The Gemini Syndrome Roger B. Culver, Philip A. Ianna, 1984 In recent years, our society has witnessed a resurgence in astrology that has elevated that durable art form to a level of popularity it hasn't enjoyed since the eve of western European Renaissance. In what has thus far been a relatively successful attempt to cash in on the triumphs of twentieth-century science and technology, contemporary astrologers unashamedly claim far and wide that their craft is rationally consistent, that it is scientifically based, and, above all, that it works. In *The Gemini Syndrome*, two professional astronomers have produced a highly readable and well-referenced response to claims by astrologers that their theories are scientifically based. The authors elucidate the glaring internal inconsistencies associated with many of the basic concepts of modern astrology. They trace the historical development of the celestial twins of astronomy and astrology and leave little doubt concerning the differences, both historical and modern, between astronomical science and astrological art-form. The book's most telling chapters are those dealing with the empirical evidence concerning the supposed astrological influences. Culver and Ianna offer the reader what is the most complete summary of the available data about sun-signs, houses, and aspects. In every instance the empirical astrologer is found to have no clothes on! Finally, the oft-stated claim that astrology works is investigated and laid to rest under the debris of more than three thousand busted predictions made by the astrologers themselves, ranging from the start of World War III to the existence of an anti-earth orbiting on the other side of the sun.

The Quintessential Gemini Linn B. Halton, 2012-05 For twenty-one years, the focus of

Katherine Dale's life has been her work. Love interests and hobbies came and went, but what has always been there for her was her nine to five habit. Until she's replaced. With her confidence dented, Katherine is angry at life and at herself. She's ignored hints of changes to come in her horoscope forecasts, written by the wonderful and renowned astrologer, Mark Ainsley-Thomas. Mark is now an A list celebrity in the UK and his new Agent is determined to raise his profile in America, so he has to take on the new, but talented, astrologer James Kingman to help him run his web-site. Katherine lives her life according to her daily horoscope. When Katherine finds James has been writing her daily horoscopes rather than Mark, Katherine's life explodes in confusion and, unexpectedly, love as the three lives become inextricably tangled. Now Katherine has to learn that the stars might be telling her that love is going to feature in her life, but when Katherine finds herself implicated in the headlines 'Mystic Love Triangle Surprise' she's just as surprised as everyone else! None of the men in her life are love interests - so what exactly does fate have in store?

The Gemini Masters Vol. II John Macurdy, Cameron St. James is an American high-altitude reconnaissance pilot who was shot down over North Korea in 1972. Running for his life, he meets another American, a man who discovered an ancient book that shows the path to become the ultimate human. He returns to the U.S. in 1988, embarking on a mission to eradicate pedophiles, serial killers, and drug lords. This second installment of the Gemini Masters series takes place in 2016. After completing a mission on the outskirts of Albuquerque, St. James fortuitously meets Monica Ridge, the FBI special agent in charge of the Albuquerque FBI office. Their meeting unexpectedly turns into a romance that surprises them both. Unknown to them, Monica's ex-husband is stalking her, intent on killing her. Seeing St. James in the picture only adds fuel to his

plans. Meanwhile, Master Gin and Boswell, who work for Dr. Morris Thorpe at the HOPE SECT, learn that a computer genius from the 1960s, a man who designed the software that changes the nuclear codes, may have created a back door into the nuclear arsenal, deciding that civilization cannot be saved. Sooner or later, she was going to have to tell him that she had been chasing him for years, even though until yesterday she had no idea who he was. Over the years, her FBI crime statistics had shown an irregular spike in the violent deaths of drug lords, pedophiles and serial killers ...

The Gemini Masters: Vol. I: Paths Cross John B. Macurdy, 2017-07-07 11 Book Synopsis An American pilot shot down over North Korea in 1972 learns “the art of the ultimate Human.” When he returns to the States sixteen years later, he hunts criminals as the ultimate martial artist. Cameron St. James is a talented high-altitude recon pilot. When one of his missions takes him over North Korea, his plane goes down. Atop a mountain peak he meets another American, Bull Beauchamp, who has learned to be the ultimate human from an ancient book written by a Korean mystic. Bull tutors St. James for sixteen years until he too is a Master. In 1988, North Korean troops seek out the two Americans. St. James escapes and travels to Seoul during the Olympic Games. Through a case of mistaken identity, he is able to return to the States and discovers his life’s mission is to eradicate true evil. St. James’ missions bring him to the attention of two deadly government agents from the H.O.P.E. division of S.E.C.T., who are every bit as ultimate as he is, as well as a lone FBI agent who doesn’t know exactly what she’s tracking. Their destinies become intertwined as their Paths Cross.
