Glint Ann Coburn,2009-02-06 Ellie and her little brother Danny spend their lonely days making up stories about a young girl in a world of dragons and shape-shifters, a girl as brave and cunning as they would like to be. Five years later Danny disappears. The police have no clues. They fear he is dead, but Ellie knows better. She also knows that she is the only one who can find him. At the same time, in the world Danny and Ellie imagined, a young girl named Argent sets off on a quest of her own to reclaim a stolen dragon hatchling. As each girl makes her way closer to her goal, the boundaries between the worlds of fantasy and reality begin to blur until it's unclear where one world ends and the other begins. Gripping, compelling, and utterly absorbing, *Glint* is the story of two worlds—and two heroines—that readers will never forget.

Glint of Light on Broken Glass Jason Monaghan,2016-06-02 Jason Monaghan's historical novel *Glint of Light on Broken Glass* begins when sixteen year-old George is called up for the island of Guernsey's militia, just before the Great War. Guernsey is poor, backward and haunted by superstition, and when George attempts to step up, he is quickly rejected as lame. However, will anything change for him, when out of the chipped corner of his glasses, he sees a beautiful woman following him, which makes him believe that she can tell him his future...? More than a story of the Great War, *Glint of Light on Broken Glass* explores a new relationship that George cannot escape. With the beautiful Edith by his side, things could be perfect, but she only has eyes for his tough, ambitious brother, Artie. As the world beyond the island is engulfed in turmoil, life for the three young people quickly becomes complicated. George's obsession with both Edith and the mysterious woman who predicts the future threatens to tear the family apart. Will tragedy or good fortune surface for his family? *Glint of Light on Broken Glass* will appeal to those who enjoy historical, romantic fiction with a twist of the mysterious. "This story is one of the very few that reflects the unique language and character of the island people, with a true sense of place. It weaves folklore and superstition, giving the novel an edge of magical realism", comments Jason.

His motto has always been Live and let live, but lately he's finding himself in a world where only fools and dead men feel the same way. The source of all his problems is a coin - not just any old coin, but the 64 D silver dollar. It has existed in collectors' circles only as a rumor, since the whole run was supposed to be melted down before it left the Denver mint. This one survived. With no idea of its worth, Quitman has filched the coin from his lover's desk simply because it was minted in the year of his birth. Now he's paying dearly. Quitman's idle queries about the coin bring forth the attentions of single-minded collector Henry Lyman and his ruthless hired gun, Lester VanDyk. And then, when one of Quitman's colleagues is killed, the cops come down hard as well. With no one to turn to, the amiable young salesman must reach deep within himself to find the strength and determination to clear his name and escape from a world he never knew existed.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. A Glint of Black Stocking Jeanne Lawrence,2003-08 When Tom Barclay returns to the Industrial West Riding of Yorkshire, England shortly after the end of World War II he finds his relationship with his daughter drastically affected. He's served five and a half years abroad in the Army. She was eight when he left and fourteen when he returned. Jonquil Barclay chooses a nursing career against her father's wishes and enters Preliminary Training School at the local Royal Infirmary in November 1949. Strict imposed and self-discipline is required from day one. Serious illness, death, drudgery, extreme emotions and the traumas of patients and their families become daily

life. As do the rewards of working as a team, the joys of seeing patients recover and sheer job satisfaction. Four young nurses rooming together become firm friends. They have fun bending the Infirmary rules and find relief from their tensions in sharing experiences. Young love intrudes in more ways than one and a surprising Infirmary intrigue develops. Christmas 1949 shows a rare, happy atmosphere for patients and staff alike. The joy of getting through her PTS exams at the end of three hard months is more than Joni ever hoped for.

GLINT. ,1999 GLINT is the acronym for Geo Light Imaging National Testbed. Schafer has supported this AFRL program in three basic areas for the Surveillance Technologies Branch (DEBS). The first area is the collation of information to develop a target database of geosynchronous (GEO) satellites. Each possible target needs to be investigated in order to obtain permission from the owner/operator to illuminate it. This information, when obtained, would be part of the database as well. The second area addresses a major operational concern for GLINT. A necessary prerequisite to illumination of GEO satellites by GLINT is the ability to ascertain that the object acquired is the intended target. The GEO satellites are unresolved to any single pupil associated with aperture sizes we are now capable of building. GLINT will be able to image them using an active Fourier telescoping scheme. However, due to international agreements and the safety of instrumentation on-board these satellites, a non-imaging method to first identify that the acquired object is the target in question. This second area is the Signatures Program. Its goal is to pursue non-imaging techniques to obtain satellite information and reduce uncertain identification (ID) in preparation for active illumination by GLINT. The final area of support was the study on a relay mirror experiment that could be performed with GLINT.

Glint A. Kaiser, 2019-11-06 This debut collection uses well-considered details and a strong sense of poetic line in its meditations. *glint* is shaped by visual art, poetry, and life abroad serving as still points for the poet, a place to pause and find insight into family life, travel, illness and assault, from which she builds responses to her own life.

their lives. Nova doesn't mind—mostly. She knows Enhanced Memory is a gift. But Kade says Nova doesn't know the costs of this technology that's taken the world by storm. Kade runs a secret vlog cataloging real experiences, is always on the move, and is strangely afraid of Nova—even though she feels more comfortable with him than she ever has with anyone. Suddenly there are things Nova can't stop noticing: the way her parents don't meet her eyes anymore, the questions no one wants her to ask, and the relentless feeling that there's something she's forgotten...

A Nonlinear Time Series Workshop Douglas M. Patterson, Richard A. Ashley, 2000 The analysis of what might be called dynamic nonlinearity in time series has its roots in the pioneering work of Brillinger (1965) - who first pointed out how the bispectrum and higher order polyspectra could, in principle, be used to test for nonlinear serial dependence - and in Subba Rao and Gabr (1980) and Hinich (1982) who each showed how Brillinger's insight could be translated into a statistical test. Hinich's test, because it takes advantage of the large sample statistical properties of the bispectral estimates became the first usable statistical test for nonlinear serial dependence. We are forever grateful to Mel Hinich for getting us involved at that time in this fascinating and fruitful endeavor. With help from Mel (sometimes as a mentor, sometimes as a collaborator) we developed and applied this bispectral test in the ensuing period. The first application of the test was to daily stock returns {Hinich and Patterson (1982, 1985)} yielding the important discovery of substantial nonlinear serial dependence in returns, over and above the weak linear serial dependence that had been previously observed. The original manuscript met with resistance from finance journals, no doubt because finance academics were reluctant to recognize the importance of distinguishing between serial correlation and nonlinear serial dependence. In Ashley, Patterson and Hinich (1986) we examined the power and size of the test in finite samples.

Glint Lois Parker Edstrom, 2019-06 The precise language of these poems is astounding as it works through both sensation in nature & the soul. This poet melds nature, family, and surprising imagery into a unique equation that is both harsh & subtle. I feel blindsided in a perfect way when reading this collection; this is work that sticks hard. -Amy MacLennan, *The Body, A Tree*
