*International Freight Transport* Anthony Beresford,Stephen Pettit,2017-03-03 International Freight Transport presents the key changes and issues in the fast-moving industries of trade and transport. It includes coverage of regional trade groupings, the emergence of new large economies (i.e. BRIC countries), and pivotal regions such as the Middle East and Central America where major projects, such as new and widened canals, are underway or planned. These changes could redraw the trade map with major implications for transport patterns and solutions. Blending geography, economics, politics and trade, International Freight Transport provides insight into a wide range of topics, including: globalisation; demand versus supply; buyers and sellers; transport regulation, geography, modes and methods; transport ownership; alliances; and safety and security.
