patent drawings from the United States Patent Office. Also included are the patent drawings of the Broadwell Drum Feed, Bruce feed and Accles feed that was used on Colt Gatling Guns. Shortly after the outbreak of the American Civil War, Dr. Richard J. Gatling began work on his most famous invention. A prototype gun was made late in 1861 and was demonstrated in Indianapolis early in 1862. On November 4, 1862, Dr. Gatling received the first of his 10 patents for the famous gun that etched his name into history forever. The Gatling Gun was sometimes called by Dr. Gatling, Colt Firearms Company and the United States Patent Office as a battery gun, rotating battery gun, rotating cannon and machine gun. When the modern machine gun was made, it was referred to as an automated machine gun. These patent drawings provide a step back in time to view a technically advanced 19th century weapon that changed history.

Machine Gun Anthony Smith,2004-11-02 The machine gun is a uniquely American invention that revolutionized the way in which war was waged. This first look in more than 30 years at its social and historical impact also profiles the inventors responsible for the creation of the weapon. Martin's Press.

The Gatling Gun Joe Berk,2017-12 The Gatling Gun outlines the development of the Gatling gun from its inception during the Civil War to applications on a variety of modern combat systems. The Gatling gun concept has proven itself to be, in a very real sense, timeless. Future weapons systems will no doubt continue to apply the engineering elegance inherent to Dr. Gatling's design, assuring the survival of this most interesting weapon system.

Custer's Gatling Guns Donald F. Myers,2008-10-20 Never before has a historically accurate novel telling of the day-to-day journey to the Little Big Horn featuring interesting characters been written, including the Gatling Gun Battery commander and his men. Custer takes his three Gatling Guns with him instead of leaving them at the Yellowstone River. The author, a retired Marine, came up with a plausible solution of how the heavy machine guns could have moved with the 7th Cavalry without slowing it down through rough terrain. The book has a what if flavor from beginning to the dramatic ending that any history buff will enjoy. A rip-roaring tale of the 1870's. About the Author: Donald F. Myers was born and raised in Indianapolis, Indiana. In 1952 at age seventeen he enlisted in the U. S. Marine Corps. He retired from the Corps on 30 April 1973. Myers is Indiana's most decorated living Marine veteran. A recipient of two Silver Star medals for conspicuous gallantry, two Bronze Star medals for heroic achievement, five Purple Heart medals for combat wounds, Navy/Marine Corps

Commendation medal for heroic achievement, Vietnam Cross of Gallantry with palm, and Vietnam Medal of Military Merit are among his 32 awards. The U. S. Department of Veterans Affairs (VA) employed Myers after he was medically retired from the Corps. In 1990, he retired from the VA as a senior counselor. Myers also spent over 20 years with the Indiana Guard Reserve retiring from that military organization as a full colonel. He has authored six books. A father of two sons and three daughters Myers resides with his wife Dorothy in Franklin Township, a suburb on the southeast side of Indianapolis.

History of the Gatling Gun Detachment John Parker,Senior Lecturer in African History John Parker, VI,2015-02-25 This is a history that looks at the innovating gatling gun, which was a predecessor of modern machine guns. Gatling guns had a huge effect on warfare at the turn of the 20th century. From the preface: On the morning of July 1st, the dismounted cavalry, including my regiment, stormed Kettle Hill, driving the Spaniards from their trenches. After taking the crest, I made the men under me turn and begin volley-firing at the San Juan Blockhouse and intrenchments against which Hawkins' and Kent's Infantry were advancing. While thus firing, there suddenly smote on our ears a peculiar drumming sound. One or two of the men cried out, The Spanish machine guns! but, after listening a moment, I leaped to my feet and called, It's the Gatlings, men! It's our Gatlings! Immediately the troopers began to cheer lustily, for the sound was most inspiring. Whenever the drumming stopped, it was only to open again a little nearer the front. Our artillery, using black powder, had not been able to stand within range of the Spanish rifles, but it was perfectly evident that the Gatlings were troubled by no such consideration, for they were advancing all the while. Soon the infantry took San Juan Hill, and, after one false start, we in turn rushed the next line of block-houses and intrenchments, and then swung to the left and took the chain of hills immediately fronting Santiago. Here I found myself on the extreme front, in command of the fragments of all six regiments of the cavalry division. I received orders to halt where I was, but to hold the hill at all hazards. The Spaniards were heavily reinforced and they opened a tremendous fire upon us from their batteries and trenches. We laid down just behind the gentle crest of the hill, firing as we got the chance, but, for the most part, taking the fire without responding. As the afternoon wore on, however, the Spaniards became bolder, and made an attack upon the position. They did not push it home, but they did advance, their firing being redoubled. We at once ran forward to the crest and opened on them, and, as we did so, the unmistakable drumming of the Gatlings opened abreast of us, to our right, and the men cheered again. As soon as the attack was definitely repulsed, I strolled over to find out about the Gatlings, and there I found Lieut. Parker with two of his guns right on our left, abreast of our men, who at that time were closer to the Spaniards than any others.

The Book of the Machine Gun Frederick Victor Longstaff,Andrew Hilliard Atteridge,1917

Machine Gun Anthony Smith, Richard Gatling, the one-time philanthropist, had been stung by growing competition. In 1881 he published a forthright challenge in the Army & Navy Journal. The Gatling Gun Many articles have recently appeared in the press, claiming the superior advantages of the Gardner and other machine guns over the Gatling gun. In order to decide which is the best gun, the undersigned offers to fire his gun against any other gun, on the following wagers, viz.: First, \$500 that the Gatling can fire more shots in a given time, say one minute. Second, \$500 that the Gatling can give more hits on a target, firing, say one minute-at a range of 800 or 1,000 yards. The winner to contribute the money won to some charitable object. The time and place for the trials to be mutually agreed upon. R.J. Gatling of Hartford, Conn. No one took up the challenge, possibly because the various purchasers of these guns had made up their own minds about the merits of the rival weapons. Nevertheless, of all the rapid-firing guns in business at the time, the Gatling had pride of place. It was seeing service all over the world, and perhaps Gatling should not have bothered to express such apparent nervousness. What he did not know, and could not then know, was that an electrician working out of New York City would soon serve as the greatest rival of them all. Three years after that gamble had been published in the Journal, Hiram Stevens Maxim would be travelling to Europe. There he would appreciate quite how many nations were rattling sabres at each other, and hear his friend's advice that, if he wished to make money, he should help their citizens kill each other. And that is what he did. The 'greatest mechanician of all' would change warfare dramatically, and the first fully automatic machine gun would eclipse all others.
