*Geoparks and Geotourism Neda Torabi Farsani,Celeste Coelho,Carlos Costa,2012* This book aims to identify geotourism and geoparks as gateways to socio-cultural, socio-environmental, and socio-economic sustainability in rural areas. At present, geotourism is a new movement helping travelers to increase their knowledge about natural resources, the cultural identities of host communities, and ways of preserving them. The 'emerging tourism' niche of geotourism is still at an early stage of commercial development in most countries, and geoparks as a sustainable development model for protected areas are pioneers in the development of geotourism marketing. The establishment of the European Geoparks Network and the Global Geoparks Network are positive steps toward the preservation and presentation of geo-heritage as a new tourist attraction. Geoparks and Geotourism provides an opportunity for students, professionals, and authorities of geoparks to take advantage of emerging techniques to create new products, facilities, services, technologies, and management practices for geoparks in the future. Consequently, the book is a paradigm for geoparks who want to come under the umbrella of the Global Geoparks Network. The numerous examples provided of geoparks currently attracting travelers may contribute to the creation of innovative strategies for sustainability and geoconservation in rural areas around the world.

Volcano and Geothermal Tourism Patricia Erfurt-Cooper,Malcolm Cooper,2010 There are over 1300 active volcanoes worldwide and many more dormant or extinct. Some are developed as tourist destinations; others are not, but have great potential. Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance, while a number of volcanic areas in national parks, for example Teide in Spain,

Yellowstone in the US, Vesuvius in Italy and Tongariro in New Zealand, attract between one to four million tourists each year. In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development. This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism. The volcano-based tourism sector is further augmented through a closely linked range of geothermal resources and attractions, such as geysers and hot springs, which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world. It is shown that volcano and geothermal tourism is a subsection of nature-based geotourism and incorporates a variety of other tourism categories such as adventure tourism, extreme tourism, ecotourism, green tourism, educational tourism, and hot spring tourism. This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research, making it an essential resource for all in the field. Includes colour plates.
