Energy Production and Management in the 21st Century C. A. Brebbia, E. R. Magaril, M. Y. Khodorovsky, 2014 Discussing the future of energy production and management in a changing world, this book contains the proceedings of the first international conference on Energy Production and Management in the 21st Century - The Quest for Sustainable Energy. Topics covered include: Energy policies; Energy and economic growth; Energy efficiency; Energy storage.

Cars for Comrades Lewis H. Siegelbaum, 2011-08-15 The automobile and Soviet communism made an odd couple. The quintessential symbol of American economic might and consumerism never achieved iconic status as an engine of Communist progress, in part because it posed an awkward challenge to some basic assumptions of Soviet ideology and practice. In this rich and often witty book, Lewis H. Siegelbaum recounts the life of the Soviet automobile and in the process gives us a fresh perspective on the history and fate of the USSR itself. Based on sources ranging from official state archives to cartoons, car-enthusiast magazines, and popular films, *Cars for Comrades* takes us from the construction of the huge Soviet Detroit, emblems of the utopian phase of Soviet planning, to present-day Togliatti, where the fate of Russia's last auto plant hangs in the balance. The large role played by American businessmen and engineers in the checkered history of Soviet automobile manufacture is one of the book's surprises, and the author points up the ironic parallels between the Soviet story and the decline of the American Detroit. In the interwar years, automobile clubs, car magazines, and the popularity of rally races were signs of a nascent Soviet car culture, its growth slowed by the policies of the Stalinist state and by Russia's intractable roadlessness. In the postwar years cars appeared with greater frequency in songs, movies, novels, and in propaganda that promised to do better than car-crazy America. Ultimately, Siegelbaum shows, the automobile epitomized and exacerbated the contradictions between what Soviet communism encouraged and what it provided. To need a car was a mark of support for industrial goals; to want a car for its own sake was something else entirely. Because Soviet cars were both hard to get and chronically unreliable, and such items as gasoline and spare parts so scarce, owning and maintaining them enmeshed citizens in networks of private, semi-illegal, and ideologically heterodox practices that the state was helpless to combat. Deeply researched and engagingly told, this masterful and entertaining biography of the Soviet automobile provides a new perspective on one of the twentieth century's most iconic—and important—technologies and a novel approach to understanding the history of the Soviet Union itself.

Cars of the Soviet Union Andy Thompson, 2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

Challenges and Solutions in the Russian Energy Sector Stavros Syngellakis, Carlos Brebbia, 2018-05-21 The book provides a comprehensive overview of the most recent and advanced research findings on energy production and management in the important Ural industrial region of Russia. The authors consider economic problems of energy development, management systems for sustainable energy, and investment mechanisms for energy. Comprised of chapters on energy efficient technologies, environmental aspects of using energy, and personnel for the power industry, the volume is ideal for a range of scientists and engineers interested in innovative approaches to generation and distribution of energy.

Growth And Inflation In The Soviet Economy Fyodor I Kushnirsky, 2019-09-10 While growth figures are high for Soviet industry in general, they are especially impressive for the MBMW sector which has far outperformed other sectors of the economy. The question widely debated in the U.S.S.R. now is whether these impressive figures actually reflect the growth of physical output. To put it differently, did the Soviet economy receive more machines and equipment as a result of this growth, and, if so, was the rate of real growth the same as the growth in value terms? But why would one raise such a question in the first place? To answer this and similar questions, the procedures of Soviet measurement of output, productivity, costs and prices have been analyzed in this study. Special attention is given to the processes of planning quality improvements and pricing new technological items. An analysis of procedures and methodological instructions used in planning and pricing MBMW products may be helpful in revealing possible discrepancies between prices of new goods and their quality characteristics.

Air Pollution Nineteen C. A. Brebbia, 2011 Air Pollution is widespread and a growing challenge to the international community, with clear known impacts on local and global health and the environment. Governments face a need to balance concern over these impacts with maintaining or improving economic development. Science is the key to identifying the nature and scale of air pollution impacts and is essential in the formulation of

effective policies and regulations. Our knowledge of the fundamental science of air pollution and its application continued to improve, enabling us to better predict, assess and mitigate the air pollution implications to local, regional, national and international economic systems. This book contains papers presented at the nineteenth in the successful series of annual International Conferences dealing with Modelling, Monitoring and Management of Air Pollution. The papers deal with advances in a wide variety of topics, including: Air Pollution Modelling; Air Quality Management; Emission Studies; Monitoring and Measuring; Aerosols and Particles; Atmospheric Chemistry; Indoor Air Pollution; Policy Studies; Climate Change and Air Pollution; Regional and Global Studies; Exposure and Health Effects; Rural Pollution Studies; Air Pollution Effects on Ecosystems; Air Pollution Mitigation; Case Studies.

Autopia Peter Wollen, Joe Kerr, 2002 The reach of the car today is almost universal, and its effect on landscapes, cityscapes, cultures indeed, on the very fabric of the modern world is profound. Cars have brought benefits to individuals in terms of mobility and expanded horizons, but the cost has been very high in terms of damage to the environment and the consumption of precious resources. Despite the growing belief that a Faustian price is now being paid for the freedom cars have bestowed on us, we are none the less manufacturing them in ever greater numbers. Autopia is the first book to explore the culture of the motor car in the widest possible sense. Featuring newly commissioned essays by writers, critics, historians, artists and film-makers, as well as reprinting key texts, it examines the effect of the car throughout the world, including the USA, Western and Eastern Europe, Japan, China, Cuba, India and South Africa. In this book the car is treated neither as a technological fetish object nor as an instrument of danger. Instead, it is examined as a hugely important determinant of 20th-century culture, neither wholly good nor an unmitigated disaster, and certainly endlessly fascinating. Contributors include Michael Bracewell, Ziauddin Sardar, Al Rees, Martin Pawley, Donald Richie and Peter Hamilton. Key texts by Marshall Berman, Jane Jacobs, Roland Barthes, Marc Auge and others.

Každé časové pásmo je dále členěno podle původu automobilů: auta tuzemské výroby, auta z Východu a auta ze Západu. U všech vozů jsou uvedeny základní technické údaje a počty prodaných, resp. dovezených kusů, dále pak dobové prodejní ceny v korunách (Kčs) resp. v tuzexových bonech (TK). Jsou to automobily, které prodávala Mototechna, Tuzex a značkové prodejny Škoda. Popisy automobilů ilustruje 450 převážně barevných fotografií a kreseb.

Nejen na dobu, ale ani na automobily, v nichž jsme tehdy jezdili. Najdete zde množství dosud nikde nepublikovaných údajů.
