**Military Trains and Railways** Jean-Denis G.G. Lepage,2017-08-23 Featuring 256 drawings, this history of military trains and railways from 1853 through 1953 describes how the railroad transformed the nature of warfare. Transport and logistics are discussed for armored trains, rail-borne artillery and armored combat vehicles, medical evacuation trains and draisines (light auxiliary vehicles such as handcars). The railroad's role in establishing European colonial empires in Asia and Africa is examined. Conflicts covered include the Boer Wars, the American Civil War, the Austro-Prussian War, the Franco-Prussian War, the Russo-Turkish War, World War I, the Finnish Civil War, the Spanish Civil War, World War II and the French Indochina War.

SU-76 Assault Gun Steven J. Zaloga,2019-05-30 The SU-76 assault gun was the second most widely manufactured Soviet armoured fighting vehicle of World War II, out-numbered only by the legendary T-34. Inspired in part by the German Marder series of tank destroyers, Soviet designers realized that the chassis of the obsolete T-70 light tank could be adapted to a much more substantial gun if it was placed in a fixed casemate rather than in a turret. This led to the design of the SU-76, which saw its combat debut at Kursk in the summer of 1943. The SU-76 was deployed primarily as an infantry direct support weapon, becoming the infantry tank of the Red Infantry, much as the StuG III became the infantry tank of the German infantry. Featuring full colour artwork and written by an expert on tank warfare during World War II, this fascinating study describes one of the Soviet Union's most important armoured vehicles during its struggle with Nazi Germany.

*American Firms in Europe* Hubert Bonin,Ferry de Goey,2009 The processes of the Americanisation of Europe and the moves of American firms abroad have been already well studied. But the very expansion of American firms in Europe still lacked a comprehensive survey. This book gathered two dozens of academics on an actual European level, which paves the way to comparisons, synthetised by leading business historian M. Wilkins. The breakthroughs achieved here concern the topics of timetable and rhythms of American FDIs in Europe, the patterns followed in each country, along with the specificities of each industry or service sector, and the strategy adopted by big firms. Beyond the facts, the immaterial aspects of this business history are scrutinised, especially about the perception of American firms by Europeans: firms' corporate image and identity were at stake. The Europeanisation of American firms is a key issue, about industrial relations, management. commercial policies. brand image, connections and embeddedness. The positions of public authorities and of (industrialists and trade unions') lobbies in front of such an American offensive are also gauged. Graphs and tables of figures provide numerous data. And a few chapters are accompanied by an overview of ads published by American affiliates in newsmagazines. to fuel analysis of their perception by consumers.

Tank DK,2017-04-04 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armored vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or Mother as it was known, had arrived. In Tank you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat – the fastest armored fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men – such as Mikail Koshkin and Sir William Tritton – who designed these awe-inspiring beasts. Produced with The Tank Museum, Tank traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armor, weaponry, and much more. If you are interested in modern warfare, Tank is truly unmissable reading.

Red Assault Vladimir Kotelnikov,2019-09-09 An aviation historian explores Russian airborne assault innovations in the decade before WWII using paratrooper memoirs and archival research. Through the 1930s, the USSR was pioneering new developments and technologies in airborne assault. The Red Army was conducting mass airborne assault exercises—dropping paratroopers, tanks, and guns from the skies—when no other nation on Earth even had airborne assault troops. In Red Assault, the Russian aviation historian Vladimir Kotelnikov explores these pioneering achievements. He describes the armament, equipment, and military hardware developed for airborne troops, as well as fantastical projects that reflect the unrestrained imagination of the Soviet military's aviation designers. Kotelnikov offers a detailed account of the aircraft designed for airborne troops, while also describing troop drop exercises and real operations leading up to 1941. Kotelnikov's research is drawn from government archives and museum collections, as well as the memoirs of pioneer military paratroopers in the USSR, some of which have never been published before.

The Red Army at War Artem Drabkin,2010-04-19 What was life in the Red Army like for the ordinary soldier during the Great Patriotic War, the fight between the Soviet Union and Germany on the Eastern Front? How far is the common perception of Red Army heroism and sacrifice borne out by historical reality? And what was the daily experience of the individual soldier caught up in this immense and ruthless conflict? The 160 contemporary photographs from the Russian archives that have been selected for this book give a striking insight into all sides of wartime service for the Soviet soldier. The whole range of military experience is portrayed here, from recruitment and the rigors of training to transport, marching and the ordeal of combat.

**Warships of the Soviet Fleets 1939-1945** Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-12-12 Seventy-five years after the end of the Second World War the details of Soviet ships, their activities and fates remain an enigma to the West. In wartime such information was classified and after a brief period of glasnost ('openness') the Russian state has again restricted access to historical archives. Therefore, the value – and originality – of this work is difficult to exaggerate. It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy, listing over 6200 vessels from battleships to river gunboats, and mercantile conversions as well as purpose-built warships. This second part of the three-volume series includes all the remaining fighting vessels not already covered in Volume I. Beginning with the Uragan class – rated as Escort Ships and the first seagoing warships designed by the Soviet Union –

the book then moves on to Submarine Hunters, both large and small, Patrol craft, Minelayers and Minesweepers, and unusual types like Floating Artillery Batteries and Anti-Aircraft Defense Ships, concluding with Landing Ships and Craft. Many of these vessels have hitherto been poorly documented but given the nature of the land-centered Soviet war against Germany their contribution should not be underestimated. The details of their service and, not least, the circumstances of their loss, constitute a major addition to Western understanding of the Soviet Navy’s war effort. This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships, the Soviet Navy or wider maritime aspects of the Second World War. Furthermore, as recent Russian actions appear to revive Soviet-era aspirations, this book offers both new insights and valuable background of contemporary relevance.
