But when Will learns that the mirror may help him solve the mystery that has haunted him for years, the stakes become acutely personal. Will is left with no alternative but to pursue the alchemist to the devil-haunted lands of the New World and the terrifying fortress home of mankind's ancient enemy, the Unseelie Court. Development History Of Ancient Chinese Glass Technology, 2021-02-04 Worldwide research on ancient glass began in the early 20th century. A consensus has been reached in the community of Archaeology that the first manmade or synthetic glasses, based on archaeological findings, originated in the Middle East during the 5000-3000's BC. By contrast, the manufacturing technology of pottery and ceramics were well developed in ancient China. The earliest pottery and ceramics dates back to the Shang Dynasty - the Zhou Dynasty (1700 BC-770 BC), while the earliest ancient glass artifacts unearthed in China dates back to the Western Han Dynasty. Utilizing the state-of-the art analytical and spectroscopic methods, the recent findings demonstrate that China had already developed its own glassmaking technology at latest since 200 BC. There are two schools of viewpoint on the origin of ancient Chinese glass. The more common one believes that ancient Chinese glass

originated from the import of glassmaking technology from the West as a result of Sino-West trade exchanges in the Western Han Dynasty (206 BC-25 AD). The other scientifically demonstrates that homemade ancient Chinese glass with unique domestic formula containing both PbO and BaO were made as early as in the Pre-Qin Period or even the Warring States Period (770 BC-221 BC), known as Yousha or Faience. This English version of the previously published Chinese book entitled Development History of Ancient Chinese Glass Technology is for universities and research institutes where various research and educational activities of ancient glass and history are conducted. With 18 chapters, the scope of this book covers very detailed information on scientifically based findings of ancient Chinese glass development and imports and influence of foreign glass products as well as influence of the foreign glass manufacturing processes through the trade exchanges along the Silk Road(s).

Swords and Swordsmen Mike Loades, 2011-03-04 "A 'must have' book for anyone who has an interest in edged weapons . . . Loades holds the reader's full attention with each sword's story that he tells." —The Lone Star Book Review This magnificent book tells the story of the evolution of

swords, how they were made, how they were used, and the people that used them. It doesn't claim to give comprehensive coverage but instead takes certain surviving examples as landmarks on a fascinating journey through the history of swords. Each is selected because it can be linked to a specific individual, thus telling their story too and giving a human interest. So the journey starts with the sword of Tutankhamun and ends with the swords of J. E. B. Stuart and George Custer. Along the way we take in Henry V, Cromwell and Uesugi Kenshin, and there is the most detailed discussion you'll find anywhere of all of George Washington's swords. The chapters on these specific swords and swordsmen are alternated with more general chapters on the changing technical developments and fashions in swords and their use. The reader's guide on this historical tour is Mike Loades. Mike has been handling swords most of his life, as a fight arranger, stuntman and historical weapons expert for TV and stage. As much as his profound knowledge of the subject, it is his lifelong passion for swords that comes through on every page. His fascinating text is supported by a lavish wealth of images, many previously unpublished and taken specifically for this book. "Superb . . . the most breathtaking coverage from the earliest days to modern times. Brilliant." —Books Monthly
